
A BILL FOR AN ACT

RELATING TO DRUG ABUSE.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that crystal
2 methamphetamine addiction is a major contributor to crime in our
3 state and adversely affects many other aspects of our society.
4 In many cases, addicts commit crime to support their addictions.
5 The healing of or cure for the addiction is vital to the overall
6 well-being of Hawaii's people.

7 The legislature also finds that the PROMETA treatment
8 protocol may help curtail the often violent withdrawal cravings
9 of crystal methamphetamine addicts. Introduced in 2003, PROMETA
10 is an integrated, physician-based treatment protocol for
11 alcohol, cocaine, and methamphetamine dependence that uses a
12 combination of prescription medications and nutritional
13 supplements administered in a proprietary manner, and therapy.

14 The PROMETA treatment protocol consists of four steps:

15 (1) A comprehensive medical exam, including urine and
16 blood tests;

17 (2) Administration of oral and intravenous medications and
18 nutritional supplements over three consecutive days;

1 (3) A second physician-supervised treatment of two visits
2 on consecutive days, about three weeks after the
3 initial treatment; and

4 (4) One month of prescription medications and nutritional
5 supplements, coupled with individualized after-care.

6 Treatment takes place at a hospital facility, a treatment
7 center, or a physician practice that has licensed the rights to
8 use PROMETA, and does not require long periods away from home or
9 work.

10 Although the medications administered under PROMETA are
11 approved by the Food and Drug Administration, their combined
12 application in treatment of alcohol, cocaine, and
13 methamphetamine dependence have not yet been established.
14 Clinical studies are being conducted.

15 It is imperative that our State take immediate action to
16 control an addiction that has grown to epidemic proportions.
17 The PROMETA method of treatment is promising, and pilot studies
18 are already in progress in Arizona, Georgia, and South Carolina.

19 The purpose of this Act is to establish and appropriate
20 funds for:

21 (1) A review of pilot studies being conducted in other
22 states on use of the PROMETA treatment protocol to

1 address the withdrawal cravings of crystal
2 methamphetamine addicts; and

3 (2) A plan to adopt the PROMETA treatment protocol, if the
4 review is favorable, as an alternative drug abuse
5 treatment program for persons convicted of substance
6 abuse or related offenses.

7 SECTION 2. (a) The department of health and chairs of the
8 health committees of the senate and house of representatives
9 shall conduct a review of the pilot studies being conducted in
10 other states on use of the PROMETA treatment protocol to address
11 the withdrawal cravings of crystal methamphetamine addicts. The
12 review shall:

13 (1) Consider at least three pilot studies and their
14 results; and

15 (2) Determine whether the PROMETA treatment protocol is
16 successful in that it provides at least a thirty per
17 cent reduction in recidivism rates for crystal
18 methamphetamine users in the twelve months following
19 treatment.

20 (b) If the review is favorable, the State shall develop a
21 plan to adopt the PROMETA treatment protocol as an alternative
22 drug abuse treatment program for persons convicted of substance

1 abuse or related offenses. The plan shall include a process by
 2 which the prosecuting attorneys of each county screen and
 3 identify individuals to undergo the PROMETA treatment; provided
 4 that participation in the PROMETA treatment shall be on a
 5 strictly voluntary basis; provided further that participants
 6 shall indemnify the State of any adverse effects.

7 (c) The department of health shall submit to the
 8 legislature a report of its progress no later than twenty days
 9 prior to the convening of the regular session of 2008, and a
 10 report of its findings and recommendations, including any
 11 proposed legislation, no later than twenty days prior to the
 12 convening of the regular session of 2009.

13 SECTION 3. There is appropriated out of the general
 14 revenues of the State of Hawaii the sum of \$ or so much
 15 thereof as may be necessary for fiscal year 2007-2008 for a
 16 review of the pilot studies being conducted in other states on
 17 use of the PROMETA treatment protocol to address the withdrawal
 18 cravings of crystal methamphetamine addicts.

19 SECTION 4. There is appropriated out of the general
 20 revenues of the State of Hawaii the sum of \$ or so much
 21 thereof as may be necessary for fiscal year 2007-2008 to develop
 22 a plan to adopt the PROMETA treatment protocol as an alternative

1 drug abuse treatment program for persons convicted of substance
2 abuse or related offenses; provided that the department of
3 health shall conduct price negotiations for use of the PROMETA
4 treatment protocol.

5 SECTION 5. The sums appropriated shall be expended by the
6 department of health for the purposes of this Act.

7 SECTION 6. This Act shall take effect on July 1, 2050.

Report Title:

Drug Abuse Prevention; PROMETA

Description:

Establishes and appropriates funds for a review of pilot studies being conducted in other states on use of the PROMETA treatment protocol to address the withdrawal cravings of crystal methamphetamine addicts, and a plan to adopt the PROMETA treatment protocol, if the review is favorable, as an alternative drug abuse treatment program for persons convicted of substance abuse or related offenses.
