

How to test for Little Fire Ants:

Use a little peanut butter on a chopstick and leave them in several areas for about one hour. Any ants collected should be put in a sealable plastic bag, placed in the freezer for 24 hours and dropped off or mailed to any HDOA office. An informational flyer may be downloaded at: <http://hdoa.hawaii.gov/pi/files/2014/05/LFASurvey.pdf>

Chopsticks

In addition, the Department of Land and Natural Resources has produced a three-minute video, "How to Test for Little Fire Ants," which shows the step-by-step procedure for testing for LFA. The video is available at: <https://vimeo.com/97558997>

For updated information on LFA in Hawaii, go to the HDOA website at: <http://hdoa.hawaii.gov/pi/main/lfainfo/>

PLEASE DO NOT:

- Mail live ants
- Move any plants you think may be infested
- Collect ants on tape
