JUSTIFICATION SHEET

DEPARTMENT: Health

TITLE: A BILL FOR AN ACT RELATING TO THE HAWAII EARLY INTERVENTION COORDINATING COUNCIL.

PURPOSE: To revise the Hawaii Early Intervention Coordinating Council (HEICC) membership and duties to be consistent with the Individuals with Disabilities Education Improvement Act of 2004 (IDEA) (P.L. 108-446, Section 641) requirements regarding the State interagency coordination council.

MEANS: Amend section 321-353, Hawaii Revised Statute.

JUSTIFICATION: The HEICC membership should be consistent with the IDEA requirement that the State interagency coordinating council include the following individuals or representatives:

- (a) Parents of infants, toddlers, or children with disabilities age 12 or younger, including at least one parent of a child age 6 or younger (20% of members).
- (b) Providers of early intervention services (20% of members).
- (c) State legislature.
- (d) Personnel preparation.
- (e) State agencies involved in the provision of or payment for early intervention services.
- (f) Agency for preschool services.
- (g) State Medicaid agency.
- (h) Head Start agency.
- (i) Child care agency.
- (j) Agency for health insurance regulation.
- (k) Education of homeless children and youth.
- (l) State foster care representative.
- (m) Mental health agency.

The HEICC membership will also include a representative of the American Academy of

Pediatrics, since children's health care providers are part of the system of services for children with special needs.

The HEICC duties should be consistent with the IDEA requirement that the State interagency coordinating council "advise the State educational agency regarding the transition of toddlers with disabilities to preschool and other appropriate services."

Adding the duty to advise and assist the Department of Education on the transition of toddlers with disabilities to preschool and other appropriate services will not be a burden for HEICC. There is currently a close working relationship between the Department of Health/Early Intervention Section and the Department of Education regarding the transition of children receiving early intervention services to preschool special education.

Impact on the public: The broader council membership will help to ensure the provision and coordination of early intervention services to meet the needs of infants and toddlers and their families.

Impact on the department and other agencies: Representatives from the department and other agencies will be invited to serve as members of the HEICC.

Adding the duty to advise and assist the Department of Education on the transition of toddlers with disabilities to preschool and other appropriate services will not be a burden for HEICC. There is currently a close working relationship between the Department of Health/Early Intervention Section and the Department of Education regarding the transition of children receiving early intervention services to preschool special education.
