
A BILL FOR AN ACT

RELATING TO THE STATE CAPITOL BUILDING.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that currently the state
2 capitol building is in a transition period as more of the daily
3 operations, such as legislative hearings and public meetings,
4 rely on digital transmission. As a result, much time and effort
5 are expended in using a contractor to manually wire each
6 conference room of the state capitol for video broadcasts. This
7 temporary wiring also creates safety hazards during crowded
8 hearings, and it is particularly difficult for the disabled to
9 navigate over cords and wires in the halls and hearing rooms.

10 The legislature further finds that updating the wiring and
11 digital access in all public rooms in the capitol building would
12 save money, which can be used instead to enhance public
13 programming, as well as increase safety and ease of use for the
14 public.

15 The purpose of this Act is to appropriate moneys to upgrade
16 and enhance the wiring in the public rooms of the state capitol

1 building to increase digital access and to improve safety and
2 ease of use by the public.

3 SECTION 2. There is appropriated out of the general
4 revenues of the State of Hawaii the sum of \$80,000 or so much
5 thereof as may be necessary for fiscal year 2008-2009 to upgrade
6 and enhance the wiring in the public rooms of the state capitol
7 building, including the conference rooms used for public
8 hearings, the capitol auditorium, and both chambers, to increase
9 digital access and to improve safety and ease of use by the
10 public.

11 The sums appropriated shall be expended by the department
12 of accounting and general services for the purposes of this Act.

13 SECTION 3. This Act shall take effect on July 1, 2008.
