JUSTIFICATION SHEET

SB. NO. 2372

DEPARTMENT: Public Safety

TITLE: A BILL FOR AN ACT RELATING TO CONTROLLED SUBSTANCES.

PURPOSE: The purposes of this bill is to add the chemicals ephedrine, pseudoephedrine, and phenylpropanolamine to schedule V, as these substances are immediate precursors of amphetamine, a schedule II controlled substances; and to limit the exemption on single transaction retail sale of over-the-counter drug products containing ephedrine, pseudopseudoephedrine, or an ephedrine combination product to deter their use in clandestine laboratories to unlawfully manufacture methamphetamine.

This bill will also repeal section 329-75, Hawaii Revised Statutes, because it contradicts the more stringent conditions of the proposed amendments.

MEANS: Amend sections 329-22 and 329-64(a) and repeal section 329-75, Hawaii Revised Statutes.

JUSTIFICATION: To restrict the sales of cold medicines that can be used to manufacture the illegal and highly addictive drug methamphetamine by deleting the exemption on over the counter retail sales of pseudoephedrine and ephedrine combination products from section 329-64, Hawaii Revised Statutes; and to add chemicals used in that manufacturing process to Schedule V of the Controlled Substances Act.

Section 329-75, Hawaii Revised Statutes, will be repealed as it provides for less stringent conditions in the control of pseudoephedrine and ephedrine combination products. The proposed amendments to section 329-22, Hawaii Revised Statutes, will substantially limit the opportunity to steal these products from shelves of pharmacies and retail stores.
