Honorable Vice Chair Mele Carroll*

I would like to testify that I am in Strong Support of HCR 310 and HR 258

As an architect participating in and attempting to promote the design of green buildings, I was quite surprised at the extensive restrictions on the re-use of grey water that our counties have in place. The concept has been proven to work in many other parts of the country with benefits in the long term that far outweigh any perceived concerns.

Thank you for allowing me to testify.
