
A BILL FOR AN ACT

RELATING TO HEALTH.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the State of Hawaii
2 must prepare itself against threats to the safety of its
3 residents and notes the highly pathogenic avian influenza
4 (H5N1), which has spread across Asia and has been detected in
5 Eastern Europe. While primarily affecting birds at the present
6 time, at least one hundred forty-four human cases have been
7 reported in China, Vietnam, Thailand, Indonesia, Cambodia, and
8 Turkey with a mortality rate of approximately fifty per cent.
9 Scientists are particularly concerned about this highly
10 pathogenic strain of avian influenza currently circulating in
11 Asia and parts of Europe and agree that another influenza
12 pandemic is inevitable and possibly imminent.

13 Based on historical patterns, influenza pandemics can be
14 expected to occur on an average of three to four times each
15 century when new virus subtypes emerge and are readily
16 transmitted from person to person. However, the occurrence of
17 influenza pandemics is unpredictable. In the twentieth century,
18 the great influenza pandemic of 1918-1919, which caused an

1 estimated forty to fifty million deaths worldwide, was followed
2 by pandemics in 1957-1958 and 1968-1969.

3 An influenza pandemic has the potential to cause more death
4 and illness than any other public health threat. If a pandemic
5 influenza virus with a virulence similar to the 1918 strain
6 emerged today, it is estimated that, in the absence of
7 intervention, 1.9 million Americans could die and almost ten
8 million could be hospitalized over the course of the pandemic,
9 which may evolve over a year or more. Preparedness to lessen
10 the impact of a pandemic is imperative.

11 The purpose of this Act is to help protect the health,
12 safety, and welfare of Hawaii residents from this novel strain
13 of influenza by acquiring medications, mass clinic supplies,
14 laboratory supplies and equipment, personal protective
15 equipment, and a data management system for tracking cases and
16 contacts.

17 SECTION 2. There is appropriated out of the general
18 revenues of the State of Hawaii the sum of \$1 or so much thereof
19 as may be necessary for fiscal year 2006-2007 to acquire
20 medications, mass clinic supplies, laboratory supplies and
21 equipment, personal protective equipment, and a data management

1 system for tracking cases and contacts necessary to prepare for
2 a pandemic of a novel strain of influenza.

3 The sum appropriated shall be expended by the department of
4 health for the purposes of this Act.

5 SECTION 3. Notwithstanding any provision of this Act to
6 the contrary, the appropriation authorized under this Act shall
7 not lapse at the end of the fiscal year for which the
8 appropriation is made. Any unexpended and unencumbered balance
9 of the appropriation made in this Act as of the close of the
10 business on June 30, 2008, shall lapse.

11 SECTION 4. This Act shall take effect upon its approval.

H. B. 3140 H. D. 2

Report Title:

Public health; appropriation

Description:

Appropriation to prepare for a pandemic of a novel strain of influenza. (HB3140 HD2)

HB3140 HD2 HMS 2006-2162
