

**Department of Land and Natural Resources
Fiscal Biennium FB 2025-27 Budget Overview**

A. Provide your agency's mission statement, strategic objectives, goals, and performance metrics. How will the agency measure progress? What milestones will be tracked.

The Department of Land and Natural Resources (DLNR) comprises nine divisions: Bureau of Conveyances (BOC), Division of Aquatic Resources (DAR), Division of Boating and Ocean Recreation (DOBOR), Division of Conservation and Resources Enforcement (DOCARE), Division of Forestry and Wildlife (DOFAW), Division of State Parks (SP), Engineering Division (ENG), Land Division (LAND), and the State Historic Preservation Division (SHPD); four staff offices: Administrative Services Office, Human Resources Office, Information Technology Services Office, and the Office of Conservation and Coastal Lands; and the Chairperson's Office.

Administratively attached to DLNR are sixteen Boards and Commissions, including Board of Land and Natural Resources (BLNR), Commission on Water Resource Management (CWRM), Hawaii Climate Change and Mitigation and Adaptation Commission, Kaho'olawe Island Reserve Commission (KIRC), Legacy Land Conservation Commission, Natural Area Reserves Systems Commission, Game Management Advisory Commission, Hawaii Historic Places Review Board, Aha Moku Advisory Committee, Endangered Species Recovery Committee, Forest Stewardship Advisory Committee, Invasive Species Council, Island Burial Councils, Nā Ala Hele Advisory Councils, Kāne'ōhe Bay Regional Council, and Mauna Kea Stewardship Oversight Authority.

The DLNR's mission is to educate, enhance, protect, conserve, and manage Hawaii's unique and limited natural, cultural, and historic resources held in public trust for current and future generations of the people of Hawai'i Nei, and its visitors, in partnership with others from the public and private sectors.

The DLNR has approximately 1,149 employees and an operating budget of \$342,882,854 for fiscal year (FY) 2025 from all means of financing. DLNR works in partnership with federal, county, and other state agencies, as well as community groups, non-profit organizations, and private landowners, to carry out its mission.

DLNR is responsible for managing or overseeing:

- 1.3 million acres of Hawaii's public lands in forests, parks, and other natural areas
- 3 million acres of state ocean waters (including all fisheries, coral reefs, small boat facilities, and ocean recreation)
- All freshwater resources (including more than 376 perennial streams and all ground water aquifers)
- Historic and cultural sites
- Forests and watersheds
- Public beaches

- State parks (including 50 parks encompassing 30,000 acres on 5 major islands)
- Regulation of dams and reservoirs
- Rockfall mitigation (on public lands)
- Endangered species protection
- Invasive species control
- Regulating 3 million acres of land in the Conservation District

Land Management Division -- LNR101

Land Division (LAND)

Land Division's purpose is to ensure the effective and efficient use of miscellaneous public lands not otherwise set aside to other agencies, in ways that fulfill the public trust obligations and promote the sustained social, environmental, and economic well-being of Hawaii's people. The Land Division acquires land needed for public purposes such as protection of conservation and natural resource lands and works with the Land Board to obtain approval to transfer the management of lands to other government agencies for their respective uses through executive orders and disposes of land to the private sector through leases, licenses, grants of easements, revocable permits, and rights-of-entry. The Land Division manages about 300 or so short term permits and 2,000 or so longer-term dispositions such as leases and easements, statewide, for commercial purposes, and a handful of residential leases and permits. The Land Division also maintains an inventory of State lands and is a repository of government land documents dating back to the Great Mahele of 1848.

Office of Conservation and Coastal Lands (OCCL)

The mission of the Office of Conservation and Coastal Lands (OCCL) is to protect and conserve Conservation District lands and beaches within the State of Hawai'i for the benefit of present and future generations, pursuant to Article XI, Section 1, of the Hawai'i State Constitution, through regulation of uses of public and private lands in the Conservation District. These lands encompass our State's terrestrial and marine environments, with special emphasis on coastal areas and beaches. OCCL seeks to balance the conservation of the State's unique and fragile natural resources with development of these resources for the good of the State.

Climate Change Mitigation and Adaptation Commission (CCMAC)

Hawai'i's Climate Mitigation and Adaptation Commission recognizes the urgency of climate threats and the need to act quickly. It promotes ambitious, climate-neutral, culturally responsive strategies for climate change adaptation and mitigation for the protection of life and land in a manner that is clean equitable and resilient.

Bureau of Conveyances (BOC) -- LNR111

The mission of the Bureau of Conveyances is to serve and protect the public by providing for an accurate, timely, permanent, and accessible system for recording, maintaining, and preserving land title documents, related maps and facilitating Uniform Commercial Code filings.

Division of Aquatic Resources (DAR) -- LNR401

The mission of the Division of Aquatic Resources is to work with the people of Hawaii to manage and conserve the State's unique aquatic species and ecosystems for present and future generations.

Division of Forestry and Wildlife (DOFAW) -- LNR 102, LNR 172, LNR 402, LNR 407, LNR 804

The mission of the Department of Land and Natural Resource's Division of Forestry and Wildlife is to protect and manage watersheds, native ecosystems, and cultural resources, and provide outdoor recreation, sustainable forest products, and ecosystem services through management, partnerships, community involvement, and education.

Engineering Division (ENG) -- LNR141, LNR810

The Engineering Division administers programs to: (1) provide engineering services to other divisions of the Department to execute Capital Improvements Program (CIP) and/or operating, maintenance and repair projects; (2) reduce the risk to people, property, and natural resources from natural hazards and the failure of dams and reservoirs, through planning, management, mitigative efforts, educations and administration of compatible regulatory programs (including the National Flood Insurance Program – NFIP); (3) effectively manage geothermal resources and its development to protect the health and safety, and to ensure continued viability of the resource for the future; and (4) promote economic development and enhance public welfare by developing water supplies and state lands in support of State-sponsored projects.

Commission on Water Resource Management (CWRM) – LNR404

The mission of CWRM is to protect the water resources (ground and surface water) of the State of Hawai'i for the maximum beneficial use of water by present and future generations. The Commission serves as the primary steward of the water resources public trust and exercises exclusive jurisdiction in all matters relating to the implementation and administration of the State Water Code (Hawai'i Revised Statutes Chapter 174C). Implementation of the State Water Code is achieved through a comprehensive program consisting of long-range planning, hydrologic data collection and analysis, resource monitoring, and regulatory controls and enforcement within established rules, regulations, and guidelines adopted by the Commission. The four (4) branches of the Commission are 1) Planning 2) Stream Protection and Management 3) Ground Water Regulation and 4) Survey.

More information about CWRM's work, programs, and policies, as well as maps of the state's surface water hydrologic units, deep monitor wells, CWRM and U.S. Geological Survey water monitoring gages, and locations where interim instream flow standards have been set can be found in CWRM's recently published [StoryMap](#).

Division of Conservation and Resources Enforcement (DOCARE) -- LNR405

The Division of Conservation and Resources Enforcement (DOCARE) has primary responsibility for the enforcement of laws created to manage, protect, and conserve Hawaii's unique and

limited, natural, cultural, and historic resources. DOCARE is responsible for patrolling and monitoring 3 million acres of marine waters, the largest tropical forest in the nation; the 11th largest forest reserve in the nation of which over 1 million acres have been set aside for hunting; 1.2 million acres of state-owned lands; 2 million acres of conservation lands and 23,000 acres of inland surface waters. Throughout the State, DOCARE officers are required to serve a resident population of approximately 1.4 million and approximately 9 million visitors that utilize Hawaii's resources on a regular basis.

Division of Boating and Ocean Recreation (DOBOR) -- LNR801

The mission of the Division of Boating and Ocean Recreation is to enrich the lives of people of all ages, both residents and visitors alike, by providing ocean-based opportunities, facilities, activities, skill development, and area management including boating of all types, saltwater fishing, surfing, sailboarding, diving, ocean swimming, and other ocean activities.

State Historic Preservation Division (SHPD) -- LNR802

The mission of the State Historic Preservation Division is to develop and maintain a comprehensive program of historic preservation through review of projects to assess potential impacts to historic properties, and to promote the use and conservation of historic properties for the education, inspiration, pleasure, and enrichment of the citizens of Hawai'i.

Division of State Parks (State Parks) -- LNR806

The mission of the Division of State Parks is to manage, maintain and enhance state park operations and infrastructure and programs for the public by providing statewide administrative and interpretive services, formulating overall policies and plans, and determining current and future needs for state parks and Land and Water Conservation Fund supported activities. To provide public safety and quality to recreational and cultural park experience while minimizing potential impacts to natural and cultural resources when developing and operating state parks.

Natural Physical Environment (Administration) -- LNR906

DLNR Administration's objective is to enhance the effectiveness and efficiency of the Department by formulating policies, directing, and coordinating operations, fiscal management, information technology, communications, and personnel, and providing other core administrative and support services. In addition to the Chair and 1st Deputy, Administration consists of support services to all divisions in the area of Human Resources, Fiscal, IT, and Compliance with Civil Rights, Sunshine Law, and Office of Information Practice.

The most recent notable performance measurement is from the Act 182, SLH 2023, consolidated website development of phase I which was completed in FY24. Google Analytics was used to analyze the new outdoor.hawaii.gov website performance and data collected revealed that it serviced more than 3000 users across 4,337 sessions for the first month's use. We are currently in the phase II development and have recently launched a virtual assistant powered by artificial intelligence that can positively increase information access related to DLNR for all users.

Administration also received legislative funding for four new positions, including Economic Development Coordinator (recently hired in December 2024), two Administrative Assistants with highly skilled qualifications to provide broad based support for complex land transactions, coordination with multiple divisions and other government agencies, and strategic outreach.

Aha Moku Advisory Committee -- LNR907

The mission of Aha Moku Advisory Committee is to bring the people (Na Iwi O Ka 'Āina) and the public trust, and their voices and decisions forward to all policy makers regarding the sustainability and perpetuation of all natural and cultural resources connected to the akua that created the 'āina/land, and 'āina from which the kanaka was born.

Kaho'olawe Island Reserve Commission (KIRC) -- LNR908

The Kaho'olawe Island Reserve Commission (KIRC) was established, under the Hawai'i Revised Statutes – Chapter 6K, to manage Kaho'olawe, its surrounding waters, and its resources, in trust for the general public and for a future Native Hawaiian sovereign entity. The KIRC is placed administratively under the DLNR. The KIRC depends upon the Department for its fiscal and personnel support functions. All other functions required to operate the Reserve are conducted from the KIRC's Wailuku, Maui office.

The mission of the KIRC is to implement the vision for Kaho'olawe, in which the kino (physical manifestation) of Kanaloa is restored, and nā po'e (people of) Hawai'i care for the land through the meaningful, safe use of Kaho'olawe for the purposes of the traditional and cultural practices of the Native Hawaiian people, and the restoration of the island and its waters.

The objectives of the KIRC are to: protect and manage the use and resources of the Kaho'olawe Island Reserve; provide safe and meaningful public access to the Kaho'olawe Island Reserve; restore the devastated landscape of Kaho'olawe; and care for the island's unique cultural and historic resources.

Mauna Kea Stewardship & Oversight Authority -- LNR909

The Mauna Kea Stewardship and Oversight Authority (Authority) was established for the governance of the summit region of Mauna Kea as a spiritual and special place of significance that is home to cultural landscapes, fragile habitats, and historical and archaeological artifacts. The Authority will, for five years, co-manage the Mauna Kea lands with the University of Hawaii. Starting on July 1, 2028, the Authority will be the sole authority for the management of Mauna Kea lands as defined by Act 255, SLH 2022. The Authority will manage the land uses, human activities, other uses and access, stewardship, education, research, disposition, and overall operations of Mauna Kea lands.

- B. Discuss how current state-wide conditions have affected your division's operations and the ability to meet goals. Identify and discuss notable performance measures, expected outcomes, and recent results.**

Land Management Division -- LNR101

Land Division (LAND)

The state economy with rising prices (double digit inflation over the years) has contributed to a significantly higher number of outstanding receivables (double digit increase in receivables in FY2024 compared to FY2023).

Office of Conservation and Coastal Lands (OCCL)

Rising seas and the increase in coastal erosion has increased the need to develop mitigative and adaptive strategies to protect communities and coastal resources. The OCCL is investing in beach management and coastal restoration projects State-wide, with a focus on developing community-based projects.

Development pressures in the Conservation District are like last year. In FY 2024 OCCL processed approximately 7 Conservation District Use Applications, 56 Site Plan Approvals, 213 official correspondences, 2 fishpond restoration permits, and 10 shoreline encroachments.

The number of alleged Conservation District land use violations has increased for the second year in a row. OCCL opened investigations into 39 alleged conservation district land use violations, a 69% increase from FY 2023.

The State Climate Commission is developing two major climate action plans, the Priority Climate Action Plan (PCAP) and the Climate Action Pathway (CAP)

Climate Change Mitigation and Adaptation Commission (CCMAC)

Climate change is impacting every aspect of our society. Climate change is directly linked to health, welfare, economy, livelihoods, affordability, equity, and quality of life. Climate change impacts such as stronger hurricanes, more intense flooding and drought leading to wildland fires threaten public health and safety, damage native ecosystems and property, lay the groundwork for invasive species invasions and erode watershed function. As the State faces increasing climate impacts implementation of strategies to mitigate and adapt to protect lives and livelihoods is ever more urgent.

Impacts to the state due to climate change include:

- Safety: More frequent hurricanes, floods, and wildfires threaten lives and property.
- Emergency preparedness: Coastal communities are increasingly at risk, requiring significant investments in evacuation plans and shelters.
- Economy: Rising sea levels and coastal erosion threaten beaches, reefs, and cultural sites, jeopardizing tourism, Hawai'i's primary economic driver. Changing weather patterns disrupt crop yields, reducing the output of coffee, taro, and other key products. Frequent and intense storms increase the financial burden of disaster recovery and infrastructure repair.

- **Livelihood:** Climate impacts disproportionately affect low-income communities reliant on agriculture and outdoor industries.
- **Health:** Higher temperatures increase heat-related illnesses, while extreme weather events exacerbate mental health issues like stress and anxiety.
- **Affordability:** Increasing disaster risks drive up property and health insurance costs, straining household budgets. Importing 85-90% of food and 60-70% of energy becomes even costlier due to global supply chain disruptions.
- **Infrastructure:** Erosion and flooding impacts roads, airports, and harbors face damage from rising sea levels and heavy rainfall. Extreme weather events challenge the resilience of energy infrastructure.
- **Cultural impacts:** Climate change endangers wahi pana (sacred sites) and cultural practices tied to the land and sea.
- **Ocean ecosystems:** Warming waters and acidification harm marine biodiversity, including critical fish populations. Coral reef bleaching and ocean acidification harm ecosystems, reducing recreational opportunities and emotional connections to nature.
- **Forest health:** Drier conditions and invasive species increase wildfire risks in native forests and causing the extinction of native and endemic species.
- **Equity:** Native Hawaiian and other vulnerable communities are more likely to face climate-induced challenges due to systemic inequities. Marginalized groups may struggle to access adaptation resources like cooling, insurance, or relocation assistance.
- **Food Security:** Droughts and invasive pests disrupt local food production, increasing dependency on imports.
- **Water Security:** Reduced precipitation and shrinking aquifers threaten freshwater availability for drinking and irrigation. Sea-level rise contaminates freshwater wells.
- **Energy Security:** Higher temperatures increase electricity usage for cooling, stressing the grid.
- **Resiliency:** One year on and the State is still struggling to recover from Lahaina. Old housing stock and limited investment in adaptation leave kama'āina in a precarious position.

Dedicated funding for climate change actions has been limited to disparate and uncoordinated projects reducing the state's capacity to mitigating climate change impacts. Climate change remains a huge challenge for all state departments with more severe and frequent climate impacts resulting from climate change have impacting operations and limiting ability to carry out normal day to day operations.

CCMAC is currently working to create a matrix to understand how climate change is impacting the state and what agencies are responsible for addressing these impacts. Planning is also underway to develop a climate action pathway to mitigate climate change through decarbonization across all sectors.

Limited funding and staff are affecting CCMAC's operations and its ability to meet statutory goals in 225p-3. Despite CCMAC's broad and overarching mandate to provide policy guidance, adaptation strategies and coordination and implementation guidance CCMAC lacks the funding and staff needed to fulfill its responsibilities. CCMAC operates on an annual operational budget

of \$75,000 and one (1) staff position. Given the range of climate challenges currently facing Hawai'i, there is an urgent need to accelerate action to both build resilience to protect lives and mitigate climate change through carbon sequestration and decarbonization. More staff and funding will allow CCMAC to build capacity across state agencies to implement actions now to avoid disasters such as Lahaina, reduce economic burdens on the state and individuals and ensure the long-term resiliency of the State's economy, infrastructure, and wellbeing of water resources. CCMAC has successfully leveraged funds from a variety of non-State sources and federal grants, however, there is uncertainty with the availability of future funding due to the incoming new administration's possible priorities.

Bureau of Conveyances (BOC) -- LNR111

The Bureau of Conveyances daily operations, revenues and expenses are directly impacted by the volume of recordings, which is largely depending upon real estate market conditions and the overall health of the Hawaii and national economy.

Revenues from document recording fees, certified copies, and user fees totaled \$6,354,886 in FY24. In FY25, the Bureau is anticipating a nominal downward trend in revenues from the impacts of economic uncertainties including lingering inflationary pressures from higher interest rates and the anticipated recession that will slow the State and National economy. Given these conditions, revenues should still be sufficient to cover FY25 projected operating expenses due to our continuing specialized and difficult to fill position vacancies. BOC continues to work with contractor to update the backlog of filings for transfers of certificate of title for land court property. This will continue to be a challenging priority.

Division of Aquatic Resources (DAR) -- LNR401

Hawai'i continues to experience unprecedented changes to our marine environments caused by climate change in the form of increased ocean temperatures, sea level rise, ocean acidification, and more severe and frequent storm events. The impacts of climate change are exacerbated by land-use issues contributing sedimentation, pollutants, sewage, and marine debris. The Division is especially experiencing increase necessity to respond to environmental disturbance events from natural disasters to reef damage events. In addition, there is increased interest to enhance Hawai'i's natural marine infrastructure (coral reefs and estuaries) so that these ecosystems can protect Hawaii from storm events by dissipating wave energy.

DAR currently works to improve conditions in the state's aquatic environments by using tools including fisheries management, permits, marine managed areas, education, environmental response, invasive species control, and restoration.

DAR has identified four pillars to support effective management, as well as a course of action that addresses the challenges and opportunities associated with each component. The four pillars of Holomua Marine Initiative are: 1) Place-based planning, 2) Pono practices, 3) Monitoring, and 4) Restoration.

DAR staff are actively working across the state on all four pillars and continues to create partnership opportunities for communities and DAR to effectively manage marine resources. DAR will work in collaboration with community members to identify and implement actions for

these pillars through the Holomua Marine Initiative. The Goal of the Holomua Initiative is to “Implement a comprehensive strategy focused on effectively managing nearshore marine areas around each main Hawaiian island by developing and carrying out management frameworks that place an emphasis on community participation, cultural relevance, and maximized effectiveness in all stages of management.”

Place-based Planning: Place-based planning describes a process that brings together the values, users, experiences, activities, and science associated with a specific geographic location. Place-based planning aims to balance the needs of a local community with the health and long-term sustainability of the nearshore ocean environment.

Each of the main Hawaiian Islands is home to unique marine species and habitats. These differences influence how communities interact with and use marine resources, as well as the desired management goals for each place. Successful place-based planning in Hawai‘i must take into consideration both the obvious and nuanced differences in each place by engaging with community members who live, work, and play in these areas.

Pono Practices: Pono Practices refer to the set of tools used to manage human activities in ways that ensure abundance for present and future generations. In ‘Ōlelo Hawai‘i, one of the meanings of pono is “righteousness.” Pono practices call upon people to do what they feel is proper and morally correct regarding marine resource use. Pono also means “balance” and refers to finding the balance in our relationships with other things, places, and people to promote sustainable use and stewardship for future generations.

The goal of the Pono Practices pillar is to increase responsible behavior to minimize the impact of human activities in our nearshore waters through a mix of education and outreach, strengthened enforcement, and improved regulations. DAR promotes pono practices through the following focus areas:

EDUCATION AND OUTREACH: Education and outreach programs encourage people to make responsible decisions by improving awareness of our unique resources and how best to care for them.

ENFORCEMENT: Promoting compliance and upholding conservation rules are essential to increase management effectiveness and improve the overall health of nearshore environments. The Division of Conservation and Resources Enforcement (DOCARE) is the law enforcement agency of DLNR. DOCARE is responsible for enforcing regulations that serve to protect, conserve, and manage Hawai‘i’s unique and limited natural, cultural, and historical resources.

FISHING REGULATIONS: Rules aimed at mitigating the impacts of human activities provide clear standards and instructions concerning what can and cannot be done in marine spaces to address the threats and challenges facing our nearshore waters today and promote sustainable harvest.

Monitoring: Monitoring refers to the observation and collection of information and measurements to detect changes and progress of something over time. Many types of

monitoring are needed to understand ecosystems and the impacts of changing conditions on those ecosystems. Specific measurements or observations that reflect the components and condition of an ecosystem are called indicators. A broad range of indicators are used by DAR to track and measure the status of nearshore resources.

DAR's current monitoring programs include:

- Status of reef fish populations (e.g., are there more and bigger fish or fewer and smaller fish?)
- Fishery catch and effort information through commercial marine license fishing reports
- Recreational fisheries catch and effort data through shoreline Hawai'i Marine Recreational Fishing Surveys and creel surveys
- Status of mobile invertebrates (such as urchins and sea cucumbers)
- Health of corals (health, impacts of bleaching events and unintentional ship groundings, reef habitat/structure mapping)
- Status of aquatic invasive species (AIS) (how can we prevent, detect, rapidly respond, and manage these threats to our aquatic resources)
- Status of management's effect on communities' connections to nearshore places through socio-cultural monitoring of existing MMAs.

Restoration: The Restoration pillar is focused on protecting Hawai'i's nearshore marine ecosystems by preventing further damage and restoring degraded habitats and fisheries. Healthy and functioning ecosystems provide direct benefits to people, these benefits are referred to as ecosystem services. Some examples of ecosystem services provided by a healthy nearshore environment include shoreline protection from the damaging effects of waves and storms, as well as jobs and food.

This pillar refers to active rebuilding and replenishing actions to help improve nearshore habitats toward a healthier condition. Also included in this pillar is efforts to prevent further degradation of nearshore ecosystems by reducing and eliminating threats such as invasive species introduction, degraded water quality, disease, and environmental damage.

CORAL RESTORATION: DAR's coral nurseries are state-of-the-art facilities recognized globally for pushing the front lines of coral restoration technology. As a result, the nursery can grow approximately 220 large, module pyramids of coral each year for out-planting to speed recovery in areas where a reef has been damaged or destroyed. A vital part of Hawai'i's coral nursery is its Rare Hawaiian Coral Ark, which banks 50 species of rare corals. The Ark not only houses specimens that contain critical genetic information about coral species found nowhere else on earth, but also keeps them safe from natural and man-made disasters. The coral ark can help restore rare corals after bleaching or other devastating events.

WATERSHED PROTECTION AND RESTORATION: DAR is contributing to multiple projects involving watershed restoration throughout the state, including in places like He'eia, Honouliuli, Kohala,

and West Maui. Wetlands serve as the last stop before water enters the coastal marine ecosystem. Functioning wetlands act as natural filters and fish nurseries that improve water quality, increase fish biomass, and support ecosystem resilience in connected nearshore habitats. Some of the projects include removal of invasive fish species like tilapia from streams and estuaries; ungulate removal and protective fencing to prevent mauka degradation; collaborative monitoring of anchialine ponds to protect the rare and endemic species that live there; and monitoring fish communities after invasive plant removal. DAR works in partnership with conservation and community organizations to support and advance these restoration efforts. Expansion of these partnerships will increase the effectiveness and success management actions proposed by communities through the Holomua Marine Initiative.

CORAL BLEACHING RESPONSE: Bleaching occurs when corals are stressed, often from extreme heat waves that last for several weeks or even months. Hawai'i has experienced multiple bleaching events over the last five years, which has resulted in widespread coral mortality throughout the state. DAR has created a coral bleaching recovery plan to address the increasing frequency of these events. The plan details actions for DAR to mitigate damage and promote recovery from the effects of bleaching events.

AQUATIC INVASIVE SPECIES (AIS): A major threat to biodiversity in Hawai'i is invasive species, where species have evolved in isolation causing Hawai'i to have a high rate in endemism but also be extremely susceptible to invasion. Competition, predation, and habitat shifts caused by invasive species can add stress to ecosystems already encountering other pressures. The major vector for marine introductions is shipping, with an island chain reliant on the daily ship arrivals. In addition, aquarium releases, aquaculture, and aquatic plant sales pose a risk. DAR prevents species introductions primarily by conducting ballast water risk assessments on commercial vessel arrivals and supporting modern best practices to manage ballast water and hull fouling. The team is also working with other agencies and partners to drive policy directives regarding ballast water, hull fouling, and high-risk imports.

Division of Forestry and Wildlife (DOFAW) -- LNR 102, LNR 172, LNR 402, LNR 407, LNR 804

The Division of Forestry and Wildlife (DOFAW) is responsible for the stewardship and management of approximately one million acres of land – a quarter of all the land area in Hawai'i – designated as Forest Reserves, Wildlife Sanctuaries, Natural Area Reserves, Public Hunting Areas, and Nā Ala Hele trails. Through voluntary, collaborative partnerships, DOFAW assists in managing another one million acres of partnership lands that protect Hawaii's natural and cultural heritage as well as our source of clean, fresh water, and home to more endangered species than any other state in the nation.

The Lahaina wildfire, increasing droughts, and catastrophic weather events have highlighted the significance of taking proactive measures to protect our watershed, fire suppression readiness, and prevention of invasive species. The DOFAW's top priority is providing a sustained and abundant water supply, and recent support by the Legislature has enabled DOFAW to increase watershed lands protected against damage by feral ungulates and invasive species from 10% to 21% over the last 12 years. The Sustainable Hawai'i Initiative calls for the protection and management of 30% of watershed lands by 2030 to ensure our forests provide for the recharge of freshwater supplies. In addition to state-owned watershed areas, the Watershed Partnership

Program supports management across one million acres of land through voluntary alliances of large landowners committed to maintaining their forest lands for the water they provide. Sixty-six percent of the forest lands in Hawai'i are privately-owned, and the State, with support from federal partners, works to provide expertise and support to private landowners to assure that forest lands remain in forests via Hawai'i's Forest Stewardship, Forest Legacy, Urban and Community Forestry, Natural Area Partnership, and Legacy Land Conservation programs. Another component of the Sustainable Hawai'i Initiative is the implementation of the Hawai'i Interagency Biosecurity Plan. DOFAW administers the interagency Hawai'i Invasive Species Council, which develops an annual interagency budget to implement cost-saving prevention, control, research, and outreach projects in line with the Hawai'i Interagency Biosecurity Plan.

Another top DOFAW priority is to manage wildland fire impacts on natural resources and the wildland-urban interface. Large wildland fires are not a natural part of Hawaii's landscapes, and DOFAW is the primary wildland fire responder on more than 25% of the state's land area. In addition, DOFAW assists HI-EMA and the counties during other emergencies and natural disasters such as hurricanes, lava flows, and floods.

Wildland fires threaten public health and safety, damage native ecosystems and property, lay the groundwork for invasive species invasions, and erode watershed function. Recent investments in wildland fire infrastructure and dedicated fire suppression funding have allowed DOFAW to be more effective in fire-fighting efforts and have improved DOFAW's capacity to manage large emergency incidents such as floods, hurricanes, and lava flow events.

Mitigating climate change impacts is a major challenge for DOFAW, influencing our work from forest health, wildland fire, and invasive species control to rare species management and extinction prevention. Planning is underway to develop contingencies for anticipated climate change scenarios such as sea-level rise, longer drought periods with intermittent extreme rainfall events, and forest health challenges including the movement of forest diseases, pests, and invasive species. Novel management strategies are needed to prevent the imminent extinction of several of Hawaii's endangered forest birds due to disease spread because of climate change-induced mosquito range expansion and the subsequent spread of avian malaria. The Plant Extinction Prevention Program has successfully kept at-risk plant species from going extinct under its watch, but a reduction in federal funding has eliminated much of the program's funding, and without additional support, the state may return to a previous extinction rate of one plant species per year. DOFAW is poised to support climate change mitigation measures through carbon sequestration. Tree planting is a cost-effective and natural way to capture and store carbon from the atmosphere and provides multiple ecosystem benefits. DOFAW is looking for opportunities to scale-up tree planting efforts to help the state meet its carbon-neutral goals.

Engineering Division (ENG) -- LNR141, LNR810

More severe and frequent storm events resulting from climate change have impacted operations of the Engineering Division (ENG). ENG continues to assist the Department in the on-going recovery efforts due to the wildfires on the islands of Maui and Hawaii by coordinating with the Hawaii Emergency Management Agency to secure FEMA federal funds. ENG is also aware that severe rain events or earthquakes could have a detrimental effect on dams and reservoirs. Protecting public safety by minimizing the risk of a dam failure is one of our highest priorities.

ENG will continue conducting routine inspections of the State's 127 regulated dams, issuing dam safety permits or enforcement actions to ensure dam owners diligently work toward bringing their dams into compliance.

Millions of dollars appropriated for Capital Improvement Program (CIP) projects and maintaining staff capacity to execute/expedite these projects continue to improve DLNR facilities and create jobs to stimulate and boost the economy. Performance measures include timely implementation of projects and expenditure of project funds.

The inability to fill vacant engineering positions has made achieving the Division's project and expenditure goals more challenging. We believe that the low unemployment rate and less competitive salaries compared to private and other government sectors contribute to the small and less qualified pool of candidates. To address this issue, we are currently taking full advantage of the Wikiwiki Hiring process, recruiting at all levels, and redefining positions as needed to allow greater flexibility.

Commission on Water Resource Management (CWRM) - LNR404

Water is Hawai'i's most important natural resource. Its protection and preservation are directly linked to health, welfare, and quality of life. As the State approaches the limits of its water resources, effective and proactive plans and strategies should be in place to optimize and conserve water use, to best allocate existing resources, and to implement measures to best meet future needs and competing interests, while protecting public trust uses and sustaining our water resources. A variety of factors are affecting CWRM's operations and its ability to meet goals and uphold its public trust responsibilities. This includes:

- **Insufficient funding and staff:** Despite the CWRM's broad and overarching authority manage, protect, and regulate water resources statewide, CWRM lacks the funding and staff needed to fulfill its responsibilities. CWRM operates with a staff of 33 people including a Deputy Director. Given the range of water challenges currently facing Hawai'i, there is an urgent need to increase CWRM's capacity through increased and adequate funding and staff. More staff will allow CWRM to engage with communities ahead of contentious issues and avoid conflict, respond to water-related inquiries and petitions in a timely manner, conduct enforcement and hold permittees accountable for Water Code violations, and ensure timely updates to the Hawai'i Water Plan by engaging early and often with agency preparers and stakeholders. While CWRM is committed to seeking funds from a variety of non-State sources and federal grants, the lack of staff inhibits CWRM's ability to apply for and manage grant opportunities. In addition, most grants have matching requirements, which CWRM cannot meet given its limited base budget. More funding will allow CWRM to leverage State funding and take advantage of millions of dollars in federal grants.
- **Data and monitoring:** CWRM is responsible for protecting the health of 110 aquifer system areas and 376 perennial streams statewide. CWRM cannot make informed water-management decisions without reliable, long-term data. Despite current efforts, ground and surface water is not monitored as completely as it should be. This makes it difficult to understand long-term temporal and spatial changes in water resources and availability and the impacts of climate change on water supplies. In 2020, the USGS released a report on the

water resource management monitoring needs of the State of Hawai'i and found that rising demand for freshwater, emerging regulatory developments, potential increased volatility in climate patterns and effects, and new data-delivery capabilities have increased the demand for accurate and timely water resource information. The report estimated \$177 million is needed to upgrade and expand existing monitoring networks. In 2025, CWRM will seek additional CIP funding to expand its current Deep Monitor Well (DMW) network. In addition, CWRM is interested in establishing an annual monitoring fee for all permittee holders (with certain exceptions) and will continue working on a framework for the fee in consultation with stakeholders throughout 2025. The fee will help pay for hydrologic monitoring and studies essential to ensure the long-term sustainability of the State's water resources and the protection of public trust uses.

- Climate change and freshwater availability: The ongoing climate crisis is exacerbating statewide drought conditions and the threat of future water shortages. Hawai'i is experiencing hotter and drier conditions. This affects both ground and surface water availability. As water availability decreases, CWRM may be forced to designate new water management areas. In addition, CWRM will have to make hard decisions about how to allocate limited water resources in accordance with the Water Code and public trust, which prioritizes water for Hawaiian Home Lands, the exercise of traditional and customary rights, domestic use and drinking water, and water left in its natural state, above other uses, and require the protection of appurtenant water rights. This balancing act of protection and maximizing reasonable and beneficial use will become more challenging in the face of climate change and declining water supply. More funding for hydrologic research and data collection to better understand resource availability and Hawai'i's complex hydrogeology, along with more staff to address water-related disputes before they arise, is a major part of the solution.
- Watershed and forest protection: CWRM's Water Resource Protection Plan (WRPP) prioritizes protection of forested watersheds necessary to protect and sustain ground and surface water resources statewide. The State's ongoing Watershed Initiative has attracted millions in State and non-State funding to ensure the protection and management of Hawai'i's priority watersheds. Currently over 21% of Hawai'i's priority watershed forests are protected, but thousands of more acres are still threatened by invasive plants and non-native hooved animals. CWRM relies on other partners including the Division of Forestry and Wildlife (DOFAW), Watershed Partnerships, and Invasive Species Committees to implement actions needed to protect Hawai'i's remaining native forests. There is no dedicated source of funding for watershed protection and many organizations that assist the State rely exclusively on grants provided by the State and other private, county and federal agencies. Watershed and forest protection remains a priority for CWRM and is vital to sustain water resources used for drinking, traditional and customary practices, and the enforcement of instream flow standards.

Despite these challenges, available resources have enabled CWRM to achieve the following results:

Planning

- In 2021, CWRM began the process of updating the Hawai'i Water Plan (HWP)

Framework. The Framework helps guide the content and process for updating the five (5) components of the HWP. It has been 25 years since the Framework was last updated. During that time, various components of the HWP have been drafted and amended. However, questions remain about the utility of these plans and if they provide sufficient guidance for the proper protection, conservation and management of Hawai'i's fresh water. The updated Framework will provide a new lens by which other agencies and organizations can understand and execute water resource management and planning. Specifically, it aims to build on the unique cultural foundations and values of Native Hawaiians and ensure a more coordinated approach between the various water management agencies. Once completed, the updated Framework will be used for future updates of the HWP and possible funding requests by preparing agencies. The updated Framework will be finalized in 2025.

- Cooperated with USGS in a study to assess groundwater recharge for future climate conditions for the Hawaiian islands of Kaua'i, O'ahu, Molokai, Lana'i, Maui, and Hawai'i. Data from this study is currently being analyzed and will inform revisions to aquifer Sustainable Yields statewide, with a priority on the Lahaina Aquifer Sector.
- Continued the implementation of the Water Audit Program. A total of 75 water audits were performed this year using version 5.0 of the American Water Works Association (AWWA) Reporting Software.
- Continued participation in Red Hill working groups and the development of an action plan to address near and long-term recovery and remediation of the aquifer.
- Continued working partnerships with the DLNR Aha Moku Advisory Council, DLNR Division of Aquatic Resources, DLNR Division of Forestry and Management, Hawai'i Department of Health, Hawai'i Land Use Commission, Hawai'i Department of Agriculture, Department of Hawaiian Home Lands, the University of Hawai'i and other stakeholder agencies.
- Have begun monthly check-in meetings with the various county departments of water supply to ensure regular communication and coordinated action on a variety of water-related projects.

Ground Water Regulation

- Requested and obtained four (4) positions to support additional permitting and monitoring efforts related to the Red Hill Bulk Fuel Storage Facility aquifer contamination. Commission staff is currently working on filling these positions.
- Processes approximately 125 well construction and/or permit applications annually. The primary purpose of review of these applications is to ensure that development on these wells does not have adverse impacts on public trust uses, other ground and surface water users, and the resource as a whole. Another purpose of the review is the protection of the environment by ensuring construction does not create a conduit for contamination. A third purpose of the review is to coordinate and facilitate reviews by various state and county agencies, for compliance with their applicable laws and rules. Finally, a fourth component of the review informs the applicants of nearby sources of contamination.
- Processes approximately 10 water use permits every year. However, the permits are resource intensive because they require evaluation of reasonable and beneficial use, compliance with other agency policies, a *Ka Pa'akai* analysis, an assessment of

alternatives, and other resource impact assessments. These permits also require approval by the full commission.

- Within the past few years, Ground Water Regulation Branch has played a key role in addressing the Red Hill Bulk Fuel Storage Facility releases and responses. Approximately 15 monitor well permits are submitted by the Navy and Board of Water Supply annually. The Deputy Director and Ground Water Regulation Branch Manager have been designated as panelists on the Fuel Tank Advisory Committee, which convenes semi-annually. Staff has also participated in coordination meetings with the Department of Health and the Environmental Protection Agency Region 9, to address compliance with the Administrative Order on Consent. Staff assesses the shifting in pumpage by both the Navy and the Board of Water Supply out to areas away from the fuel releases.
- Staff continues to address disputes between applicants and objectors via Contested Case Hearings (CCH). Ground Water Regulation Branch has a pending CCH for the Ota well in Keauhou.

Stream Protection and Management

- Commission staff is currently working with DLNR's Personnel Office on converting and establishing Water Resource Specialist positions which are more aligned with prospective job duties to fill the four (4) existing Aquatic Biologist positions allotted to the Commission.
- Entered into a Joint Funding Agreement with USGS for Statewide Hydrologic Data Collection and Monitoring, reducing the number of managed streamflow stations from 46 to 44, and upgrading two low-flow stations to real-time stations.
- Following designation of the Lahaina Aquifer Sector Area as both a Surface Water and Ground Water Management Area, the Commission has received, to date, a total of 92 surface water use permit applications for existing and new uses. Commission staff are continuing to review applications for completeness and acceptance, performing initial analyses for requested water use amounts, conducting site visits with applicants, and preparing timelines for decision-making by the Commission.
- The Commission approved a Stipulation and Agreement between Parties in the 2017 Waimea Watershed Agreement, effectively removing Kaua'i Island Utility Cooperative from the Agreement and tasking Kekaha Agriculture Association with implementing diversion modifications on the Kōke'e Ditch System in compliance with the interim instream flow standards on the Waiakōali, Kawaikōi, Kauaikinanā, and Kōke'e Streams.
- Commission staff, in coordination with the Department's Division of Aquatic Resources, conducted numerous biological surveys on approximately 35 streams statewide in support of monitoring and reassessments of established interim instream flow standards.

Survey

- On average, Survey Branch is developing one deep monitor well every two years. Rapidly changing climate conditions and increased development of production wells and the resulting impacts of the aquifer present the accelerated challenge of resource impacts. Received \$4M CIP funding for construction of two new deep monitor wells.

- Increased water use reporting compliance statewide from 27% in 2008 to 54% in 2024.
- Survey Branch geologists act as Subject Matter Experts (SME) in various roles such as with the Red Hill task force.
- Survey Branch has increased data collection through cooperative agreements with various stakeholders, including the Honolulu Board of Water Supply, and the USGS.

Future activities and expected outcomes include:

Planning

- Complete and release the Framework Update for the Hawai'i Water Plan.
- Continue the implementation of the Water Audit Program, established under Act 169, Session Laws of Hawai'i 2016 and help public water systems implement recommended repairs and improvements.
- Enhance our understanding on how climate change will impact water resources in the future.
- Investigate conversion of abandoned wells into monitoring and/or index wells to expand current network of ground water monitoring statewide and seal priority abandoned wells that could potentially threaten aquifers.
- Investigate opportunities to cost-share with the counties and other agencies on hydrologic studies and water resource monitoring needs.
- Improve our communication and outreach to native Hawaiian traditional and customary practitioners who may be impacted by CWRM permitting activities; including Ka Pa'akai analysis.
- Initiate water shortage planning for other areas of the State.
- Finalize a Pilot Adaptive Management Plan for Kaloko-Honokōhau National Historical Park as part of an effort to formalize a methodology for the adaptive management of groundwater withdrawals and impacts to groundwater dependent ecosystems.
- Update sustainable yield numbers based on new recharge estimates from the U.S. Geological Survey and update the Water Resources Protection Plan (WRPP) accordingly.
- Secure more federal funding through Congressionally Directed Spending and apply for more federal and non-federal competitive grants.
- Conduct statewide study for water reuse and assess the use of reclaimed water for uses other than drinking and potable water needs in State and county facilities.

Ground Water Regulation

- Implementation of the process to bring users into compliance in the Lahaina Ground Water Management Area.
- Facilitate the resolution of outstanding water use permit applications from Molokai Properties Limited and the Maui Department of Water Supply in Kualapu'u on Molokai.
- Refine the adaptive management plan for Keauhou, Hawai'i.
- Update of the Well Standards to reflect current management strategies.
- Resolution of water use permit issues pertaining to the Navy's shifting of pumpage for sources that supply the Joint Pearl Harbor-Hickam water system.

- Stream Protection and Management
- Continue review of all submitted West Maui surface water use permit applications and initiate assessment of requested water use amounts and appurtenant rights.
- Continue assessment and development of instream flow standards for up to nine (9) surface water hydrologic units in southeast Kaua'i following the completion of a USGS Low-Flow Characteristics Study for Southeast Kaua'i in 2021.
- Continue to conduct field investigations in verifying active use of registered and permitted surface water diversions in support of developing instream flow standards.
- Continue to work with stakeholders through implementation issues associated with the 2017 Mediation Agreement for the Waimea Watershed Area, Kaua'i.
- Continue to work with stakeholders in assessing the Commission's Order to the Honolulu Board of Water Supply to bulkhead the Ha'ikū Tunnel in support of establishing a measurable interim IFS.
- Completion of the USGS Cooperative Study to Estimate Low-Flow Characteristics for Streams in Hawai'i (StreamStats).

Survey

- Drill at least one monitor well a year, which will help assess areas where hydrologic conditions are at risk of degradation due to overpumpage or climate change.
- Increase data collection through collaboration with stakeholders and improving compliance with reporting requirements.

Continue to provide expertise as subject matter experts on hydrogeology for various purposes and convene a multi-agency subject matter expert group to address Commission related groundwater issues.

Division of Conservation and Resources Enforcement (DOCARE) -- LNR405

There is an ongoing perception of some of Hawaii's resource users that Hawaii's unique natural resources are unlimited and can withstand unregulated pressure. This demonstrates the need for more enforcement to ensure sustainability.

Significant population increases and the creation and/or expansion of resource areas such as the Holomua Initiative plan, and the establishment of Marine Protected Areas such as the Community Based Subsistence Fishing Areas in Haena, Kauai and Milolii in Hawaii County are also emergent factors. Both these kinds of initiatives come with the need to promulgate additional regulations to protect the State's marine resources in these areas, thus increasing the need for conservation related enforcement and education.

The Department's conservation and resources enforcement program's budget and manpower levels have not kept pace with the increasing population, program expansion and increased areas of responsibility. The 2008-2009 recession caused DOCARE's operational general fund budget to be slashed by nearly fifty percent. While DOCARE's operational general funds has increased since, it has not fully recovered to pre-2008/2009 level of funding. This coupled with the recent filling of 42 Conservation and Resources Enforcement Officer positions that were previously vacant has caused additional stress on the DOCARE budget by increasing costs of equipment, infrastructure,

vehicle costs such as purchase of vehicles, and vehicle fuel and maintenance.

The past several years found DOCARE working greatly in their capacity as State law enforcement officers used in non-traditional law and order roles versus natural resources protectors. This includes law enforcement operations in support of the Thirty Meter Telescope construction project in 2015 and 2019, traffic and roadblock operations in support of the 2018 catastrophic flooding on Kauai, the 2018 eruption of Kilauea volcano in Hawaii County, the 2020-2021 enforcement of the Governor and County Mayor's COVID-19 emergency rules and orders, the 2022 Mauna Loa eruption in Hawaii County, the 2023 Maui Wildfires, and recent operations in Waianae. DOCARE's support of these operations adversely affected DOCARE's budget significantly due to the need to pay contractually obligated overtime and other cost differentials. It also displaced operational focus from natural resources and environmental protection to public safety.

On a more routine basis, DOCARE is realizing a greater reliance and a philosophical shift by the County Police Departments for DOCARE to deal with crime and calls for service within DLNR lands and facilities where traditionally and in the past, the County Police Departments have previously responded. This includes lands and facilities owned or managed by the State including State highways, and lands managed by other State agencies. This shift has required DOCARE to engage in more traditional police responses to issues such as crimes against people and property, instead of natural resource protection. Due to this, DOCARE has experienced increased overtime to address crime within DLNR facilities such as small boat harbors.

The on-going homelessness crisis is an additional emergent factor which is a continual operational priority. Due to the constant need for operations to clear homeless individuals from DLNR lands and facilities, and the requirement to ensure compliance with legal guidance such as the storage of unclaimed personal property, DOCARE is obligated to divert attention, resources, and funding to address this on-going and repetitive problem. Recurring funding will be required to sustain DOCARE's law enforcement role dealing with homelessness until an effective long-term social based solution can be created and implemented.

Due to DOCARE's focus on responsiveness and service, the Division has been forced to defer maintenance on its facilities throughout the State. DOCARE's Branch Offices, base yards and evidence holding facilities are in dire need for capital improvements to ensure safe use of these facilities. This includes repaving of parking areas, roof, and window repair due to leaks, building repainting, termite damage repair and mitigation, and other maintenance problems.

Environmental consciousness of our State's unique natural resources continues to rise, resulting in an increasing demand on DOCARE to protect and preserve natural areas, historic sites, culturally sensitive sites, refuges and unencumbered State lands and sanctuaries. User conflicts caused by competing interests have resulted in increased demand for more law enforcement intervention. Native Hawaiian rights and related issues play an increased role in DLNR's effort to manage resource use. More attention must be given to community input and recommendations to foster voluntary compliance.

Recent DOCARE staffing levels has made it impossible to provide adequate coverage on a twenty-four-hour basis. Occasionally, some complaints wait 24 hours or longer before an officer can respond to investigate the case. Limited funding for regular and holiday overtime further diminishes DOCARE's ability to respond to resource violations at a time when DOCARE is needed most.

The issues and problems affecting the program require pro-active measures. DOCARE has primarily responded in a reactive manner. This has made it difficult to be everywhere that DOCARE is needed and meet community expectations. This condition has improved, following the graduation of forty-one (41) Conservation and Resources Enforcement Officer recruits from the DOCARE Training Academy in March 2023, who assumed field duties. Continued improvement is anticipated with the twenty-five (25) additional recruits nearing the end of their training in the DOCARE Training Academy.

Division of Boating and Ocean Recreation (DOBOR) -- LNR801

Like many other state departments, DOBOR faces ongoing challenges in recruiting and retaining competent, qualified, and motivated employees. These challenges have significantly hindered DOBOR's ability to meet its statutory mandates. Lahaina Harbor recovery has understandably become DOBOR's primary focus, reflecting the urgent need. However, prioritization of Lahaina has also led to delays in releasing funding for other harbor CIP projects statewide. Our expected outcome is the full rebuild of Lahaina Harbor. DOBOR has worked in collaboration with the US Coast Guard to remove sunken vessels and debris, as well as FEMA to fund a portion of the harbor rebuild. Currently, all vessels and debris have been removed from Lahaina Harbor and the entrance channel, and a number of smaller harbor infrastructure projects have been completed or begun work.

State Historic Preservation Division (SHPD)—LNR802

Post-wildfire recovery has resulted in an increase in projects that are required to comply with Section 106 of the National Historic Preservation Act and Hawaii Revised Statutes, Section 6E. Though this has impacted our ability to meet and maintain our goals, we have prioritized recovery projects to complete recovery project reviews and have consistently been able to complete said reviews within a manner of days or weeks—depending on their degree of complexity and the historic or cultural sensitivity of the project area. On average, new projects received are reviewed within the legally mandated timeframes, however, SHPD continues to work on reducing the backlog of reviews. We are also working with local, state, and federal agencies to streamline their compliance requirements under NHPA Section 106 and HRS Section 6E by developing agreement documents and program alternatives.

Fee revenue has still not recovered to pre-pandemic level despite increased economic activity and infrastructure investment, resulting in an increase in projects submitted for review. The reduction in fee revenue contributes to SHPD's continued problems in meeting its essential operating expenses. The fees that are collected are not sufficient for the work required to process a submittal. Therefore, SHPD has set a goal to reevaluate our fee schedule and better reflect the work required to process insufficient and incomplete projects and reports. Under the existing level of resources, SHPD continues to work at meeting the following performance measures:

1. The number of nominations made to the Hawaii State Register of Historic Places continues to range from 20-40 per year. However, the number of nominations made to the National Register of Historic Places has decreased because of increased scrutiny and program requirements mandated by the National Park Service. However, we are working with authors of nominations to provide assistance and training to meet federal program requirements so that SHPD can meet our goal of listing 2-5 properties within the National Register of Historic Places per year.
2. SHPD continues to upgrade the Hawaii Cultural Resources Information System, SHPD's submission portal & digital document management system to improve its functionality for staff and to make it more user friendly for external users.
3. This past year SHPD set and fulfilled our goal to work with the City and County of Honolulu to successfully complete their Certified Local Government application with the National Park Service. This means that Hawaii is the first state to have 100% local government participation in the Certified Local Government (CLG) program. Going forward, our goal for the CLG program will be to work with our CLGs and utilize the federal Historic Preservation Fund (HPF) grant program to award at least one HPF grant to a CLG each year going forward.
4. Despite the sunset of the State Historic Preservation Tax Credit in December 2024, we continue to reach out to potentially eligible project proponents to utilize the Federal Historic Preservation Tax Credit. We anticipate that the Hocking Building, which is projected to receive up to \$3.6 million in federal historic preservation tax credits, will be completed and placed into service by the end of this calendar year or the beginning of next calendar year. SHPD has set a goal to complete at least two to three federal historic preservation tax credit projects every year going forward.

Division of State Parks (State Parks) – LNR806

The Division of State Park (DSP) continues to establish a sustainable base budget for quality-based operations and meet increasing costs associated with payroll and contractual obligations derived from the Division's funding.

To accomplish this, DSP is focusing on several critical objectives:

- Maintain and improve public safety and park management through the continuation of service and infrastructure/resource modification, repair, and construction. DSP's implementation of the Preferred Contractor Contract (PCC) Program is in its second year to address the backlog of repair and maintenance projects statewide.
- Prevent the loss of historic and natural resources through management actions and increasing public and private partnerships for enhanced management.
- Continue revenue production through parking, entry, camping and lodging fees at designated park units consistent with cost recovery practices for state parks nationwide, to offset increased cost and respond to deferred maintenance and lack of staffing capacity. An increase in the State Parks special fund ceiling is required to implement this.

- Continue with capital projects to stabilize deterioration of infrastructure for safety and to sustain park unit assets.

In addition, goals for DSP for the coming years are:

- To implement a preferred contractor procurement process to streamline repair and maintenance (R&M) and an asset management to be proactive on R&M.
- To initiate implementation of certain elements of the Kealakekua Master Plan.
- To complete the reorganization of the Interpretive Program to upgrade the 11 new vacant Interpretive Technician positions into Interpretive Specialists to improve recruitment and retention of staff.
- To start Master Planning for Sand Island State Recreation Area.

LNR - Natural Physical Environment (Admin) -- LNR906

With the current stiff competition in the workforce, filling vacant positions have become a challenge. There is a need for additional manpower in the Administrative Services Office to efficiently fulfill its responsibilities. This is essential to keep up with the increased workload brought about by the significant increase in new program deliverables and additional compliance requirements in accounting for federal funds and reporting requirements mandated by State and Federal. Additionally, the Human Resources Office seeks additional staff to increase capacity in the Human Resources/Labor Relations and EEO Staff, for the purpose of providing timely and comprehensive advisement to the Department in matters involving employer/employee relations, equal employment opportunity, and reasonable accommodations.

Aha Moku Advisory Committee -- LNR907

Over the past 10 years, the generational and lineal descendants of each moku and ahupua'a have surfaced to take kuleana or responsibility for the sustainability and perpetuation of their distinct cultural practices. These practices are handed down from generation to generation and were not shared until recently.

- Aha Moku is committed to the support of the State's Constitution and to the collaboration of sharing their generational knowledge of natural resources with DLNR as well as with the different counties of Hawaii. There is a strong support for the Divisions within DLNR who focus on the protection of natural and cultural resources.
- The emerging trends of each island follow the same mandate which is to work with and share generational knowledge with the different divisions of DLNR. While this has been difficult in the past, we are taking steps in the right direction.

Mauna Kea Stewardship & Oversight Authority -- LNR909

Current Statewide conditions resulting from Maui disaster have significantly reduced FY25 available appropriations, thereby moving certain projects into FY26. Currently, MKSOA is in a transition period and are undertaking the consultant selection process for the Management Plan required under Act 255, SLH 2022. MKSOA is also in the process of selecting an engineering consultant for construction of the MKSOA permanent office on Hawai'i Island. During the

transition period, MKSOA is co-managing operations on Mauna Kea with UH Hilo Center for Maunakea Stewardship (CMS).

C. Federal Funds: Identify programs that have lost or are at risk of losing federal grants and provide the following:

- **Federal Award Title:**
- **CFDA Number:**
- **Discuss the impact to the public and your planned response, including efforts to supplant any federal fund reductions for the current year (FY24) and upcoming fiscal year (FY25) with other funds.**

Land Management Division -- LNR101

Land Division (LAND)

Not Applicable.

Office of Conservation and Coastal Lands (OCCL)

None

Climate Change Mitigation and Adaptation Commission (CCMAC)

Current funding will not be lost but additional federal funding is unlikely under new federal leadership.

Bureau of Conveyances (BOC) - - LNR111

Not applicable

Division of Aquatic Resources (DAR) -- LNR401

None

Division of Forestry and Wildlife (DOFAW) -- LNR 102, LNR 172, LNR 402, LNR 407, LNR 804

None

Engineering Division (ENG) -- LNR141, LNR810

None

Commission on Water Resource Management (CWRM) - LNR404

Not applicable. Note: CWRM's limited base budget typically prevents the agency from applying for federal grants that require matching funds. However, CWRM continues to explore federal funding opportunities which allow for in-kind services as the non-federal cost-share and apply for cost-share waivers for projects that serve disadvantaged communities.

Division of Conservation and Resources Enforcement (DOCARE) -- LNR405

Not Applicable

Division of Boating and Ocean Recreation (DOBOR) -- LNR801

None

State Historic Preservation Division (SHPD) -- LNR802

None

Division of State Parks (State Parks) -- LNR 806

Due to the new Presidential Administration Policies, the Division of State Parks may be at risk of losing Federal grant funds with the National Park Service.

- **Federal Award Title:** Land and Water Conservation Fund
- **CFDA Number:** 15.916
- **Discuss the impact to the public and your planned response, including efforts to supplant any federal fund reductions for the current year (FY24) and upcoming fiscal year (FY25) with other funds:**

FY25: State Parks currently has grant requests of \$3,000,000 pending award in September 2025.
FY26-27: State and County government grants of \$3,200,000 each Fiscal Year would normally be available and could potentially be at risk with the new Administration policies.

LNR-Natural Physical Environment (Admin) -- LNR906

None

Kaho'olawe Island Reserve Commission (KIRC) -- LNR908

None

Mauna Kea Stewardship & Oversight Authority -- LNR909

None

D. Non-General Funds: Provide a web link (url) of the reports to the Legislature on non-general funds under your department pursuant to HRS 37-47.

<https://files.hawaii.gov/dlnr/reports-to-the-legislature/2025/ASO25-Non-General-Funds-Report-FY24.pdf>

E. Budget Requests: Explain the process used to develop the agency's budget and prioritize requests for budget changes.

DLNR prioritizes projects and programs based on public safety, compliance, and public trust resource protection. Implementation of the Sustainable Hawai'i Initiative is the core focus for DLNR's forest, marine and invasive species work, as well as DLNR support for local food production and renewable energy.

DLNR's budget priorities are specifically based upon 1) having sufficient capacity and resources to fulfill its statutory mission, 2) retaining vacant positions to ensure the ability to timely solicit and hire necessary staff, 3) increasing the various DLNR divisions ceiling to expend revenue generated by the division with the goal of self-sustaining operations and increasing capacity, and 4) increasing various DLNR divisions budget to position to meet the state matching funds for available federal funding.

Under that framework, each DLNR division undergoes its own budget review and prioritization in accordance with statutory mandates that guide its vision, mission, goals, and objectives to manage resources for the benefit of the public and to protect the resources and the public. Implementation plans are also established which outline short-term benchmarks and deliverables towards long-term targets.

These results are combined into an overall DLNR budget review and prioritization. The programs consider the major initiatives in progress and planned for upcoming budget cycles and prepare requests for operational and capital funding to support the initiation and/or sustenance of those initiatives and core programs.

Requests are prioritized by considering the scope of potential impacts in serving the citizens of the State of Hawai'i and what potential risks and delays may result in not receiving funds by certain time periods and what alternatives are available.

For revenue generating divisions, management teams review expected revenues and needs to establish a sustainable base budget for operations. They assess needs for special fund ceiling increase requests. Priorities are established to meet minimum standards of operation, including salaries and the fringe benefit assessment, IT system and hardware maintenance and replacement, and preservation of records expenses.

F. Identify and discuss significant adjustments contained in the budget request submitted to the Legislature. Explain and quantify how significant requests for additional funds are expected to affect outcomes.

Land Management Division -- LNR101

Land Division (LAND):

No change on the operating budget. For CIP, the division is asking for an appropriation out of its own special fund (i.e., B funds from the Special Land and Development Fund) to fund the following projects:

- Cesspool Closures in Accordance with EPA Consent Order, Statewide – MOF B, \$1,500,000
This is a health and safety issue and mandated project by the U.S. Environmental Protection Agency (EPA) to identify and close all large capacity cesspools (LCC) Statewide per the Consent Agreement and Final Order (CA/FO). Funding will be used to close the cesspools in accordance applicable environmental regulations.

- Shangri La Breakwater removal, Oahu - MOF B, \$700,000.
Planning and permitting funds for the removal of the State-owned breakwater fronting Shangri La museum. It is a health and safety issue to reduce liability and risk of catastrophic injuries which occurred from people engaging in high-risk behavior by jumping into shallow water despite the presence of signs and a fence to deter these activities.
- Lower Kapahi Reservoir removal, Kauai – MOF B, \$500,000.
Planning and permitting funds for the removal of the Lower Kapahi reservoir which is a health and safety issue to breach the reservoir and prevent impounding water to comply with State dam safety regulations.
- East Kapolei Transit Oriented Development project, Oahu - MOF B, \$500,000.
Planning funds for the development of the Department’s East Kapolei parcels to address multiple public priorities including housing, long term jobs and economic development, as well as much needed revenue.

Office of Conservation and Coastal Lands (OCCL)

No significant adjustments requested in the FB 25-27 Biennium Budget

Climate Change Mitigation and Adaptation Commission (CCMAC)

Add two (2) positions and funds for Climate Commission Staff - Administrative Assistant V, and Program Specialist IV to address climate emergency (\$70,000/\$140,000; MOF A)

Currently staffing of CCMAC is insufficient to meet the mandates of CCMAC outlined 225p-3. These additional positions will increase capacity of CCMAC and allow us to meet these mandates. For example, establishing climate change mitigation and adaptation strategies and goals to help guide planning and implementation statewide using the latest scientific analysis and risk assessment to monitor and forecast climate change related impacts at the regional, state, and local level, including any additional information deemed necessary; identify vulnerable people, communities, industries, ecosystems, and the potential economic ramifications for climate change related impacts; make recommendations for how to meet or exceed Hawaii's state mitigation goals. By adding this capacity, CCMAC will be able to better position the State to provide guidance to State and County agencies on how to protect lives and livelihoods that are already being impacted by climate change.

Bureau of Conveyances (BOC) – LNR111

- Deletion of three (3) long term vacant positions one (1.00) permanent position #47355 and two (2) temporary positions #118994 and #120981 (\$-156,948/\$-156,948; MOF B)

Division of Aquatic Resources (DAR) -- LNR401

Operating Budget Request

- Transfer out Position #118784, Accountant IV from LNR401 to LNR906 (\$-116,466/\$-116,466; MOF P)

Given the significant amount of federal grants received and administered by the DLNR and to address the desire of the Department to institute a standardized accounting process, we deem it necessary to request the transfer of the above positions under the direct supervision of DLNR's Administrative Services Office (ASO). By doing this, we believe ASO will be in the best position to provide the most thorough fiscal oversight and supervision available as well as ensure that the implementation of policies and procedures is done in a transparent, timely and effective manner and in accordance with state and federal guidelines. This will afford the Department improved efficiency resulting in the better use of its time and resources.

- Federal Fund Ceiling Adjustment (\$-300,500/\$-275,500; MOF N)

The award amount for each grant varies from year to year. The decreasing adjustment to our federal fund ceiling is to match anticipated federal grant awards expected for FY 2026 and FY 2027.

- Federal Fund Ceiling Adjustment (\$-11,592,866/\$-23,846,866; MOF P)

The award amount for each grant varies from year to year. The decreasing adjustment to our federal fund ceiling is to match anticipated federal grant awards expected for FY 2026 and FY 2027.

- Special fund ceiling increase for fringe benefit adjustment (\$2,314/\$2,314; MOF B)

Special fund ceiling increase in needed to cover the increase in fringe benefits due to a higher base pay for positions.

CIP Request

- CIP request for Wahiawa Fishing Access Improvements, Oahu. (\$400,000, C)

The CIP request for Wahiawa Fishing Access Improvements is to provide safe fishing access areas for the Wahiawa freshwater fishery.

Division of Forestry and Wildlife (DOFAW) -- LNR 102, LNR 172, LNR 402, LNR 407, LNR 804

LNR 102

- Special fund ceiling increase for fringe benefit adjustment (\$2,240/\$2,240; MOF B)

Special fund ceiling increase in needed to cover the increase in fringe benefits due to a higher base pay for positions.

LNR 172

- Federal Fund Ceiling Adjustment (\$950,000/\$4,380,000; MOF P)

The award amount for each grant varies from year to year. The adjustment to our federal fund ceiling is to match anticipated federal grant awards expected for FY 2026 and FY 2027.

- Forest/Resource Management: Improved forest and resource management for climate and fire-resilient terrestrial landscapes, native species habitat, and support for endangered

species, including critically endangered forest birds (\$5,000,000/\$5,000,000; MOF A)

With catastrophic climatic events on the rise, the ability of Hawai'i's terrestrial landscape to withstand the impacts of severe weather is highly relevant for the safety and well-being of our communities and our economy. Much of the Forest Reserve System (approximately 700,000 acres) suffers from decades of wildland fire, deferred maintenance, and lack of consistent program investment, leaving much of the land vulnerable to further degradation. Without intervention, the lands are on a trajectory that will result in more acres of fire-prone invasive grasses, shrubs, and non-native trees as the dominant components of the landscape. Persistent and aggressive invasive species (guinea grass, fountain grass, haole koa) will expand into new areas, heightening the potential for fire and erosion and hasten the loss of culturally and globally significant species. Restoring areas to conditions more representative of the resilient Hawaiian forest is imperative. Visitors come to Hawai'i to experience its unique biodiversity. Hawaiian culture is inextricably linked to plants found in our forests. Funding to restore our resilient landscapes pays dividends in terms of water, climate, and biological security. Reversing the current trajectory of invasive grass, shrub, and tree expansion requires stable and sizable investment in activities that include, among other things, funding for the state tree nurseries, personnel, and new resources for associated planting and fencing. Beyond community health, safety, and biodiversity implications, the State of Hawai'i's commitment to uphold the Paris Climate Accord and move towards carbon neutrality by 2045. This requires actions that mitigate greenhouse gases, which forest restoration does. Consistent and appropriate levels of funding for the management of state public Forest Reserves are essential for the future of the community and the economy. The Forest Management Program needs reliable funding to manage in a way that sustains ecosystem services and forest products and protects recreation and cultural plant/biological values.

LNR 402

- Federal Fund Ceiling Adjustment (\$823,171/\$823,171; MOF N)

The award amount for each grant varies from year to year. The increasing adjustment to our federal fund ceiling is to match anticipated federal grant awards expected for FY 2026 and FY 2027.

- Federal Fund Ceiling Adjustment (\$-5,855,806/\$-7,544,254; MOF P)

The award amount for each grant varies from year to year. The decreasing adjustment to our federal fund ceiling is to match anticipated federal grant awards expected for FY 2026 and FY 2027.

- Request for continuous funding for twenty-two (22) positions currently funded by the Major Disaster Fund (MDF) for fire and emergency response Statewide. (\$1,425,696/\$1,425,696; MOF A)

DOFAW is the primary responder for wildland fires occurring across one million acres of

forested watershed (twenty-five percent of the land area in the state) and co-responds with federal and county agencies for an additional thirty percent. Increased staffing is needed to increase capacity for the Division to manage resilient forest landscapes to prevent fires from occurring or mitigate their impact; restore areas damaged after fires occur; reverse decades of degradation from fire and ungulates; plan and manage grants statewide for fire prevention; utilize heavy equipment to install and maintain firebreaks, manage fuel loa wildfires; and support a fuels management crew on Maui.

- Add recurring funds to the Hawaii Invasive Species Council for expanded work on priority pests and maintaining emergency response capacity for new pest incursions. (\$4,250,000/\$4,250,000; MOF A)

Funding for the Hawaii Invasive Species Council. The Hawaii Invasive Species Council (HISC) is an inter-departmental collaboration comprised of the Departments of Land & Natural Resources (Department), Agriculture, Health, Transportation, Business, Economic Development & Tourism, and the University of Hawaii. The HISC was established in 2003 for the particular purpose of providing policy-level direction, coordination, and planning among state departments, federal agencies, and international and local initiatives for the control and eradication of harmful invasive species infestations throughout the State and for preventing the introduction of other invasive species that may be potentially harmful. The HISC fulfills its mandate by issuing resolutions, providing plans, and strategically disbursing funds to enhance invasive species prevention, control, outreach, and research. The Department administers the HISC and supports multiple inter-agency projects and programs that focus on preventing and managing high-risk invasive plants and pests. This request would increase capacity for on-the-ground response efforts to high-impact pests like little fire ants, coqui frogs, and coconut rhinoceros beetles that continue to spread throughout the state, threatening the environment, economy, and communities. Much of this work is being conducted by island-based programs like the invasive species committees, and additional funding would assist in establishing species-specific response teams on each island. Additional funding would also support research projects at the University of Hawaii and other research institutions to develop new invasive species detection, prevention, and management tools and technology. With adequate funding, Maui has drastically reduced a little fire ant infestation encompassing 142 acres to almost eradicated, utilizing innovative new control tools and techniques. Incursions for partner agencies.

- Add funds to support statewide invasive ant research and control to be carried out by the Hawaii Ant Lab (\$500,000/\$500,000 A)

Funding for the Hawaii Ant Lab would be supported through the Hawaii Invasive Species Council. The Hawaii Invasive Species Council (HISC) is an inter-departmental collaboration comprised of the Departments of Land & Natural Resources (Department), Agriculture, Health, Transportation, Business, Economic Development & Tourism, and the University of Hawaii. The HISC was established in 2003 for the particular purpose of providing policy-level direction, coordination, and planning among state departments, federal agencies, and international and local initiatives for the control and eradication of harmful invasive species infestations throughout the State and for preventing the introduction of other invasive

species that may be potentially harmful. The HISC fulfills its mandate by issuing resolutions, providing plans, and strategically disbursing funds to enhance invasive species prevention, control, outreach, and research. The Department administers the HISC and supports multiple inter-agency projects and programs to prevent and manage high-risk invasive plants and pests. The Hawaii Ant Lab is the only organization dedicated solely to managing and eradicating invasive ants in Hawaii, including little fire ants. As of fiscal year 2024, the Hawaii Ant Lab has no stable, long-term funding. Funding for the program is provided on a year-to-year basis through the application of competitive grants and other opportunities. The 2023 Legislative Session was the first year the Hawaii Ant Lab received an exclusive appropriation to support its program.

- Change MOF for Position #122002, Planner V, SR 24 (\$116,466/\$116,466; from MOF P to N)

The Planner V position is a conservation coordinator position. This person would be tasked with (1) coordinating multiple state, federal, and county agencies that each regulate actions that affect wetlands and other sensitive ecosystems and (2) working with private landowners and coordinating funding sources for land acquisition projects. In 2002, the United States Supreme Court (in *Sacket v. EPA*) limited the scope of wetland protection under the Clean Water Act. Because of this ruling, the Environmental Protection Agency (EPA) changed the definition of wetlands, and many states are finding that there are wetlands that are not protected from dredge and fill and point source pollution actions. This planner position is also vital to coordinate wetland regulatory efforts and help solve the gap created by the US Supreme Court's ruling. Several federal funding opportunities help fund wetland land acquisition projects, including conservation and restoration efforts on wetlands. This Planner position would help protect wetlands and other sensitive ecosystems across the state by helping to coordinate funding sources for both private and state land projects. There is available grant funding for the MOF change per the Program Manager.

- Deletion of long-term vacant position, .50 FTE (\$-23,502/\$-23,502; MOF A)

The position is currently on internal recruitment, and we anticipate that it will be filled by December 31, 2024. This Kauai branch position is responsible for accounts payable and receivable, proper preparation of purchase orders, contract and grant file and database management, and payroll and invoice processing at the branch level. This position assists the Branch Manager and District Program Managers in monitoring fund allocation, cash balances, expenditures, and outstanding encumbrance balances via Datamart. Trains Office Assistant III and other Branch Staff in Datamart query and reconciliation and keeps them informed about policy changes state-wide or Department-wide. Collateral duties include supporting the Hunting Program by selling stamps and licenses to vendors and customers via the Internet. This position also maintains all District Fund Accounts provided by the Administration Office.

- Add funds for the fire pre-suppression, readiness, response, and post-fire restoration and rehabilitation (\$4,000,000 in FY26, MOF A)

DOFAW is the primary responder for wildland fires occurring across one million acres of

forested watershed (over twenty-five percent of the land area in the state) and co-responds with federal and county agencies for an additional thirty percent. Funding supports DOFAW fire and emergency response (overtime, meals contracts), prevention, and pre-suppression activities such as fuel management, post-fire restoration, community wildfire protection, and interrupting the invasive grass/fire cycle.

- Add funds for West Maui Fire Prevention Ukumehame Wetland and Stream, Maui (\$3,000,000 in FY26, MOF A)

This project will restore the Ukumehame wetland and stream corridor in West Maui and establish a green break to prevent wildfire. The green breaks in this fire-prone location will help to prevent the spread of wildfires to adjacent areas where natural resources, property, and public safety may be threatened.

CIP Request

- Pohakea Fire Prevention and Suppression, Maui (FY26 \$1,750,000/FY27 \$1,750,000 C)

This section of West Maui is highly prone to wildfires due to invasive grasses. The department's acquisition of three wells and a 750,000-gallon water tank will enable the branch to replace hazardous fuel loads with green breaks, riparian corridors, and grazing breaks. This request is for the purchase and installation of fencing, an irrigation system, and landscaping. Habitat restoration will reduce the frequency and intensity of fires that impact public safety and reduce erosion that impacts coral reef ecosystems and fisheries.

LNR 407

- Federal Fund Ceiling Adjustment (\$190,000/\$190,000; MOF N) and (\$-\$22,707,357/\$-\$22,707,357; MOF P)

The award amount for each grant varies from year to year. The increasing and/or decreasing adjustment to our federal fund ceiling is to match anticipated federal grant awards expected for FY 2026 and FY 2027.

CIP Request

- Watershed Protection and Initiatives, Statewide (FY26 \$5,000,000/FY27 \$5,000,000, C)

This project will provide long-term protection for forest watersheds by constructing fences and removing non-native pigs, goats, deer, cattle, and sheep. Fence construction will protect high-priority watersheds and restoration areas. Hooved animals are the main threat to these forested watersheds. Native forests are the source of Hawaii's fresh water, reduce erosion and flooding, absorb greenhouse gases, and protect endangered plants and wildlife. Removing hooved animals is also a successful strategy to reduce the spread of Rapid Ohia Death. This project constructs fences to exclude sheep, goats, cattle, and pigs and controls ungulates across approximately 20,000 acres. Fence costs per mile differ between projects due to differences in terrain, type of animal excluded, and remoteness. Fence locations include but are not limited to Kaua'i (Alakai), O'ahu (Ko'olau Forest), East Molokai, Maui

(West Maui Mountains and Northern Haleakala), and Hawaii island (Kau, Napuu, and North Kona). Locations are subject to change.

LNR 804

- Change MOF for unfunded Position #12075 (\$46,897/\$46,897 from MOF A to MOF N)

This position provides skilled technical assistance to Wildlife Biologists through independent performance of specialized technical wildlife and related natural resources management work under general guidance and supervision. It also provides technical services to foresters and/or other professionals from time to time as assigned. Per the S-261 grant Program Manager, there are sufficient funds for the position.

- Deletion of long-term vacant positions (\$-79,872/\$-79,872; MOF A)

Trails and Access Specialist IV, Position #45494 for Hawaii Island, is currently in DHRD recruitment. The Hawaii Branch is under constant call to respond to increasing land development where historic trail issues are a significant concern while also managing and developing public recreational trail opportunities. This position would provide the professional and technical expertise to resolve historic trail issues, perform day-to-day maintenance of existing trails, and perform other trail and access administrative and operational duties to serve the public. This position represents the Division at the monthly Na Ala Hele Advisory Council meetings, and shares trail management issues, development concerns, and recreation use challenges and concerns raised by the community and commercial vendors.

Engineering Division (ENG) -- LNR141, LNR810

LNR141

- CIP: Rockfall and Flood Mitigation, Statewide (FY26 \$2,000,000/FY27 \$2,000,000, C)

This project will address potentially hazardous flooding or rockfall hazards/conditions on State-owned lands or in which State-owned lands may impact homes or property on adjacent parcels. Emergency reserves are also included to allow quick response to rockfall or flood incidents.

LNR810

- Federal Fund Ceiling Adjustment (\$10,034,475/\$672,683; MOF P)

The award amount for each grant varies from year to year. The adjustment to our federal fund ceiling is to match anticipated federal grant awards expected for FY 2026 and FY 2027.

- Add recurring funding for one (1) permanent position and operating funds from Act 134, SLH 2023 into the LNR810 base budget to support the dam and appurtenance improvement and removal grant program. This request includes one (1) Planner V and operating funds (\$110,000/\$110,000; MOF A)

Two permanent positions, a planner, and an accountant, were authorized by Act 134, SLH 2023. Recurring funding for the Planner V position and related expenses is prioritized for the startup phase of the program. A future request will address funding for the Accountant V position.

- Add recurring Special Fund ceiling for the Dam and Appurtenances Improvement or Removal Grant Program Special Fund (S-350) to continue the purposes of Act 134, SLH 2023. (\$5,000,000/\$5,000,000; MOF B)

A recurring Special Fund ceiling is needed to support the dam improvement or removal grant program (Act 134, SLH 2023), providing funds to help private dam owners address deficiencies and reduce flooding risks to downstream communities.

- Special fund ceiling increase for fringe benefit adjustment. (\$1,097/\$1,097; MOF B)

Special fund ceiling increase is needed to cover the increase in fringe benefits due to a higher base pay for positions.

Commission on Water Resource Management (CWRM) -- LNR404 **Operating Budget Request**

- Funding for cooperative joint funding agreements with United States Geological Survey (USGS) to carry out hydrologic data collection, analyses, and investigations. (\$400,000/\$400,000; MOF A)

This expansion of the existing cooperative joint funding agreement with USGS is tied to court orders and responses to water resource management challenges on Maui. Funding will be used to implement a more robust monitoring program for sixteen Maui streams at a cost of \$25,000 per gage. USGS monitoring would be provided for the following Maui streams:

- Central (3): Waihe'e River, Wailuku River, Waikapū Stream
- West (4): Honokōhau Stream, Kahoma Stream, Kaua'ula Stream, Ukumehame Stream
- East (9): Honopou Stream, Niihiihaele Stream, Ka'aiea Stream, Puohokamoa Stream, Honomanū Stream, Kopiliula Stream, Hanawī Stream, Halehaku Stream, Awalau Stream

Three members of CWRM's Stream Protection and Management (SPAM) Branch currently dedicate most of their time to maintaining stream gages in the field. This constitutes one quarter of the currently budgeted 12 positions within SPAM Branch. As a result, SPAM Branch has limited capacity to carry out other critical duties, including analysis of hydrological data, development and implementation of management recommendations, and issuance of water use permits. Stakeholders and community members have expressed the need for effective, timely, and accurate monitoring. Expanding streamflow monitoring and replacing certain CWRM stations with USGS stations would address these concerns.

The total funding requirement for the 2025 USGS cooperative joint funding agreement (JFA) is \$1,277,633, with CWRM funding 80-percent of the JFA at \$1,021,806. The current JFA supports 44 streamflow stations, 6 groundwater stations, and 17 rainfall stations statewide. The JFA accounts for CWRM's single largest expense and consumes approximately two-thirds of CWRM's discretionary funds. USGS gaging costs have continued to rise due to inflation (now \$25,000/gage), while the USGS' budget allocation has remained relatively stagnant.

USGS maintains very high-quality assurance and quality control standards, providing very high-quality, scientifically defensible data. Maintaining such standards can be challenging for the Commission to replicate with limited staffing and infrastructure and takes away from Commission staff's primary duties. Real-time USGS monitoring provides data transparency to the public and unparalleled assurances of compliance with Commission actions. The majority (>90%) of CWRM's monitoring stations are not equipped to report data in real-time, and outfitting stations to have real-time capacity would incur additional costs, both in initial physical improvements and ongoing maintenance. Converting additional, high-priority, monitoring stations to real-time USGS gaging stations will increase transparency and free up limited staff resources to support the development of effective water resource management recommendations.

Maintaining, and even expanding, ground and surface-water monitoring statewide is central to Hawai'i's comprehensive hydrological monitoring network and therefore critical to characterizing the consequences of climate change on water availability, while supporting the regulation and management of Hawai'i's water resources. Stations re-established in locations with previous long-term streamflow monitoring can also be used to help track shifts in water availability or hydrological processes associated over time.

This funding would ensure adequate resources for maintaining a comprehensive monitoring program and free up funding for other CWRM initiatives such as sustainable yield (SY) analyses, instream flow standard development, and planning efforts, which have languished due to limited funding in the past. Without this funding, CWRM will be delayed in the amendment and implementation of instream flow standards in Na Wai Eha, assessment of water availability for long-term water leases in East Maui, and the allocation of surface water to meet public trust water uses in Lahaina.

- Funding for a Central Maui Hydrologic Study to analyze existing groundwater data and assess accuracy of hydrologic boundaries for aquifer systems in Central Maui. (250,000/\$150,000; MOF A)

Sustainable Yields (SYs) establish the availability of groundwater from an aquifer system. Over 90% of the State's drinking water comes from groundwater. SY estimates for aquifers statewide were last updated in 2019 and need to be revised to reflect climate change impacts more accurately on groundwater recharge and groundwater availability.

Current data suggests that groundwater withdrawals from aquifer systems in Central Maui are at 590% (Kahului) and 110% (Paia) of their respective sustainable yields. If the current Aquifer Boundaries were considered accurate, those aquifer system areas would meet one

criterion for designation as ground water management areas. However, water levels and salinity observed do not support the notion that water is over withdrawn.

A more accurate management approach would consider redrawing aquifer boundary lines that match groundwater flow direction, rather than defining aquifer boundaries lateral to groundwater flow.

At present, given the proportion of ground water withdrawals to sustainable yield, it is very difficult to obtain permits to drill/outfit new wells or install larger pumps in existing wells within the Central Maui area.

By assessing the accuracy of the currently drawn hydrologic boundaries for these aquifer systems, the proposed study will increase CWRM's understanding of the availability of ground water in these areas, including ground water recharge and discharge to shoreline ecosystems. This, in turn, will allow CWRM to fill substantial gaps in CWRM's understanding of ground water availability in Central Maui, and would allow better management of ground water resources in Central Maui.

If this request is not approved, CWRM will not be able to adequately manage the central Maui aquifer sector because groundwater data for the hydrologic units in Central Maui, as currently defined, shows that pumpage exceeds the sustainable yield for Kahului and Paia.

CWRM's request for funding for this study contemplates two Phases.

- Funding for hydrologic investigations of existing groundwater data and modelling to revise sustainable yields, with priority given to the Lahaina Aquifer System. (\$200,000/\$200,000; MOF A)

New 2023 estimated recharge data from the U.S. Geological Survey presents an opportunity to not only consider the impacts of climate change on recharge, but also an opportunity to reevaluate CWRM's approach to calculating SYs. The current methodology used by CWRM to estimate SY is simple and has limitations; CWRM would like to explore other, more complex methods to estimate SYs. As such, funding is needed to hire consultants to help CWRM evaluate other methodologies for calculating SYs, such as numerical computer models, and to also conduct public outreach and consultation with a variety of stakeholders.

This funding would prioritize reevaluating SYs in the Lahaina Aquifer Sector. This is a necessary step needed before CWRM can provide recommendations on new and existing Ground Water Use Permit applications in the Lahaina Aquifer Sector.

If this request is not approved, water use permitting may be delayed and could result in the delay in new affordable housing development in Lahaina and potential over-pumping of Lahaina aquifers. This would also create uncertainty in the availability of water in Lahaina and may hinder investment in infrastructure and other related projects.

CWRM's request for funding for this study contemplates two Phases.

- Funding for the Hawai'i Mesonet network of telemetered climate stations in cooperation with the University of Hawai'i Water Resources Research Center to carry out hydrologic data collection, analyses, management, and dissemination (\$350,000/\$350,000; MOF A)

CWRM is an active partner with the University of Hawai'i, Water Resources Research Center (UH-WRRC) who administers the Hawai'i Mesonet Network project. CWRM benefits from the data collected by the Mesonet climate stations, which can be used to inform water management decisions and will assist in determining water availability. CWRM advocates for funding on behalf of the Mesonet project and has received both State (FY25, \$237,500 – a portion will go to Mesonet) and federal funding (FY24 Congressionally Directed Spending \$350,000) to support the expansion of the Mesonet network.

Mesonet's ongoing maintenance costs are approximately \$600,000 annually. Of that \$600,000, 40% or \$240,000 is paid for with federal funds through the National Science Foundation (NSF). CWRM has agreed to pay the remaining \$360,000 through its operating budget, as the data collected by Mesonet climate stations is of high utility to CWRM (as well as other agencies within DLNR and beyond).

CIP Request

- Appropriate \$2,000,000 in general obligation bond funds for the planning, land acquisition, designing and construction of new Deep Monitor Wells (DMWs) statewide.

This funding will construct and/or repair deep monitor wells (DMWs) statewide, with a focus on areas experiencing an increased demand on water resources or are targeted for increased development, to monitor the health of the drinking water aquifers. This project is part of an ongoing effort to monitor aquifer health statewide. Data collected from the DMWs is essential for observing long-term changes in the thickness of the aquifer's freshwater lens, which provides an indicator of drought conditions and expected impacts on groundwater supplies. The current DMW network has limited geographic coverage with only 12 wells statewide and 3 in progress. Additional funding (\$2,000,000 C) is needed to enable CWRM to plan, design, and construct DMWs in aquifers that are or may be threatened by increasing ground water withdrawals.

Division of Conservation and Resources Enforcement (DOCARE) -- LNR405

- Federal fund ceiling adjustment (\$-360,171/\$-360,171; MOF N) and (\$-800,000/\$-800,000; MOF P)

The award amount for each grant varies from year to year. The decreasing adjustment to our federal fund ceiling is to match anticipated federal grant awards expected for FY 2026 and FY 2027.

- Increase Personal Services Funding for CREO I to CREO II Salary Adjustments (\$616,272/\$616,272; MOF A)

This request is pursuant to a labor grievance and if not funded, will create further collective bargaining problems for the Department. In 2021, the Legislature abolished 30 vacant Conservation and Resources Enforcement Officer Positions, then provided 30 Conservation and Resources Enforcement Officer (CREO) I, funded at the SR-16 A level. Conservation and Resources Enforcement Officers have traditionally been reallocated to higher levels within the CREO job series (i.e. CREO II SR-18 and CREO III SR-20) after obtaining the necessary work time and experience. The 30 positions were not funded for reallocation to the higher levels within the CREO job series, which has created a pay disparity with other CREO employees, thus a labor grievance has been filed. Resolution of this grievance and prevention of future labor grievances is dependent on this funding and thus the Department is seeking this request be made a part of the Executive Budget Request. If this request is not granted, it will likely result in further labor grievances and collective bargaining agreement non-compliance.

- Increase other Current Expenditure Funding to Support Increase in Staffing/Enforcement Capacity. (\$500,000/\$500,000; MOF A)

This request is to provide additional operational funding to support the overall increase of costs to support operations. With the additional increase of personnel and equipment, the Division needs additional funding to provide ability to support:

- Increased cost of vehicle fuel, maintenance, oil, and lubricants.
 - Increased information technology costs including mobile phones, computer equipment and accessories, information technology connectivity in DOCARE facilities, wireless data plans for mobile phones and laptop computers.
 - Increased cost of utilities to support DOCARE facilities due to increased use such as electrical, water, telephones and air conditioning and plumbing maintenance.
- Contingent Personal Services Support for Disaster, Emergency Response Operations and Extended Law Enforcement Operations (\$1,500,000/\$1,500,000; MOF A)

The Division is seeking funding to provide for contingency overtime operations to support disaster and emergency response and extended law enforcement operations. Over the past few years, Conservation and Resources Enforcement Officers have frequently been called upon to provide law enforcement services due to their specialized training, skills, and equipment to support disaster response statewide as well as to other extended operations including the Lahaina wildfire, tsunami alerts and hurricanes. Additionally, CREOs continue to participate in extended operations such as the state's response to the increased gun violence in Waianae, Oahu. During these operations, CREOs are considered shift workers under the Collective Bargaining Agreement (CBA) and their work triggers various articles of the CBA which require the Employer to pay for various forms of overtime work, meal payments and differential pay. This funding is essential to ensure the Division can provide law enforcement response and service during emergencies and extended law enforcement operations in their capacity as state law enforcement officers.

- DOCARE Hawaii Branch Office Building Renovation, Hawaii (CIP: \$3,000,000, C)

This funding is being requested for the renovation of the DOCARE Hawaii Branch Office due to severe termite infestation resulting in major damage to the structure, including the interior walls, support beams, doors, and related work.

- DOCARE Maui Branch Office Building Renovation, Maui (CIP: \$800,000, C)

This funding is being requested for the plans and design to replace the DOCARE Maui Branch office building, roofing, windows, doors and associated framing and related work.

Division of Boating and Ocean Recreation (DOBOR) -- LNR801

- DOBOR is focusing its budget request on the rebuild of Lahaina small boat harbor, as well as funding projects that need repair or maintenance. The full rebuild of Lahaina harbor is estimated at \$29 million. This funding would need to be CIP because DOBOR's special fund does not have the revenues to fund such projects.
- Requested to change MOF of three (3) positions instead of deleting them. (231,260/\$231,260 from MOF A to MOF B)

DOBOR's FY26 budget request includes retention of long-term vacant Boating and Ocean Recreation Harbor Agent (BORHA) positions. These positions are essential to regular operation of small boat harbors under DOBOR jurisdiction, as BORHAs manage harbor operations, including processing permits, handling vessel inventories, answering questions from the public, and monitoring facilities. Inability to retain these positions would result in longer delays and processing times, as well as a decreased ability to quickly respond to harbor needs.

- Special fund ceiling increase for fringe benefit adjustment. (\$162.351/\$162,351 MOF B)

Special fund ceiling increase is needed to cover the increase in fringe benefit due to a higher base pay for positions.

State Historic Preservation Division (SHPD) -- LNR802

- Federal fund ceiling adjustment (\$104,767/\$104,767; MOF N)

The State Historic Preservation Division is requesting an operating budget request for FY 25 for a federal Historic Preservation Fund ceiling adjust to anticipate an increase in our federal grant award. This will provide for additional funding to support salaries and fringes.

- SHPD is requesting \$700,000 in CIP funding during FY 26 for our Hilo office to look for and move our staff to a new office location. Our current Hilo office is in bad repair. We have continuously had to invest in mitigating black mold, ants, and repair damage caused by drainage issues and vagrants. Additionally, our current facility does not have enough room to house staff, records, and our collection of cultural and archaeological resources.

Division of State Parks (State Parks) -- LNR806

Operating Budget Request – State Parks Vehicles and Equipment

- Request for ceiling increase for vehicle purchase (\$1,000,000/\$1,000,000; MOF B)
- Request for ceiling increase for equipment purchase (\$1,000,000/\$1,000,000; MOF B)

The Division of State Parks is currently in the third year of a five-year plan to upgrade their fleet as well as purchase additional vehicles for anticipated increase in staffing statewide.

State Parks is also currently assessing the types of equipment needed for fire mitigation as well as routine repair and maintenance of state parks.

Natural Physical Environment (Administration) -- LNR906

- Transfer in Position #118784, Accountant IV from LNR401 to LNR906 (\$116,466/\$116,466; MOF P)

Given the significant amount of federal grants received and administered by the DLNR and to address the desire of the Department to institute a standardized accounting process, we deem it necessary to request the transfer of the above positions under the direct supervision of DLNR's Administrative Services Office (ASO). By doing this, we believe ASO will be in the best position to provide the most thorough fiscal oversight and supervision available as well as ensure that the implementation of policies and procedures is done in a transparent, timely and effective manner and in accordance with state and federal guidelines. This will afford the Department improved efficiency resulting in the better use of its time and resources.

- Position and funds for one (1) Human Resources Specialist V (\$43,188/\$86,376; MOF A)

We are requesting an additional position and funds (FTE 1.00), Human Resources Specialist V, SR-24, BU:13, to increase capacity in the Human Resources/Labor Relations and EEO Staff, for the purpose of providing timely and comprehensive advisement to the Department in matters involving employer/employee relations, equal employment opportunity, and reasonable accommodations. Timely and appropriate action on these matters by the Department is required pursuant to statute, collective bargaining agreements, policies, and procedures, etc., and untimely or inaction by the department will result in its liability and exposure.

- Additional funding to existing, filled positions – Position #2735 and Position #120761 (\$21,372/\$21,372; MOF A)

We are also requesting funds to reallocate existing filled positions in the Classification and Recruitment Staff based on the transition of delegated recruitment activities traditionally performed by the Department of Human Resources Development to this staff due to the issues of delayed recruitment activities. By compensating the Departmental HR staff fairly in comparison to their DHRD counterparts, this will assist with retention and continuity for specialized recruitment services within the Department.

- Additional funding to existing, filled positions – Position #121502, and Position #120761 (\$21,058/\$21,058; MOF B)

We are also requesting funds to reallocate existing filled positions in the Classification and Recruitment Staff based on the transition of delegated recruitment activities traditionally performed by the Department of Human Resources Development to this staff due to the issues of delayed recruitment activities. By compensating the Departmental HR staff fairly in comparison to their DHRD counterparts, this will assist with retention and continuity for specialized recruitment services within the Department.

- Funds for Economic Development Specialist. (\$86,064/\$83,064 MOF A)

The department is requesting funding for FB 25-27 and beyond. Economic Development Specialist leads and coordinates economic development initiative within DLNR, focusing on sustainable practices and conservation efforts that enhance the economic value of DLNR assets (i.e. natural and cultural resources). This position works towards fostering economic opportunities that support environmental conservation, community engagement, and the promotion of Hawaii's natural cultural heritage. The role involves conducting market research, establishing, and maintaining relationships with businesses, partners, and other stakeholders, and coordinating with all DLNR divisions to develop economic opportunities to help sustain DLNR's ongoing operations and support its mission. Without continued funding, DLNR will risk losing out on opportunities to integrate sustainable economic development with its conservation efforts.

- Act 182 Phase III and IV development and implementation of the DLNR Website Consolidation of permits, licenses, and reservations. (\$1,448,167/\$1,455,497; MOF A)

The objective is to continue the phased development toward a consolidated website that simplifies the user experience, enabling visitors, residents, and businesses to quickly search, locate, learn, and book reservations, permits, and outdoor activities. Existing DLNR transaction-based collections provided approximately \$80M in revenue. The biennium request for the Act 182 consolidated website is projected to provide an initial estimated ROI of \$10 for every \$1 spent. The investment also provides the path to modernize the vast array of DLNR technology assets rapidly, reducing the risk to the aging technology base. Based on recent growth, the future of simplified, consolidated user experiences also immediately expands DLNR opportunities for additional cost-effective process improvements, inter-divisional efficiencies, and operational savings.

The FY 26 – 27 funds FY 26 (MOF A, \$1,448,167 and FY 27 \$1,445,497) will utilize the NASPO contract and professional services and will be directed as follows: Continue the transition of selected legacy services to modernized technology platforms, with a specific focus on State Parks, Forestry, Aquatic Resources, and Conservation and Resources Enforcement. . Annual Software as a Service fees for the technology solutions, and website annual maintenance, hosting, and support. As identified in Act 182, the intent is to continue the attainable goals that benefit residents, visitors, and commercial operators. The investment also provides the path to modernize the vast array of DLNR technology assets rapidly, reducing the risk to the

aging technology base. Based on recent growth, the future of simplified, consolidated user experiences also immediately expands DLNR opportunities for additional cost-effective process improvements, inter-divisional efficiencies, and operational savings.

- Special fund ceiling increase for fringe benefit adjustment. (\$150,076/\$150,076 MOF B)

Special fund ceiling increase is needed to cover the increase in fringe benefit due to a higher base pay for positions.

Kaho'olawe Island Reserve Commission (KIRC) -- LNR908:

No significant adjustments requested in the FB 2025-27 budget.

Mauna Kea Stewardship & Oversight Authority – LNR909:

No significant adjustments requested in the FB 2025-27 budget.

Department of Land and Natural Resources
Functions

Table 1

<u>Division</u>	<u>Description of Function</u>	<u>Activities</u>	<u>Prog ID(s)</u>	<u>Dept-Wide Priority</u>	<u>Statutory Reference</u>
LAND	To ensure the effective and efficient use of public lands in ways that will fulfill the public land trust obligations and promote the sustained social, environmental and economical well-being of Hawaii's people, including planning for the use of and developing State lands, leasing lands for agricultural, commercial, industrial renewable energy, and resort purposes; issuing revocable permits and easements, taking inventory of and managing public lands, and ensuring the availability of lands for public purposes.	Land Division is tasked with the disposition of State lands through fee sale, lease, permit, grant-of-easement, license, executive order or other types of dispositions, and acquisition of private lands and lands owned by other government entities that are required by the State agencies through negotiation, condemnation or land exchange. Lease administration, including conducting site inspections, processing lessee requests for consents to mortgages or assignments, and the ongoing enforcement of lease terms and conditions to ensure rent, insurance, performance bond and other lease requirements are met in a full and timely manner. Property management of unencumbered State lands includes responding to complaints by the public, conducting land maintenance activities (e.g. clearing stream mouths, cutting trees, towing abandoned vehicles), and cleaning illegal dumps.	LNR101	13	Chapter 171, et seq., HRS
		Proactive planning and development initiatives ensure more effective and efficient use of public lands to fulfill our trust obligations and promotes economic activity in Hawaii. Maintains an inventory of State-owned public lands that are under the management jurisdiction of the BLNR as defined in HRS 171-2, and the Division also serves as a repository of land documents dating back to the "Great Mahele" of 1848. Provides abstracting services and land management advice to other State agencies. Responsible for processing shoreline certifications for properties bordering the ocean.	LNR101	31	Chapter 171, et seq., HRS

Department of Land and Natural Resources
Functions

<u>Division</u>	<u>Description of Function</u>	<u>Activities</u>	<u>Prog ID(s)</u>	<u>Dept-Wide Priority</u>	<u>Statutory Reference</u>
LAND (OCCL)	To conserve, protect, and preserve important natural resources of the state through appropriate management and to promote their long-term sustainability and the public health, safety and welfare through regulation and enforcement of land use laws under Chapter 183C, Hawaii Revised Statutes; and protect and restore sandy beaches around the state through improving planning and early identification of coastal hazards, as well as through beach restoration and avoidance of coastal hazards.	The Office of Conservation & Coastal Lands processes: Conservation District Use Permits (CDUP), prosecution of land use violations, resolution of shoreline encroachments, enactment of beach restoration projects (i.e. Waikiki Beach Improvements/Kaanapali Beach and Dune Enhancement), administration of contested cases involving Conservation District Use Permit's and shoreline certifications. OCCL provides information to landowners, decision makers and the general public regarding Conservation District matters. OCCL provides direction and guidance on a wide variety of coastal issues. This includes response to coastal erosion, coastal development setbacks, and beach nourishment. OCCL is in charge of the Hawaii Climate Adaptation Initiative and is developing the State Sea Level Rise Vulnerability and Adaptation Report.	LNR101	10	183C & 190D, HRS
BOC	To serve and protect the public by providing for an accurate, timely and permanent system of recording, maintaining and preserving land title recordings and related documents and maps.	Recording, indexing and processing land title and other related legal documents and maps. Issuing Land Court Certificates of Title, certifying copies of matters of record and conducting records and Uniform Commercial Code (UCC) searches. Providing secure public access to and public notice of our recorded information.	LNR 111	14	Chapters 501 & 502, HRS.
ENG	1. Engineering services to other divisions and agencies	Administer contracts for planning, design or construct of departmental projects; provide engineering services provided to other agencies or DLNR divisions.	LNR141	18	--
	2. Rockfall and/or flood mitigation	Retain consultants or contractors to assess conditions and/or implement projects to address rockfall hazards and/or flood damage located on or due to DLNR lands.	LNR141	19	--
	3. Dam safety program	Perform dam inspections; review and/or issue dam permits; develop or implement dam safety projects; prepare dam-related reports or maps; provide dam-related technical assistance; enter dam-related cooperative agreements.	LNR810	20	Chap. 179D, HRS
	4. Geothermal and other mineral resources management/regulation	Review and/or issue geothermal permits; monitor geothermal development activities.	LNR141	32	Chapters 182, 196D, HRS
	5. Flood control program, including administration of National Flood Insurance Program	Review flood control and prevention plans; coordinate flood-related cooperative agreements; provide flood-related technical assistance; perform flood control research, studies or investigations.	LNR810	21	Chap. 179, HRS

Functions

Table 1

<u>Division</u>	<u>Description of Function</u>	<u>Activities</u>	<u>Prog ID(s)</u>	<u>Dept-Wide Priority</u>	<u>Statutory Reference</u>
ENG	6. Develop water and land resources to support State projects	Implement and/or coordinate projects to develop ground or surface water sources in support of State projects.	LNR141	58	Chapter 174, HRS
	7. Soil and Water Conservation District (SWCD) Program	Provide administrative support and funding to the SWCD program.	LNR141	66	Chapter 180, HRS
DAR	1. Preserve/enhance marine, estuarine, freshwater native and other resident aquatic species and their habitats.	Create and amend administrative rules to protect aquatic species and their habitats, also conduct surveys, monitoring, inventory of important fishery stocks and habitats.	LNR401	7	187A-2; 190-1,2,3,4,5
	2. Promote sustainable resource use and ensure the viability of Hawaii's commercial and recreational fisheries.	Process and analyze commercial fish catch reports, contact fishermen for late reports, issue delinquency letters, and record number of freshwater fishing licenses purchased.	LNR401	27	187A-2(1)
	3. Detect, map and eradicate invasive alien species and prevent entry into state waters.	Plant sea urchins on reefs choked with alien algae to biologically control unwanted algae species.	LNR401	28	187A-31,32
	4. Evaluate in-stream flow standards to preserve Hawaii's stream biota.	Conduct annual stream surveys and analyze survey data to model habitat requirements for native stream biota.	LNR401	39	195D-3(a)
	5. Promote public understanding of the importance of Hawaii's aquatic resources.	Encourage conservation and ethical use of the aquatic resources through education and outreach activities.	LNR401	40	187A-9
	6. Issue commercial marine (fishing) licenses, freshwater gamefish licenses, duplicate licenses, dealer permits.	Provide for various fishing opportunities in coastal waters and public fishing areas statewide, log permit and license information.	LNR401	41	189-2(6), 189-3
	7. Review applications for permits to take aquatic life for science, education, and propagation purposes.	Process permit applications in a timely manner provide applications are complete with all necessary information and request would assure no adverse impact on aquatic resources and their habitat.	LNR401	42	187A-6, 6.5
	8. Manage public fishing areas, fish aggregating devices, marine life conservation districts, shoreline fishery management areas, artificial reefs, and refuges.	Conduct creel surveys at public fishing areas, replace and conduct research on fish aggregating devices, monitor fish populations at marine life conservation districts, fishery management areas, artificial reefs and other refuges.	LNR401	46	187A-2(3), 187A-21, 188-22.6-22.9, 188-53
	9. Provide conservation and safety education.	Coordinate/assist with response to shark attacks and provide hazardous marine warnings.	LNR401	43	187A-9
	10. Protect and restore coral reef habitat.	Propagate corals for preservation of biodiversity (coral ark) and reef restoration.	LNR401	55	187A-2
DOFAW	1. Protect and manage forested watersheds, forest reserves, wildlife sanctuaries, and natural area reserves.	Protect and manage forested watersheds, forest reserves, wildlife sanctuaries, natural area reserves, and public hunting and recreation areas across the state.	LNR172, 402, 407, 804	2	HRS 183, 183D, 195, 195D, 198D
		Support forest and natural resource management across the state including watershed partnerships, forest stewardship partners, and natural area partnerships.	LNR407, LNR172	3	HRS 195, 195F

Department of Land and Natural Resources
Functions

Table 1

DOFAW		Prevent and suppress wildland fire on public and private lands with important resources.	LNR402	5	HRS 185
		Address and monitor natural resource threats to Hawaii's forests and natural areas including control damaging feral animals, predators, weeds, invasive species, and diseases.	LNR172, 402, 407, 804	6	HRS 183, 183D, 194, 195, 195D, 195F
		Administer State Land Legacy and federal land acquisition programs.	LNR102, 172, 402, 407	33	HRS 173A, 195, 195D
	2. Protect and manage native ecosystems, threatened/endangered species, native plants and animals, and prevent the establishment of invasive species in state.	Support Hawaii Invasive Species Council and county invasive species committees.	LNR402, LNR172	4	HRS 194
		Implement management and recovery projects for Threatened and Endangered (T&E) native species.	LNR402, LNR407	17	HRS 183D, 195, 195D
		Process T&E habitat conservation plans, safe harbor agreements, and research permits.	LNR402, LNR407	34	HRS 183D, 195, 195D
	3. Provide outdoor recreation for hiking, hunting, camping, riding and off-road vehicle use.	Maintain and develop multi-use trails, Off Highway Vehicle (OHV) use, and camping and recreation sites. All while pursuing more access opportunities into our public lands. Maintain and manage Commercial Trail Tour Activity (CTTA) that contributes to Hawaii's economic growth.	LNR 804, LNR172	25	HRS 198D, 183
		Document, inventory, protect and restore historic trails and old government roads.	LNR804	26	HRS 198D
		Maintain public hunting as a source of food, recreation, and to control game animals.	LNR804	47	HRS 183D
	4. Manage and develop forest resources to strengthen the state's economy, and promote sustainable production of forest products and services on state and private lands.	Work with local forestry industry professionals to support development and utilization of forest products for wood, biomass, non-timber, and community products.	LNR172	48	HRS 183, 195F
		Support the development of sustainable forest product industries.	LNR 172	49	HRS 183
		Manage and permit the collection of forest products for personal and cultural gathering purposes.	LNR172	50	HRS 183
		Administer private landowner assistance projects for forest protection and management, native species habitat, and forest products development.	LNR172	51	HRS 183, 186, 195F
	5. Support the Youth Conservation Corps program, and provide environmental education, outreach and volunteer opportunities.	Administer Youth Conservation Corps (YCC) program; develop and coordinate volunteer projects for native species restoration and conservation; develop and disseminate environmental education materials.	LNR407	52	HRS 193, 195

DOCARE	4. Administer the Hunter Education Program to educate and instruct the public on outdoor safety and resource conservation as mandated by Chapter 183D-28, Hawaii Revised Statutes.	Provide instruction to the public in hunter safety, principles of conservation and sportsmanship. Issue hunter education certificates or letters of exemption. Plan and develop public outdoor and indoor target ranges for the program.	LNR405	44	Title 12, Chapter 183D, HRS
	5. Coordinate activities with other State, County and Federal law enforcement agencies to suppress cultivation and minimize the availability of marijuana through crop destruction. This function is temporarily suspended due to the COVID-19 pandemic.	Plan and implement missions to eradicate marijuana on state-owned lands and forest areas.	LNR405	60	Title 12, Subtitle 7, Chapter 199, HRS
DOBOR	1. Managing and administrating the ocean-based recreation and coastal areas programs of the state.	Establish, maintain, and revise Hawaii Administrative Rules (HAR). HAR governs the use of state harbors, ramps, and ocean recreation areas. Active oversight and responsibility of managing state small harbors, ramps and ocean recreation areas as well as the ocean waters of the State out to three miles. Maintain, repair, and replace aids to navigation as well as ensure access to small boat harbors and ramps to the boating and non-boating public. Responsible for managing the use of all near shore waters, which includes regulating the use of ocean waters for surfers, stand-up paddleboarders, kayakers, and other users of the nearshore waters. Issue marine activity permits for organized uses of the nearshore waters for regattas, surf contests, etc.	LNR 801	16	Chapter 200
	2. Planning, developing, operating, administering, and maintaining small boat harbors, launching ramps, and other boating facilities and associated aids to navigation throughout the state.	Operate, maintain, and repair 16 small boat harbors and 52 small boat ramps statewide. Also maintain, repair, and replace navigational aids and aids to navigation statewide. Responsible for dredging harbor and ramp entrance channels.	LNR 801	15	Chapter 200
	3. Developing and administering an ocean recreation management plan.	Work with community to develop appropriate uses for state ocean waters.	LNR 801	35	Chapter 200
	4. Administering and operating a vessel registration system for the state.	Registers all new and existing vessels in the state. This includes vessel sales and transfers.	LNR 801	36	Chapter 200
	5. Regulating the commercial use of state waters and marine resources, including operations originating from private marinas.	The division issues commercial use permits for the use of state small boat harbor facilities and state waters in accordance with the Hawaii Administrative Rules (HAR).	LNR 801	37	Chapter 200

DOBOR	6. Regulating boat regattas and other ocean water events.	The division issues marine event permits for ocean recreation activities such as regattas, surf contests and other uses of the ocean waters.	LNR 801	38	Chapter 200	
	7. Administering a marine casualty and investigation program.	Tracks marine accidents statewide as well as coordinates investigations of marine accidents. Accident reports are tracked and submitted to the United States Coast Guard (USCG).	LNR 801	56	Chapter 200	
	8. Assisting in abating air, water, and noise pollution.		LNR 801	53	Chapter 200	
	9. Conducting public education in boating safety.	Promotes safe boating activities state wide through educational activities at boat shows, schools and other public, marine gatherings. This includes coordinating activities with USCG Reserve and USCG Auxiliary.	LNR 801	63	Chapter 200	
	10. Administering the boating special fund.	Responsible for processing payments and expenditures for the program in accordance with B&F and DAGS guidelines.	LNR 801	54	Chapter 200	
	11. Assisting in Controlling Shoreline Erosion	Works with DLNR Engineering and the Office of Conservation and Coastal Lands (OCCL).	LNR 801	61	Chapter 200	
	12. Repairing seawalls and other existing coastal protective structures under the jurisdiction of the State.	Works with DLNR Engineering and the Office of Conservation and Coastal Lands (OCCL).	LNR 801	62	Chapter 200	
	13. Removing nonnatural obstructions and public safety hazards from the shoreline, navigable streams, harbors, channels, and coastal areas of the State.	Removes grounded vessels, submerged vehicles, whale carcasses, and other marine debris from beaches and near shore waters.	LNR 801	45	Chapter 200	
	14. Issue long term leases, concession contracts, revocable permits, etc. for the use of fast lands within a state small boat harbor.	The property management section is responsible for developing the fast lands in the state small boat harbor in order to increase revenue that will be used to support the program.	LNR 801	29	Chapter 200	
	SHPD	1. Review of State and Federal projects	Review reports, photos, inventories, meet with project proponents, enter into agreements with other agencies regarding the treatment of historic or cultural properties.	LNR802	9	6E-8, 6E-10, 6E-42 National Historic Preservation Act as amended (NHPA)
		2. Inventory and Survey	Inventory and catalogue significant cultural and historic sites.	LNR802	22	6E-3, NHPA, NPS Grant Manual
		3. Burial Protection	Staff the island burial councils (5), make determinations on inadvertent finds, review genealogies and make recommendations to the burial councils, review burial treatment plans and make recommendations to the burial councils. Attend meetings with descendants and project proponents.	LNR802	23	6E-3, 6E-43, 6E-43.5, 6E-43.6

Department of Land and Natural Resources
Functions

<u>Division</u>	<u>Description of Function</u>	<u>Activities</u>	<u>Prog ID(s)</u>	<u>Dept-Wide Priority</u>	<u>Statutory Reference</u>
SHPD	4. National Register	Staff the Historic Hawaii Review Board (HHRB), review nominations for completeness, present nominations to the HHRB, forward appropriate nominations to the National Register, maintain files on register sites.	LNR802	57	6E-3, 6E5.5, NPS Grant Manual
	5. Certified Local Governments (CLGs)	Work with the counties to ensure historic preservation programs on all islands. Provide grants to Hawaii, Maui and Kauai in alternate years, as they are the 3 counties with CLGs.	LNR802	64	6E-3, NHPA, NPS Grant Manual
	6. Planning	Develop the statewide Historic Preservation Plan and update every 5 years.		65	6E-3, NHPA, NPS Grant Manual
	7. Education and Outreach	Develop programs to educate the public about historic preservation and its importance to the state.	LNR802	59	6E-3, NHPA
STATE PARKS	1. Maintain natural and cultural parks, facilities, & resources for current and future generations.	Repair, maintain and improve the quality of park facilities, continue education efforts for the public to enrich experience and reduce impact to sensitive resources and historic sites; carry out capital improvements projects to create and restore park infrastructure.	LNR806	12	Section 184
	2. Provide safe public access to state parks that contain both sensitive natural resources and cultural and historic sites.	Provide lifeguard services at parks on Oahu, Maui, Kauai, and Hawaii; determine and implement park safety improvements and install, as warranted, and maintain increasing number of both warning and interpretive signage for public safety, and education. Expand the Interpretive Technician staff to educate and interact with the public for enrichment of experience and to improve safety and compliant behavior.	LNR806	24	Section 184
	3. Increase opportunities for the enjoyment, appreciation, and management of state parks.	Evaluate and assess the value of park resources by determining new methods to generate income in order to offset shortages in the operating budget and improve the quality of the park experience statewide. Operate camping, lodging, picnic & day use recreational facilities; issue park use permits; continue interpretive programs; administer Land & Water Conservation Funds, State Comprehensive Outdoor Recreation Plan (every 5 years), manage grants-in-aid, and provide public information. Continue to develop public/private partnerships for management and income generation.	LNR806	30	

Department of Land and Natural Resources

DELETION OF LONG-TERM VACANT POSITIONS											
LNR111	BA	Deletion of Long-term Vacant Positions	None.	B	(1.00)	(2.00)	(156,948)	(1.00)	(2.00)	(156,948)	N
LNR801	CH	Deletion of Long-term Vacant Positions	MOF being converted from A to B (Boating Special Fund). No impact on operations.	A	(3.00)	-	(141,012)	(3.00)	-	(141,012)	N
LNR402	DA	Deletion of Long-term Vacant Positions	Position is currently on internal recruitment and anticipating that it will be filled by December 31, 2024. This Kauai Branch position is responsible for accounts payable and receivable, proper preparation of purchase orders, contract and grant file and database management, Payroll and invoice processing at the Branch Level. This position assists the Branch Manager and District Program Managers in monitoring fund allocation, cash balances, expenditures, outstanding encumbrance balances via Datamart. Trains Office Assistant III and other Branch Staff in Datamart query and reconciliation; and keep them informed about policy changes state-wide or Department-wide. Collateral duties include supporting the Hunting Program through sales of stamps and licenses to vendors, customers, and via the internet. This position also maintains all District Fund Accounts as provided by the Administration Office.	A	(0.50)	-	(23,502)	(0.50)	-	(23,502)	N
LNR405	HA	Deletion of Long-term Vacant Positions	The Division is requesting to maintain this key, essential position. The Assistant Administrator position provides for direct support in Division management to the Administrator. With the complexities of managing an expanding Division with broad statewide law enforcement duties, the Division is seeking to redescribe and reorganize this position, so that it may have both an Assistant Administrator for operations and another position for administrative management. LNR804	DA	Deletion of Long-term Vacant Positions	Trails and Access Specialist IV, Position #45494 for Hawaii Island is currently in DHRD recruitment. The Hawaii Branch is under constant call to respond to increasing land development where historic trail issues are a major concern while also managing and developing public recreational trail opportunities. This position would provide the professional and technical expertise to resolve historic trail issues, perform day-to-day maintenance of existing trails, and perform other trail and access administrative and operational duties to serve the public. This position represents the Division at the monthly Na Ala Hele Advisory Council meetings and shares trail management issues, development concerns, and recreation use challenges and concerns raised by the community and commercial vendors. LNR172	DA	WR		18	Forest/Resource Management - Improved forest and resource management for fire resilient landscapes, wildlife habitat, endangered species, including critically endangered forest birds	With catastrophic climatic events on the rise, the ability of Hawai'i 's terrestrial landscape to withstand the impacts of severe weather is highly relevant for the safety and well-being of our communities and our economy. Much of the Forest Reserve System (approximately 700,000 acres) suffers from decades of wildland fire, deferred maintenance, and lack of consistent program investment, leaving much of the land vulnerable to further degradation. Without intervention, the lands are on a trajectory that will result in more acres of fire-prone invasive grasses, shrubs, and non-native trees as the dominant components of the landscape. Persistent and aggressive invasive species (guinea grass, fountain grass, haole koa) will expand into new areas, heightening the potential for fire and erosion and hasten the loss of culturally and globally significant species. Restoring areas to conditions more representative of the resilient Hawaiian forest is imperative. Visitors come to Hawai'i to experience its unique biodiversity. Hawaiian culture is inextricably linked to plants found in our forests. Funding to restore our resilient landscapes pays dividends in terms of water, climate, and biological security. Reversing the current trajectory of invasive grass, shrub, and tree expansion requires stable and sizable investment in activities that include, among other things, funding for the state tree nurseries, personnel, and new resources for associated planting and fencing. Beyond community health, safety, and biodiversity implications, the State of Hawai'i 's commitment to uphold the Paris Climate Accord and move towards carbon neutrality by 2045. This requires actions that mitigate greenhouse gases, which forest restoration does. Consistent and appropriate levels of funding for the management of state public Forest Reserves are essential for the future of the community and the economy. The Forest Management Program needs reliable funding to manage in a way that sustains ecosystem services and forest products and protects recreation and cultural plant/biological values.	A			5,000,000			5,000,000

Table 6

Prog ID	Sub- Org	Addition Type	Prog ID Priority	Dept- Wide Priority	Description of Addition	Justification	MOF	FY26			FY27		
								Pos (P)	Pos (T)	\$\$\$	Pos (P)	Pos (T)	\$\$\$
LNR402	DA	WR		8	Request for continuous funding for twenty-two (22) positions currently funded by the Major Disaster Fund (MDF) for fire and emergency response, Statewide: One Program Specialist V, One (1) Program Specialist IV, SR 22; Two (2) Natural Resources Mgt Spec. IV, SR 22; One (1) Forester IV, SR 22; Nine (9) Forestry and Wildlife Worker II, BC 05; Two (2) Heavy Vehicle/ Construction Equipment Mechanic II, WS11; Two (2) Heavy Vehicle/ Construction Machinery Mechanic I, BC 11; Four (4) Heavy Equipment Operator, BC 10; One (1) Automotive Mechanic I, BC 10	DOFAW is primary responder for wildland fires occurring across one million acres of forested watershed (twenty-five percent of the land area in the state), and co-responds with federal and county agencies for an additional thirty percent. Increased staffing is needed to increase capacity for the Division to manage for resilient forest landscapes to prevent fires from occurring or mitigate their impact; restore areas damaged after fires occur; reverse decades of degradation from fire and ungulates; plan and manage grants statewide for fire prevention; utilize heavy equipment to install and maintain firebreaks, manage fuel loads, and assist in fire and emergency response; educate the public on how they can prevent wildfires; and support a fuels management crew on Maui.	A	22.00		1,425,696	22.00		1,425,696
LNR402	DA	AP		24	Add recurring funds to the Hawaii Invasive Species Council for expanded work on priority pests and maintaining emergency response capacity for new pest incursions.	This request would increase capacity for on-the-ground response efforts to high-impact pests like little fire ants, coqui frog, and coconut rhinoceros beetle that continue to spread throughout the state, threatening the environment, economy, and communities. Much of this work is being conducted by island-based programs like the invasive species committees, and additional funding would assist in the establishment of species-specific response teams on each island. Additional funding would also support research projects at the University of Hawaii and other research institutions to develop new tools and technology for invasive species detection, prevention, and management. With adequate funding, Maui has drastically reduced a little fire ant infestation that encompassed 142 acres to the point of being almost eradicated, utilizing innovative new control tools and techniques. A portion of this funding would be reserved to support rapid response efforts to new pest incursions for partner agencies.	A			4,250,000			4,250,000
LNR402	DA	AP		28	Add funds to support statewide invasive ant research and control to be carried out by the Hawaii Ant Lab.	Funding for the Hawaii Ant Lab would be supported through the Hawaii Invasive Species Council which is administered by the Department and supports multiple inter-agency projects and programs that focus on the prevention and management of high-risk invasive plants and pests. The Hawaii Ant Lab is the only organization dedicated solely to the management and eradication of invasive ants in Hawaii, including little fire ant. As of fiscal year 2024, the Hawaii Ant Lab has no stable, long-term funding. Funding for the program is provided on a year-to-year basis by applying for competitive grants and other opportunities. The 2023 Legislative Session was the first year the Hawaii Ant Lab received an exclusive appropriation to support their program.	A			500,000			500,000

Proposed Budget Additions

Prog ID	Sub-Org	Addition Type	Prog ID Priority	Dept-Wide Priority	Description of Addition	Justification	MOF	FY26			FY27			
								Pos (P)	Pos (T)	\$\$\$	Pos (P)	Pos (T)	\$\$\$	
LNR402	DA	WR		Gov Adjust	WEST MAUI FIRE PREVENTION: UKUMEHAME WETLAND AND STREAM, MAUI	This project will restore the Ukumehame wetland and stream corridor in West Maui and establish a green break to prevent wildfire. The green breaks in this fire-prone location will help to prevent the spread of wildfires to adjacent areas where natural resources, property, and public safety may be threatened.	A			3,000,000				-
LNR402	DA	WR		Gov Adjust	Add funds for fire pre-suppression, readiness, response, and post-fire restoration and rehabilitation	DOFAW is primary responder for wildland fires occurring across one million acres of forested watershed (over twenty-five percent of the land area in the state) and co-responds with federal and county agencies for an additional thirty percent. Funding supports DOFAW fire and emergency response (overtime, meals contracts), prevention and pre-suppression activities such as fuels management, post-fire restoration, and community wildfire protection projects. Funds will support managing for resilient landscapes by restoring fire damaged areas and interrupting the invasive grass/fire cycle.	A			4,000,000				-
LNR404	GC	HS		25	Funding for cooperative joint funding agreements with United States Geological Survey to carry out hydrologic data collection, analyses, and investigations tied to court orders and responses to water resource management challenges on Maui.	<p>Three members of CWRM's Stream Protection and Management (SPAM) Branch currently dedicate the vast majority of their time to maintaining stream gages in the field. As a result, SPAM Branch has limited capacity to carry out other critical duties, including analysis of hydrological data, development and implementation of management recommendations, and issuance of water use permits.</p> <p>The total funding requirement for the 2025 USGS cooperative joint funding agreement (JFA) is \$1,277,633, with CWRM funding 80-percent of the JFA at \$1,021,806. The current JFA supports 44 streamflow stations, 6 groundwater stations, and 17 rainfall stations statewide.</p> <p>USGS maintains very high-quality assurance and quality control standards, providing very high-quality, scientifically defensible data. Maintaining such standards can be challenging for the Commission to replicate with limited staffing and infrastructure and takes away from Commission staff's primary duties. Real-time USGS monitoring provides data transparency and assurances of compliance with Commission actions. Converting additional, high-priority, monitoring stations to real-time USGS gaging stations will increase transparency and free up limited staff resources to support the development of effective water resource management recommendations.</p> <p>Maintaining, and even expanding, ground- and surface-water monitoring statewide is central to Hawai'i's comprehensive hydrological monitoring network and therefore critical to characterizing the consequences of climate change on water availability, while supporting the regulation and management of Hawai'i's water resources. Stations re-established in locations with previous long-term streamflow monitoring can also be used to help track shifts in water availability or hydrological processes associated over time.</p> <p>This funding would ensure adequate resources for maintaining a comprehensive monitoring program and free up funding for other CWRM initiatives such as sustainable yield (SY) analyses, instream flow standard development, and planning efforts.</p>	A			400,000			400,000

								Pos (P)	Pos (T)	\$\$\$	Pos (P)	Pos (T)	\$\$\$
LNR404	GC	HS		37	Funding for Central Maui Hydrologic Study to analyze existing groundwater data and assess accuracy of hydrologic boundaries for aquifer systems in Central Maui.	<p>At present, given the proportion of ground water withdrawals to sustainable yield, it is very difficult to obtain permits to drill/outfit new wells or install larger pumps in existing wells within the Central Maui area.</p> <p>By assessing the accuracy of the currently drawn hydrologic boundaries for the Kahului and Paia aquifer systems, the proposed study will increase CWRM's understanding of the availability of ground water in these areas, including ground water recharge and discharge to shoreline ecosystems. This will allow CWRM to fill substantial gaps in CWRM's understanding of ground water availability in Central Maui, and would allow better management of ground water resources in Central Maui.</p> <p>CWRM does not devote resources to studying the hydrologic boundaries for aquifer systems in Central Maui at present, but regularly collects and compiles information about the aquifer systems, such as current pumpage.</p>	A			250,000			150,000
LNR404	GC	HS		49	Funding for hydrologic investigations of existing groundwater data and modelling to revise sustainable yields, with priority given to the Lahaina Aquifer System.	<p>New 2023 estimated recharge data from the U.S. Geological Survey presents an opportunity to not only consider the impacts of climate change on recharge, but also an opportunity to reevaluate CWRM's approach to calculating SYs. The current methodology used by CWRM to estimate SY is simple and has limitations; CWRM would like to explore other, more complex methods to estimate SYs. As such, funding is needed to hire consultants to help CWRM evaluate other methodologies for calculating SYs, such as numerical computer models, and to also conduct public outreach and consultation with a variety of stakeholders.</p> <p>This funding would prioritize reevaluating SYs in the Lahaina Aquifer Sector. This is a recommended step to allow CWRM to better understand the availability of the resource when acting on new and existing Ground Water Use Permit applications in the Lahaina Aquifer Sector.</p> <p>At present, CWRM staff is assessing strategies to update sustainable yield in the Lahaina Aquifer Sector. Program resources in the form of staff time will continue to be expended on the sustainable yield revision process.</p>	A			200,000			200,000
LNR404	GC	HS		50	Funding for Hawai'i Mesonet network of telemetered climate stations in cooperation with the University of Hawai'i Water Resources Research Center to carry out hydrologic data collection, analyses, management, and dissemination.	<p>CWRM is an active partner with the University of Hawai'i, Water Resources Research Center (UH-WRRC) who administers the Hawai'i Mesonet Network project. CWRM benefits from the data collected by the Mesonet climate stations, which can be used to inform water management decisions and will assist in determining water availability. CWRM advocates for funding on behalf of the Mesonet project and has received both State (FY25, \$237,500 – a portion will go to Mesonet) and federal funding (FY24 Congressionally Directed Spending \$350,000) to support the expansion of the Mesonet network.</p>	A			350,000			350,000

FY 2023 - FY 2025 Restrictions

Table 7

<u>Fiscal Year</u>	<u>Prog ID</u>	<u>Sub-Org</u>	<u>MOF</u>	<u>Budgeted by Dept</u>	<u>Restriction</u>	<u>Difference Between Budgeted & Restricted</u>	<u>Percent Difference</u>	<u>Impact</u>
FY23								
FY23	LNR101	EA	A	170,264	16,566	153,698	90.27%	Restriction limits ability to contract for climate mitigation and adaptation initiatives but does not jeopardize the climate coordinator position and will be absorbed.
FY23	LNR141	GA	A	2,918,651	283,978	2,634,673	90.27%	Restrictions on payroll affects ability to fill all authorized positions and cost cutting on other current expenses was implemented.
FY23	LNR153	CB	A	1,327,059	129,120	1,197,939	90.27%	Reduced operating funds to support commercial fisheries projects.
FY23	LNR172	DA	A	3,192,942	310,666	2,882,276	90.27%	Reduction of general-funded management projects in the 680,000 acres of the public Forest Reserve System, including reductions to fence, road, trail, campsite, and facility maintenance; reduced ungulate and invasive species control trips; reduced forest restoration and tree planting projects; reduced fuel reduction and fire break maintenance; and reduced capacity for management of threatened and endangered species.
FY23	LNR401	CA	A	2,295,831	223,376	2,072,455	90.27%	Reduced operating funds to support Ecosystem Protection projects.
FY23	LNR402	DA	A	17,067,208	1,666,730	15,400,478	90.23%	The reduction produced limited operational funds for various wildlife projects. Lack of funds for waterbird habitat management and predator control, resulting in inability to implement key recovery actions for six endangered waterbird species. Gaps in supporting statewide invasive species management which led to spread of priority species such as coqui, little fire ant, and miconia; scaling back of Rapid Ohia Death research, surveys, and response. Suspension of research on invasive species control tools. Reduction in funds available for watershed protection. Lack of funds for analysis of wildlife population surveys. Delays in regulatory compliance review and annual site visits at Habitat Conservation Plan incidental take license sites.
FY23	LNR404	GC	A	2,951,202	287,142	2,664,060	90.27%	The Commission on Water Resource Management is actively pursuing filling its vacancies. Finding qualified and suitable candidates for some of its vacancies has however, prolonged this effort, resulting in payroll savings being applied to meet the Administration imposed 5% general fund restriction and 5% general fund contingency restriction. The restrictions have limited the ability to enter into contractual services for complex water studies, monitoring activities, and data collection. The Commission's Water Resource Protection Plan outlines data and information gaps where much needed investigation and monitoring would improve its understanding of the impacts of climate change, future water availability and demands, impacts to public trust purposes, and to anticipate where designation of water management areas may be necessary.
FY23	LNR405	HA	A	13,066,413	1,271,328	11,795,085	90.27%	Restrictions resulted in the cancellation or deferral of critical repairs & maintenance undertakings. In addition, given the current Academy class size, training and start-up costs have been largely dependent upon ARPA funding. It is necessary for the Division to have recurring training funding to support new recruits as well as maintain training for current employees to stay up-to-date with necessary requirements and qualifications.
FY23	LNR407	NA	A	9,767,816	950,384	8,817,432	90.27%	The restriction reduced maintenance of capital improvement project investments and long-term projects focusing on fresh water, reduced greenhouse gas emissions, flood mitigation, erosion, wildfires, and threatened and endangered species.

Department of Land and Natural Resources
FY 2023 - FY 2025 Restrictions

Table 7

<u>Fiscal Year</u>	<u>Prog ID</u>	<u>Sub-Org</u>	<u>MOF</u>	<u>Budgeted by Dept</u>	<u>Restriction</u>	<u>Difference Between Budgeted & Restricted</u>	<u>Percent Difference</u>	<u>Impact</u>
FY23	LNR801	CH	A	445,255	43,322	401,933	90.27%	Reduction in services to the public and existing staff's work load increasing to cover vacant positions.
FY23	LNR802	HP	A	3,443,482	335,042	3,108,440	90.27%	SHPD will be required to eliminate positions or restrict/eliminate essential operating activities, e.g., HICRIS O&M, digitation of legacy documents/reports, routine operating expenses, e.g., essential travel, purchase of office supplies, telephones, etc.
FY23	LNR804	DA	A	4,381,634	426,322	3,955,312	90.27%	Reduced operational funds available to provide necessary equipment, supplies, and operational capacity to meet forest and outdoor recreation goals and objectives; restricted maintenance of access roads and trails.
FY23	LNR805	CB	A	1,404,199	136,624	1,267,575	90.27%	Reduced operating funds to support Recreational Fisheries and neighbor Islands projects.
FY23	LNR806	FA	A	11,990,874	1,166,680	10,824,194	90.27%	Restrictions will impact the operational expenditure plan of filling vacancies and providing stable funding for basic park operational cost such as utilities, fuel and annual service contracts. The special fund income is intended to be applied towards deferred maintenance of facilities, roadways, parking areas and other park features that are not appropriate, or add to the cost of, CIP requests.
FY23	LNR906	AA	A	5,087,499	303,750	4,783,749	94.03%	Cost cutting on other operating expenses was implemented to meet restriction. If possible and when necessary, funds from other division/programs were tapped to cover expenses. The funds were critically needed to support on-island operations and support functions for the safety and general welfare of all on-island workers, KIRC staff and public.
				79,510,329	7,551,030	71,959,299	90.50%	
FY 24								
FY24	LNR101	EA	A	174,977	\$ 17,120	\$ 157,857	90%	Restriction limits ability to contract for climate mitigation and adaptation initiatives but does not jeopardize the climate coordinator position and will be absorbed.
FY24	LNR141	GA	A	3,306,742	323,548	2,983,194	90.22%	Restrictions on payroll affects ability to fill all authorized positions and cost cutting on other current expenses was implemented.
FY24	LNR172	DA	A	23,735,463	\$ 2,365,496	\$ 21,369,967	90%	Reduction of general-funded management projects in the 680,000 acres of the public Forest Reserve System, including reductions to fence, road, trail, campsite, and facility maintenance; reduced ungulate and invasive species control trips; reduced forest restoration and tree planting projects; reduced fuel reduction and fire break maintenance; and reduced capacity for management of threatened and endangered species.
FY24	LNR401	CA	A	20,329,231	\$ 2,020,986	\$ 18,308,245	90%	Reduced operating funds for ecosystem protection, neighbor island projects, commercial and non-commercial fisheries projects, as well as mitigation, aquaculture, and restoration projects.

Department of Land and Natural Resources
FY 2023 - FY 2025 Restrictions

Table 7

<u>Fiscal Year</u>	<u>Prog ID</u>	<u>Sub-Org</u>	<u>MOF</u>	<u>Budgeted by Dept</u>	<u>Restriction</u>	<u>Difference Between Budgeted & Restricted</u>	<u>Percent Difference</u>	<u>Impact</u>
FY24	LNR402	DA	A	17,382,568	1,705,688	15,676,880	90.19%	The reduction limits funds for critical endangered Hawaiian forest bird protection and management work and waterbird habitat management and predator control, resulting in an inability to implement key recovery actions for endangered species. Reduced funds for statewide invasive species management have contributed to the spread of priority species such as coconut rhinoceros beetle, coqui frog, little fire ant, and miconia, and scaling back Rapid Ohia Death research, surveys, and response. Research on invasive species control tools has been suspended. Reduction in funds available for watershed protection. Lack of funds for analysis of wildlife population surveys. Delays in regulatory compliance review and annual site visits at Habitat Conservation Plan incidental take license sites.
FY24	LNR404	GC	A	3,373,097	\$ 330,040	\$ 3,043,057	90%	The Commission on Water Resource Management is actively pursuing filling its vacancies. Finding qualified and suitable candidates for some of its vacancies has however, prolonged this effort, resulting in payroll savings being applied to meet the Administration imposed 5% general fund restriction and 5% general fund contingency restriction. The restrictions have limited the ability to enter into contractual services for complex water studies, monitoring activities, and data collection. The Commission's Water Resource Protection Plan outlines data and information gaps where much needed investigation and monitoring would improve its understanding of the impacts of climate change, future water availability and demands, impacts to public trust purposes, and to anticipate where designation of water management areas may be necessary.
FY24	LNR405	HA	A	16,660,215	1,171,714	15,488,501	92.97%	Restrictions will impact the Division's capacity to support the planned Recruitment Academy and related additional expenditures.
FY24	LNR407	NA	A	15,328,051	\$ 896,556	\$ 14,431,495	94%	The restriction reduced maintenance of capital improvement project investments and long-term projects focusing on fresh water, reduced greenhouse gas emissions, flood mitigation, erosion, wildfires, and threatened and endangered species.
FY24	LNR801	CH	A	465,440	\$ 45,540	\$ 419,900	90%	Reduction in services to the public and existing staff's work load increasing to cover vacant positions.
FY24	LNR802	HP	A	4,382,199	\$ 428,774	\$ 3,953,425	90%	SHPD will be required restrict/eliminate essential operating activities, e.g., HICRIS O&M, digitation of legacy documents/reports, routine operating expenses, e.g., essential travel, purchase of office supplies, telephones, etc.
FY24	LNR804	DA	A	4,613,886	\$ 451,444	\$ 4,162,442	90%	Reduced operational funds available to provide necessary equipment, supplies, and operational capacity to meet forest and outdoor recreation goals and objectives; restricted maintenance of access roads and trails.
FY24	LNR806	FA	A	37,545,402	\$ 1,227,500	\$ 36,317,902	97%	No Impact due to the Legislative increase of General Funds in the amount of \$10,000,000 to the State Park Base Budget.
FY24	LNR906	AA	A	4,659,261	\$ 130,134	\$ 4,529,127	97%	Cost cutting on other operating expenses was implemented to meet restriction. If possible and when necessary, funds from other division/programs were tapped to cover expenses.

Department of Land and Natural Resources
 Program ID Sub-Organizations

Program ID	Sub-Org Code	Name	Objective
LNR101	EA	Public Lands Management / Land Management Division	<p>The Land Division is responsible for overseeing approximately 1.3 million acres of public lands. The vast majority of these lands comprise ceded lands in that they were ceded to the United States by the Republic and returned upon admission as a state. Much of these lands have been set aside to other governmental agencies for such purposes as schools, parks, forest reserves and State or County office buildings. The land division also leases out a portion of these land to private parties for such purposes as agriculture, pasture, commercial, industrial, resort and renewable energy projects.</p> <p>The Office of Conservation and Coastal Lands (OCCL) is under LNR 101. The OCCL processes: Conservation District Use Permits (CDUP), prosecution of land use violations, resolution of shoreline encroachments, enactment of beach restoration projects (i.e. Waikiki Beach Improvements/Kaanapali Beach and Dune Enhancement), administration of contested cases involving Conservation District Use Permit's and shoreline certifications. OCCL provides information to landowners, decision makers and the general public regarding Conservation District matters. OCCL provides direction and guidance on a wide variety of coastal issues. This includes response to coastal erosion, coastal development setbacks, and beach nourishment. OCCL is in charge of the Hawaii Climate Adaptation Initiative (OP is Co-Chair) and is developing the State Sea Level Rise Vulnerability and Adaptation Report.</p> <p>The Legacy Land Conservation Program is also under LNR 101. The Legacy Land Conservation Program: Conducts a competitive, public process that awards grants from the Land Conservation Fund to state agencies, counties, and nonprofit land conservation organizations for the acquisition of lands that have resource value to the state; administers approved grants and review and approve due diligence for conservation transactions; monitors properties conserved, in perpetuity, to assure ongoing compliance with statutory requirements and contractual terms.</p>
LNR102	EB	Legacy Land Conservation Program	<p>To Invest money every year to protect the State's natural capital base by conserving land for watershed protection, coastal preservation, flood prevention, parks, habitat protection, cultural preservation, agricultural production, and open space and scenic resources (Act 156, SLH 2005).</p>
LNR111	BA	Conveyances and Recording/Conveyances Division	<p>To serve and protect the public by providing for an accurate, timely, permanent and accessible system for recording, maintaining and preserving land title documents, related maps and facilitating Uniform Commercial Code filings.</p>

Department of Land and Natural Resources
Program ID Sub-Organizations

Table 17

<u>Program ID</u>	<u>Sub-Org Code</u>	<u>Name</u>	<u>Objective</u>
LNR141	GA	Water and Land Development/Dowald-Water and Land Development	Promote economic development and enhance public welfare by developing water supplies and state lands, with priority given to state-sponsored projects. Investigate and develop traditional and alternative water sources to augment and conserve existing supplies while meeting the increasing demands of state-sponsored projects. Provide engineering services to other divisions of the Department and other state agencies to execute Capital Improvements Program (CIP) and/or operating, maintenance and repair projects. Effectively manage geothermal resources and its development to protect the health and safety, and to ensure continued viability of the resource for the future.
LNR172	DA	Forestry Resource Management & Development/Forestry Division	To strengthen the State's economic opportunities through forest resource management to improve and assist in the sustainable production of forest products and services from forest reserves and other public and private lands. To promote resource restoration and conservation through outreach and education.
LNR401	CA	Ecosystem Protection and Restoration/Aquatic Resources Division	Engages in activities protecting and restoring the State's native aquatic biota and ecosystems by promoting responsible and sustainable resources use. Employs the precautionary principle to ensure the long- term integrity and viability of Hawaii's aquatic ecosystems. Develops, structures, and undertakes environmental protection plans necessary of effectively preserving Hawaii's aquatic life and their associated native species in perpetuity.
LNR402	DA	Natural Resources and Fire Protection Program/Wildlife Section	Manage habitats to protect, maintain, and enhance the biological integrity of native ecosystems. Reduce the impacts of wildfires on native ecosystems and watersheds. Reduce the impacts of invasive species on native resources. Protect, maintain, and enhance native species populations, and recover threatened and endangered species.
LNR402	DB	Natural Resources and Fire Protection Program/Wildlife Section	Promote outreach and foster partnerships to improve public understanding, responsibility, and participation in natural resource protection. Conduct monitoring and evaluation to guide the development of recovery and management plans, and ensure cost effective adaptive management of implementation actions.
LNR404	GC	Water Resources/CWRM - Water Code	To set overall water conservation, quality and use policies, define reasonable and beneficial uses, protect ground and surface water resources, watersheds and natural stream environments, establish criteria for water use priorities while assuring appurtenant rights and existing correlative and riparian uses and establish procedures for protecting and managing Hawaii's water resources.
LNR405	HB	Conservation and Resources Enforcement/Enforcement	To effectively uphold the laws that serve to protect, conserve and manage Hawaii's unique and limited natural, cultural and historic resources held in public trust for current and future generations of visitors and the people of Hawaii nei.

Department of Land and Natural Resources
Program ID Sub-Organizations

Table 17

<u>Program ID</u>	<u>Sub-Org Code</u>	<u>Name</u>	<u>Objective</u>
LNR407	NA	Natural Area Reserves and Watershed Management/Native Ecosystem Section	To protect, restore, and enhance Hawaii's natural areas, forested watersheds, native ecosystems, unique native plant and animal species, and cultural and geological features for their inherent cultural, scientific, educational and economic values for the enrichment of present and future generations.
LNR 801	CH	Ocean-Based Recreation/Administration	To enrich the lives of people of all ages, both residents and visitors alike, by providing opportunities and facilities for developing skills and participating in both organized and non-organized ocean-based outdoor activities such as boating of all types, salt water fishing, surfing, sailboarding and diving, ocean swimming and other related activities of all types.
LNR802	HP	Historic Preservation/Historical Preservation	To develop and maintain a comprehensive program of historic preservation to promote the use and conservation of historic properties for the education, inspiration, pleasure and enrichment of the citizens of Hawai'i.
LNR804	DA	Forestry and Outdoor Recreation/Forest Recreation Section	To provide managed opportunities and facilities for the public to engage in multi-use outdoor recreation activities (hiking, biking, equestrian riding, off-highway vehicle use, hunting, and camping), while also providing access for resource management. To maintain and enhance a public hunting program to control animal damage in watershed areas, and to provide a source of food and outdoor recreation for the public. To document and inventory ownership of historic trails and old government roads for public use.
LNR806	FA	Parks Administration and Operations/State Parks Division	Maintain natural and cultural parks, facilities, and resources for current and future generations. Provide safe public access to state parks containing both sensitive natural resources and historic sites.
LNR806	FI	Parks Administration and Operations/Park Interpretation	Educate the public in accessing sensitive resources and historic sites by developing interpretive programs, signage and providing public information. Expand the Interpretive Technician staff to educate and interact with the public for enrichment of experience and to improve safety and compliant behavior.
LNR810	GD	Prevention of Natural Resources/Dowald-Flood Control and Dam Safety	Protect people, property, and natural resources from natural hazards through planning, management, mitigative efforts, and regulatory programs (including the National Flood Insurance Program - NFIP).
LNR906	AA	LNR - Natural and Physical Environment/Departmental Administration - LNR	To enhance program effectiveness and efficiency by formulating policies, directing and coordinating operations and personnel, and providing other administrative and support services.
LNR907	AB	Aha Moku Advisory Committee	To bring the people (na iwi o ka'aina) and the public trust, and their voices and decisions forward to all policy makers regarding the sustainability and perpetuation of all natural and cultural resources connected to the akua that created the 'aina/land, and 'aina from which the kanaka was born.

<u>Program ID</u>	<u>Sub-Org Code</u>	<u>Name</u>	<u>Objective</u>
LNR908	AC	Kahoolawe Island Reserve Commission	Responsible for the management, control of use and rehabilitation of the Kaho`olawe Island Reserve, which includes the island of Kaho`olawe and the surrounding waters out to two-miles. Coordinates and facilitates the on-going restoration of Kaho`olawe's devastated landscape, provide for safe, meaningful use of the reserve by volunteers and visitors and protects the unique natural, cultural and historic resources of Kaho`olawe.
LNR909	AD	Mauna Kea Stewardship and Oversight Authority	To protect Mauna Kea for future generations and manage the lands contained therein for the purpose of fostering a mutual stewardship paradigm in which ecology, the environment, natural resources, cultural practices, education, and science are in balance and synergy.

Department of Land and Natural Resources
Administration Package Bills

Prog ID	Fiscal Impact	Amount Requested	FTE Requested	Budget for Personnel	Budget for OCE (Other Than Contracts)	Budget for Contracts	Dates of Initiative		Initiative Description	Is This A New Initiative Or An Enhancement To An Existing Initiative/Program	Plan for continuation of initiative (if applicable)
							From	To			
LNR101 LNR-11	Increase departmental revenue and mitigate against future liability and public health and safety issues by allowing the Board to update lease terms and conditions upon extension of the lease.	\$ -	-	\$ -	\$ -	\$ -	Upon approval	N/A	To require that lease extensions approved by the Board of Land and Natural Resources (Board) update the terms and conditions of leases using the most current lease form at the time the extension is approved and to ensure that in the event of a conflict or inconsistency between an updated lease term or condition authorized under chapter 171, Hawaii Revised Statutes (HRS), and a term or condition in the lease being extended, then the updated lease term or condition authorized under chapter 171, HRS, shall control and to repeal existing wording in sections 171-36(c) and 171-192(c), HRS, providing that lease extensions shall be subject to the rules of the Board.	Adding a new section 171-36(g), HRS, will make the most current Board lease form apply to "any lease," thus, all state leases - including those lease types in sections 171-36(b)-(f), 171-36.5, and 171-192, HRS, will be affected.	No, the Department and Board would follow the existing statutory requirements in awarding a lease.
LNR101 LNR-12	This bill would relieve the Department and any other agency subject to sections 91-9 and 634J-1, HRS, of the burden of having to conduct multiple contested cases on substantially similar matters.	\$ -	-	\$ -	\$ -	\$ -	Upon approval	N/A	To clarify that a contested case hearing is not required when an agency has already decided a contested case hearing involving substantially similar issues or parties which was not appealed, or where a court of last resort has already issued a final decision on other substantially similar matters.	This bill seeks to remove the requirement of conducting multiple contested case hearings on substantially similar matters where the party or parties requesting the hearing can make no bona fide showing as to why new or additional hearings are warranted. the sunset provision.	There would be no need for any new or revised administrative rule amendments, as the language within the bill and the statutory amendments would be sufficient to carry out the purposes of the Act.
LNR101 LNR-R1	None.	\$ -	-	\$ -	\$ -	\$ -	Upon adoption	N/A	To seek the authorization of the Legislature by concurrent resolution of the issuance of a perpetual, non-exclusive easement by the Board of Land and Natural Resources (Board) for the stormwater management outfall and drainage system, and for use, repair, and maintenance of the existing improvements constructed thereon.	Concurrent resolution pursuant to section 171-53(c), Hawaii Revised Statutes (HRS).	Administrative rules are not necessary to implement the issuing of a term, non-exclusive easement on state submerged lands.
LNR101 LNR-R2	None.	\$ -	-	\$ -	\$ -	\$ -	Upon adoption	N/A	To seek the authorization of the Legislature by concurrent resolution for the issuance of a term, non-exclusive easement by the Board of Land and Natural Resources (Board) for the shoreline protection structure and for use, repair, and maintenance of the existing improvements constructed thereon.	Concurrent resolution pursuant to section 171-53(c), Hawaii Revised Statutes (HRS).	Administrative rules are not necessary to implement the issuing of a term, non-exclusive easement on state submerged lands.
LNR101 LNR-R3	None.	\$ -	-	\$ -	\$ -	\$ -	Upon adoption	N/A	To seek the authorization of the Legislature by concurrent resolution for the issuance of a term, non-exclusive easement by the Board of Land and Natural Resources (Board) for the concrete stairs and for use, repair, and maintenance of the existing improvements constructed thereon.	Concurrent resolution pursuant to section 171-53(c), Hawaii Revised Statutes (HRS).	Administrative rules are not necessary to implement the issuing of a term, non-exclusive easement on state submerged lands.
LNR101 LNR-R4	None.	\$ -	-	\$ -	\$ -	\$ -	Upon adoption	N/A	To seek the authorization of the Legislature by concurrent resolution for the issuance of a term, non-exclusive easement by the Board of Land and Natural Resources (Board) for a seawall and for use, repair, and maintenance of the existing improvements constructed thereon.	Concurrent resolution pursuant to section 171-53(c), Hawaii Revised Statutes (HRS).	Administrative rules are not necessary to implement the issuing of a term, non-exclusive easement on state submerged lands.
LNR101 LNR-R5	None.	\$ -	-	\$ -	\$ -	\$ -	Upon adoption	N/A	To seek the authorization of the Legislature by concurrent resolution for the issuance of a term, non-exclusive easement by the Board of Land and Natural Resources (Board) for a rock revetment including stairs and for use, repair, and maintenance of the existing improvements constructed thereon.	Concurrent resolution pursuant to section 171-53(c), Hawaii Revised Statutes (HRS).	Administrative rules are not necessary to implement the issuing of a term, non-exclusive easement on state submerged lands.

Department of Land and Natural Resources
Administration Package Bills

<u>Prog ID</u>	<u>Fiscal Impact</u>	<u>Amount Requested</u>	<u>FTE Requested</u>	<u>Budget for Personnel</u>	<u>Budget for OCE (Other Than Contracts)</u>	<u>Budget for Contracts</u>	<u>From</u>	<u>To</u>	<u>Initiative Description</u>	<u>IS THIS A NEW INITIATIVE OR AN ENHANCEMENT TO AN EXISTING INITIATIVE/PROGRAM</u>	<u>Plan for continuation of initiative (if applicable)</u>
LNR101	Increase general fund appropriation	\$2,000,000 for fiscal year 2025-2026 and \$2,000,000 for fiscal year 2026-2027	-	\$ -	\$ -	\$2,000,000 for fiscal year 2025-2026 and \$2,000,000 for fiscal year 2026-2027	Upon approval	6/30/2027	To mandate the Hawaii Climate Change Mitigation and Adaptation Commission to engage in long-term adaptation pathways planning. This involves working with impacted communities to conserve natural resources and minimize infrastructure loss due to sea level rise and flooding through the preparation of adaptation pathway plans in coordination with state and county agencies.	Expansion of the role of the Climate Con	Future continuation dependent on the results of this initiative
LNR404	Increase in revenue to the Water Resource Management special fund.	\$ -	-	\$ -	\$ -	\$ -	7/1/2025	in perpetuity	This would increase the maximum amount of penalties that can be charged for various violations under CWRM's jurisdiction, including violations of the Water Code (HRS ch. 174C), CWRM's administrative rules, and commission orders. It would also institute a minimum penalty of \$50 for each violation, and specify that each day a violation continues constitutes a separate violation. Penalties collected would be deposited into the Water Resource Management Fund (special fund) created by HRS 174C-5.5. This bill's fiscal impact would be a potential increase to CWRM's revenues from penalties, which would help to defray the administrative costs incurred by CWRM in enforcing violations and greater availability of funds for studies, monitoring, and other important program activities.	Enhancement (increase in monetary penalties) to existing initiative/program (existing water use regulation activities).	Dollar amount of penalties scheduled to increase incrementally through 2045.
LNR801	Increase general fund appropriation	\$ 5,000,000	-	\$ -	\$ -	\$ -	7/1/2025	6/30/2026	General fund appropriation for regular maintenance dredging at small boat harbors and boating facilities	New	Add funding to base budget for LNR801 (recurring general fund appropriation)
LNR909	Funding for the seven (7) positions can be absorbed by the requested appropriation in the biennium budget for the period July 1, 2025 through June 30, 2027	\$ 730,000	7.00	\$ 730,000	\$ -	\$ -	7/1/2025	6/30/2026	Add positions to an existing program that is under a 5-year transition period that will be required to take over the existing 2 leases between the University of Hawaii and the Department of Land and Natural Resources that serves to preserve and protect the Mauna Kea lands under the leases.	Existing program initiative.	Will be requesting for future appropriations until the program is able to become self-sustaining.
