
A BILL FOR AN ACT

RELATING TO RURAL PRIMARY HEALTH CARE TRAINING.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that there is a severe
2 shortage of primary care health providers in the State, which
3 threatens the health of our residents and affects healthcare
4 costs. This shortage has pushed the federal government to
5 designate a number of areas in the State, particularly rural
6 areas, as medically underserved areas, health professional
7 shortage areas, or as having medically underserved populations.
8 The legislature further finds that family physicians are
9 well-suited to rural healthcare due to the broad scope of their
10 practice, which encompasses inpatient, outpatient, and nursing
11 home settings, and addresses acute, chronic, and preventive
12 health across the life cycle. Many family physicians also
13 provide maternity care, family planning, and mental health
14 services through their practices.

15 The University of Hawaii John A. Burns school of medicine
16 currently offers a three-year residency program in family
17 medicine. The program emphasizes a system-based and
18 interdisciplinary team approach to healthcare. The mission of

1 the family medicine residency program is to meet the needs of
2 rural and medically underserved areas and populations in Hawaii
3 in a culturally sensitive and medically appropriate manner.
4 Family medicine program residents not only provide healthcare,
5 but also provide education and outreach at schools and community
6 events. Presently, family medicine program residents spend two
7 months in a federally-funded rural healthcare training
8 demonstration project, initiated in Hilo in 2006, in which
9 residents learn how to provide healthcare to medically
10 underserved patients in rural areas as they rotate among private
11 physician offices, emergency departments, and the community,
12 providing outreach and education. It is anticipated that the
13 Hilo rural health training program will be duplicated on Kauai.
14 Additional training sites will be developed in conjunction with
15 the health master planning process underway in Maui and with the
16 hospital and community health center system on Kauai. As these
17 sites are being developed, the curriculum can be structured so
18 that family medicine residents have the opportunity to rotate to
19 neighbor island sites other than Hilo.

20 The purpose of this Act is to increase access to primary
21 healthcare services provided by family physicians or residents
22 in the family medicine residency program at the University of

1 Hawaii to medically underserved residents in rural areas of the
2 State by appropriating funds to:

3 (1) Support and expand the family medicine residency
4 program of the University of Hawaii John A. Burns
5 school of medicine's department of family medicine and
6 community health to provide rural primary healthcare
7 services; and

8 (2) Develop a permanent statewide rural primary healthcare
9 training program in the county of Hawaii to expand the
10 rural healthcare training available for individuals in
11 the family medicine residency program of the
12 University of Hawaii John A. Burns school of medicine.

13 SECTION 2. There is appropriated out of the general
14 revenues of the State of Hawaii the sum of \$1 or so much thereof
15 as may be necessary for fiscal year 2007-2008 and the sum of \$1
16 or so much thereof as may be necessary for fiscal year 2008-2009
17 to support and expand the family medicine residency program of
18 the University of Hawaii John A. Burns school of medicine's
19 department of family medicine and community health to provide
20 rural primary healthcare services.

21 SECTION 3. There is appropriated out of the general
22 revenues of the State of Hawaii the sum of \$1 or so much thereof

1 as may be necessary for fiscal year 2007-2008 and the sum of \$1
2 or so much thereof as may be necessary for fiscal year 2008-2009
3 to develop a statewide rural primary healthcare training program
4 to provide family physicians to rural areas and improve
5 healthcare access for the people of Hawaii.

6 SECTION 4. The sums appropriated in sections 2 and 3 of
7 this Act shall be expended by the University of Hawaii John A.
8 Burns school of medicine for the purposes of this Act.

9 SECTION 5. There is appropriated out of the general
10 revenues of the State of Hawaii the sum of \$400,000 or so much
11 thereof as may be necessary for fiscal year 2007-2008 for the
12 Hawaii Quentin Burdick Rural Health Interdisciplinary Training
13 Program to continue its program addressing the shortage of
14 health care professionals in rural communities in the State.

15 The sums appropriated shall be expended by the University
16 of Hawaii school of nursing for the purposes of this Act.

17 SECTION 6. This Act shall take effect on July 1, 2020.

Report Title:

Primary Healthcare; Rural Areas

Description:

Appropriates funds to: (1) develop a statewide rural primary healthcare training program; (2) support the Family Medicine Residency Program of UH JABSOM's Department of Family Medicine and Community Health and (3) support the Hawaii Quentin Burdick Rural Health Interdisciplinary Training Program. Effective July 1, 2020. (SD1)
