
A BILL FOR AN ACT

RELATING TO EDUCATION.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that:

2 (1) Textbook shortages continue to be an issue for many
3 Hawaii schools;

4 (2) The average weight of a backpack in middle school can
5 be as much as twenty pounds, and some doctors
6 recommend that individuals never carry more than ten
7 per cent of their body weight to avoid injury;

8 (3) Some schools do not have enough textbooks to allow
9 students to bring them home to study; and

10 (4) Textbooks typically cost between \$60 and \$90 each, and
11 even when there are enough books for each student in a
12 class, they can sometimes be too valuable to be
13 allowed to leave the classroom.

14 An insufficient number of textbooks in a classroom can
15 cripple the teacher's ability to teach and the student's ability
16 to learn. Maintaining updated textbooks for every public school
17 student in the State would cost tens of millions of dollars.

1 Even when textbooks are relatively current, they cannot provide
2 a complete curriculum, and teachers must supplement their lesson
3 plans with handouts on the latest research.

4 The academic landscape has expanded to include a range of
5 resources that were technologically impossible a few years ago,
6 and the traditional textbook may no longer be considered as
7 central to a curriculum as it once was. E-books are text
8 documents that have been converted and "published" in a digital
9 format that display on specialized reading devices or computers.
10 E-books can be stored and read on laptops, pocket computers, and
11 e-book reading devices for access at any time, and a gigabyte of
12 computer chip storage space can contain two hundred illustrated
13 reference books, three hundred fifty legal volumes, or about two
14 thousand five hundred 600-page novels. E-books can present text
15 in a more user-friendly style than traditional books, and can
16 allow users to adjust text size, bookmark a page, take notes
17 within a book, highlight portions of the text, add drawings,
18 look up definitions, search within the text, copy and paste
19 selected text to other programs, and can be electronically read
20 aloud. E-book software could be updated more often and at lower
21 costs to schools over time.

1 The legislature finds that e-books can be considered
2 stronger, dynamic, interactive versions of traditional textbooks
3 that use computer programs that can respond in real time to a
4 student's work with personalized feedback, thereby tailoring and
5 improving the learning experience to meet the individual needs
6 of the student. These online textbooks can provide on-demand
7 suggestions, guided solutions, quizzes, and multiple problem
8 examples and explanations. E-books allow students to learn at
9 their own pace, without the time pressure or fear of answering
10 incorrectly in front of their peers, which can be present in a
11 group learning situation. There are many online libraries and
12 organizations that make available a large number of e-books for
13 little or no cost.

14 The legislature finds that e-books permit teachers to work
15 more effectively with a range of students, allowing faster
16 learners to forge ahead while giving other students more time to
17 grasp certain concepts.

18 The purpose of this Act is to direct the department of
19 education to conduct a feasibility study on converting hard
20 cover textbooks to e-books.

21 SECTION 2. (a) The department of education is directed to
22 conduct a feasibility study on converting hard cover text books

1 to e-books for use in public schools. The study shall include,
2 but not be limited to, considerations of cost and computer
3 accessibility.

4 (b) The department of education shall report its findings
5 and recommendations, including cost estimates, to the
6 legislature no later than twenty days prior to the convening of
7 the regular session of 2008.

8 SECTION 3. This Act shall take effect upon its approval.

Report Title:

DOE; Education; E-Books; Study

Description:

Directs the department of education to conduct a study of converting hard cover textbooks to e-books. Report to 2008 legislature. (SD1)
