# A BILL FOR AN ACT

RELATING TO THE HAWAII HEALTH SYSTEMS CORPORATION.

**BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:**

1       SECTION 1. The legislature finds that the State's  
2 community hospital system, Hawaii health systems corporation, is  
3 the fourth largest public hospital system in the nation. The  
4 Hawaii health system corporation's public health facilities  
5 provide essential safety-net hospital and long-term care  
6 services through out the State and are often the only hospitals  
7 in many rural communities. Due to rapid changes taking place in  
8 the health care industry, the legislature acknowledges that the  
9 governing structure of our public hospital system must provide  
10 the appropriate flexibility and autonomy needed to compete and  
11 remain viable and respond to the needs of the specific  
12 communities served by furthering the development of centers of  
13 excellence in health care.

14       The current administrative arrangement places the public  
15 hospital system in a single statewide quasi-public agency, the  
16 Hawaii health systems corporation. This arrangement is the  
17 result of landmark legislation, Act 262, Session Laws of Hawaii

1 1996, after years of study. Act 262 was largely the result of  
2 the work of a task force established pursuant to Act 266,  
3 Session Laws of Hawaii 1994, charged with studying the  
4 establishment of an agency for community hospitals, then a  
5 division of the department of health. On December 20, 1994, the  
6 task force issued its report to the governor and the legislature  
7 entitled "The Preliminary Report of the Governor's Task Force on  
8 the Establishment of An Agency for Community Hospitals." Many  
9 of the recommendations of the task force were adopted by the  
10 legislature, resulting in passage of Act 262, and the creation  
11 of the Hawaii health systems corporation in 1996.

12 One significant recommendation of the task force included  
13 the establishment of regional boards of directors, along with  
14 the system-wide board. The task force stated that:

15 "The Hawaii Health Systems Corporation should  
16 administer the state facilities in a decentralized  
17 fashion, with the facilities to be grouped into five  
18 regions. Three regions should be formed for the  
19 facilities of Kauai, Oahu and Maui Counties  
20 respectively, and the Big Island should be divided  
21 into Eastern and Western regions.

1 Each region should have an operating Board of Directors  
2 consisting of nine members. Regional Boards should be  
3 initially appointed by the Governor with the advice and  
4 consent of the Senate, and should subsequently be self  
5 perpetuating (i.e., with future Board appointments made  
6 by the current Board)."

7 During the 1996 conference committee hearings on S.B.  
8 No. 2522, which ultimately became Act 262, the regional board  
9 concept was replaced with regional management advisory  
10 committees. The management advisory committees represent the  
11 communities where the hospitals are located and meet with the  
12 management of the facilities and the Hawaii health systems  
13 corporation executives in order to give the communities a voice  
14 in the provision of these vital safety-net hospital services.

15 However, the legislature finds that the Hawaii health  
16 systems corporation has developed strong administrative and  
17 clinical leadership in all five regions and is now ready for the  
18 implementation of the regional board recommendation. Further,  
19 the regional board concept would enhance the ability of local  
20 communities and stakeholders to participate in the decision-  
21 making and operation of their own community hospitals. While  
22 the management advisory committees have been diligent in

1 representing the communities, their role has been solely  
2 advisory. Local community stakeholders, through independent  
3 regional boards, are in the best position to make the critical  
4 decisions relating to the local operation of their community  
5 hospitals. Additionally, regional boards would have the ability  
6 to address local needs and concerns in a more timely fashion.

7 The hospitals, through the Hawaii health systems  
8 corporation, should still engage in statewide activities where a  
9 systemwide approach may provide economies of scale,  
10 efficiencies, and inter-regional collaboration and cooperation.

11 The purpose of this Act is to advance the State's  
12 commitment to provide quality health care for the people of the  
13 State, by adopting the original task force recommendation of  
14 community-based governance and establishing a regional affiliate  
15 corporation for the Maui region as an initial step to more  
16 regional control for all regions, to be governed by a community-  
17 based regional board of directors, and to provide the necessary  
18 authority for each regional affiliate corporation to accomplish  
19 the goal of community-based governance. This Act also  
20 establishes the process for enabling other regions to develop  
21 regional boards and become a regional affiliate corporation.

SECTION 2. Chapter 323F, Hawaii Revised Statutes, is amended by adding four new sections to be appropriately designated and to read as follows:

"§323F-A Regional affiliate corporations and transfer of assets. (a) There shall be one regional affiliate corporation for each of the five regions specified in section 323F-2.
