
A BILL FOR AN ACT

RELATING TO VACCINATIONS.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the possibility of
2 an avian influenza pandemic is real. Individuals weakened by
3 influenza often acquire a secondary infection with the
4 pneumococcal bacteria that causes pneumonia. While the
5 influenza virus itself can be lethal, all too often it is the
6 bacterial infection that kills. In the 1918 worldwide influenza
7 pandemic, there were five hundred thousand deaths in the United
8 States, of which about half were due to bacterial pneumonia.

9 While not all bacterial pneumonia is attributable to the
10 pneumococcus bacteria, it is the most common variety and the one
11 for which a vaccine exists. Developed thirty years ago, the
12 vaccine is recommended by the Centers for Disease Control's
13 National Immunization Program for people over age sixty-five and
14 those with chronic diseases or damaged immune systems. The
15 vaccine, which helps protect against twenty-three strains of
16 pneumococcal bacteria, has only very minor side effects, works
17 for five to ten years, and can be extended by a booster shot.

1 At a time when bacteria have become increasingly resistant
2 to antibiotics, including penicillin, prevention is the most
3 dependable line of defense.

4 The purpose of this Act is to provide free vaccinations
5 against the pneumococcal bacteria to certain at-risk individuals
6 statewide in order to reduce mortality in the event of an
7 outbreak of avian influenza.

8 SECTION 2. (a) The department of health shall administer
9 a vaccination program that offers free vaccination shots against
10 the pneumococcal bacteria statewide for any person who:

- 11 (1) Is age fifty and older;
- 12 (2) Has a history of chronic lung disease, heart disease,
13 cancer, diabetes, tuberculosis, or is Human
14 Immunodeficiency Virus-positive; or
- 15 (3) Meets current World Health Organization
16 recommendations for receiving the vaccination.

17 (b) The department of health shall cooperate with
18 community health centers in administering the vaccination
19 program.

20 SECTION 3. There is appropriated out of the general
21 revenues of the State of Hawaii the sum of \$1,000,000, or so
22 much thereof as may be necessary for fiscal year 2007-2008, and

1 the same sum, or so much thereof as may be necessary for fiscal
2 year 2008-2009, for a free statewide vaccination program against
3 the pneumococcal bacteria to certain at risk individuals in
4 order to reduce mortality in the event of an outbreak of avian
5 influenza.

6 The sum appropriated shall be expended by the department of
7 health for the purposes of this Act.

8 SECTION 4. This Act shall take effect upon its approval,
9 except that section 3 shall take effect on July 1, 2007.

Report Title:

Vaccinations; Pneumococcal Bacteria; Pneumonia

Description:

Provides free anti-pneumonia vaccinations to certain individuals statewide to reduce mortality in the event of an outbreak of avian flu. Appropriates \$1,000,000 to DOH.
