SENATE RESOLUTION

URGING THE DEPARTMENT OF EDUCATION TO ONLY PURCHASE OR LEASE
LARGE SCHOOL BUSES THAT HAVE AN OPERABLE SEAT BELT ASSEMBLY
AT ALL DESIGNATED SEATING POSITIONS AND SEAT BACKS THAT ARE
AT LEAST TWENTY-FOUR INCHES IN HEIGHT.

1 WHEREAS, federal and state laws require certain motor
2 vehicle drivers and passengers to use seat belts because seat
3 belts provide a measure of protection during accidents; and
4

5 WHEREAS, passenger cars, light trucks, and vans are
6 required under federal law to have seat belts at all designated
7 seating positions; and
8

9 WHEREAS, neither federal nor Hawaii law requires seat belts
10 on school buses that have a gross vehicle weight rating of more
11 than ten thousand pounds, which is the standard weight of a
12 large school bus; and
13

14 WHEREAS, despite increased federal standards for school bus
15 passenger safety and crash protection, there are still thousands
16 of injuries to children throughout the country each year due to
17 school bus accidents; and
18

19 WHEREAS, children suffer both minor and serious injuries to
20 their head, neck, back, and stomach when striking the roof,
21 windows, seat backs, and other school bus passengers during
22 crashes; and
23

24 WHEREAS, opponents of seat belts on large school buses
25 argue that strong, well-padded, energy absorbing seats and
26 higher seat backs compartmentalize passengers during a crash,
27 thereby providing adequate safety; and
28

29 WHEREAS, a comprehensive, in-depth study in 1989 by the
30 Transportation Research Board found that seat belts provide
31 additional crash protection on compartmentalized school buses;
32 and
33

1 WHEREAS, in addition, a National Highway Traffic Safety
2 Administration study found that approximately one-third of the
3 fatal crashes between 1977 and 1992 were non-frontal crashes
4 from which compartmentalization is not designed to protect; and
5

6 WHEREAS, most school bus fatalities occur in rollovers; and
7

8 WHEREAS, crash test and case study data indicate that seat
9 belts provide improved crash protection and are especially
10 beneficial in side-impact and rollover school bus accidents; and
11

12 WHEREAS, seat belts also reduce other types of injuries by
13 restraining children who may otherwise be out of their seats,
14 thereby improving passenger behavior and reducing distractions
15 to school bus drivers; and
16

17 WHEREAS, California, Florida, Louisiana, New Jersey, and
18 New York require school buses to meet a higher safety standard
19 than established under federal law; now, therefore,
20

21 BE IT RESOLVED by the Senate of the Twenty-fourth
22 Legislature of the State of Hawaii, Regular Session of 2008,
23 that the Department of Education is urged to only purchase or
24 lease large school buses that have an operable seat belt
25 assembly at all designated seating positions and seat backs that
26 are at least twenty-four inches in height; and
27

28 BE IT FURTHER RESOLVED that the Department of Education is
29 urged to adopt rules requiring the use of seat belt assemblies,
30 when available, by pupils and appropriate school discipline for
31 any pupil in violation; and
32

33 BE IT FURTHER RESOLVED that certified copies of this
34 Resolution be transmitted to the Chairperson of the Board of
35 Education and the Superintendent of Education.
