A BILL FOR AN ACT

RELATING TO QUEST ENROLLMENT.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that it is critical to
2 ensure universal health coverage for Hawaii's residents.
3 Hawaii's QUEST program goes a long way toward achieving this
4 goal. However, the program cannot accommodate all eligible
5 uninsured adults, and a cap has been placed on participation in
6 the QUEST program, thus excluding tens of thousands of eligible
7 individuals.

8 The current cap prevents many adults, especially non
9 pregnant women, who are income- and asset eligible from
10 enrolling in the program. These excluded but eligible adults
11 are at high risk for not obtaining necessary primary and
12 preventive care and necessary prescription drugs, and are more
13 likely to incur or generate unnecessary emergency room costs
14 because of their uninsured status. Uninsured adults are a
15 financial burden on hospitals, emergency rooms, community health
16 care centers, and others that provide uncompensated care.

1 The legislature further finds that almost fifty four per
2 cent of the funds needed to cover all eligible adults under the
3 QUEST program can be matched by the federal government.

4 The purpose of this Act is to expand enrollment in the
5 State's QUEST program by eliminating the enrollment cap.

6 SECTION 2. The department of human services shall submit a
7 request to the centers for medicare and medicaid services to
8 amend the state waiver to allow the State to remove its QUEST
9 enrollment cap. Upon securing the amendment to the state
10 waiver, the department of human services shall remove any cap on
11 enrollment in the State's QUEST program and shall enroll all
12 otherwise eligible individuals who are at or under three hundred
13 per cent of the federal poverty level. No monthly premium or
14 co-payment will be imposed on anyone who is at or below three
15 hundred per cent of the federal poverty level. The director of
16 human services shall adopt rules in accordance with chapter 91
17 to implement this section.

18 The department of human services shall implement these
19 changes so that those who are newly eligible pursuant to this
20 Act shall be qualified for benefits by July 1, 2009.

21 SECTION 3. There is appropriated out of the general
22 revenues of the State of Hawaii the sum of \$ or so

S.B. NO. 1727

1 much thereof as may be necessary for fiscal year 2007-2008 and
2 the same sum or so much thereof as may be necessary for fiscal
3 year 2008-2009 to expand healthcare coverage by eliminating the
4 cap on enrollment in the State's QUEST program.

5 The sums appropriated shall be expended by the department
6 of human services for the purposes of this Act.

7 SECTION 4. This Act shall take effect on July 1, 2007.

Report Title:

QUEST Eligibility; Eliminate Enrollment Cap

Description:

Eliminates cap on enrollment in the QUEST program and make eligible anyone at or below 300 per cent the federal poverty level. Directs the Department of Human Services to apply for an amendment of the state waiver from the Centers for Medicare and Medicaid Services. Appropriates funds.

JAN 24 2007

A BILL FOR AN ACT

RELATING TO A TWO-YEAR HEPATITIS C DEMONSTRATION PROJECT.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that Hawaii has the
2 highest rate of liver cancer in the United States due to the
3 high rate of chronic viral hepatitis in our state. There are
4 over fifteen thousand people that have tested positive for
5 hepatitis C in Hawaii.

6 Each year, approximately ten thousand to twelve thousand
7 people in the United States die from hepatitis C. It is
8 estimated that by the end of this decade deaths from hepatitis C
9 will increase sixty to two hundred per cent.

10 Hepatitis C is also the leading cause of liver transplant
11 in the United States. Many people who are infected with this
12 silent epidemic wait until they feel ill before being tested,
13 when it can be more difficult, extremely expensive, or may even
14 be too late to be treated.

15 The legislature further finds that testing, early medical
16 follow-up, and treatment are needed to save lives. Proactive
17 public health intervention is needed to reduce costs to our

1 public health system instead of the high costs that can occur
2 without proactive public health intervention.

3 The purpose of this Act is to provide funding for a two-
4 year demonstration model at the Waikiki Health Center and the
5 West Hawaii Community Health Center, that includes hepatitis C
6 testing, case management, and treatment.

7 SECTION 2. There is appropriated out of the general
8 revenues of the State of Hawaii the sum of \$120,000 or so much
9 thereof as may be necessary for fiscal year 2007-2008 and the
10 same sum or so much thereof as may be necessary for fiscal year
11 2008-2009 to provide testing, case management, treatment,
12 surveillance, research, and outcome assessments during a two-
13 year hepatitis C demonstration project at the Waikiki Health
14 Center and the West Hawaii Community Center.

15 The sums appropriated shall be expended by the Department
16 of Health's STD/AIDS Prevention Branch for the purposes of this
17 Act.

18 SECTION 3. This Act shall take effect on July 1, 2007.
