Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee

Committee-Chair: Senator Roz Baker

Hearing-Date: Monday, Feb 25, 2008, 10:30am

My_Testimony_is: I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee

Committee-Chair: Senator Roz Baker

Hearing-Date: Monday, Feb 25, 2008, 10:30am

My_Testimony_is: I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. I have been diving in Hawaii, mostly Maui, for the past 20 years, every year, sometimes twice a year. I have noticed the disappearance of species, particularly one of my favorites, the harlequin shrimp. I used to love watching them, in pairs or three... but haven't seen them for the past five years or so. I am quite certain that other species have dwindled to such a point, but at this quick writing, cannot name them. I only know that diving in Maui is not the same as it was 10 or 15 years ago.

Sincerely,
Helen Malnar

Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee

Committee-Chair: Senator Roz Baker

Hearing-Date: Monday, Feb 25, 2008, 10:30am

My Testimony is: As an avid scuba diver and environmentalist, it is critical to limit aquarium industry take. I do my best to not support businesses that have salt water aquariums. Over the years, I've seen depletion of key species in our Hawaiian reefs. At the rate we are going, the children of today will never see a Yellow Tang in our waters! This must be stopped.

I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Kinau. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee
Committee-Chair: Senator Roz Baker
Hearing-Date: Monday, Feb 25, 2008, 10:30am
My_Testimony_is: I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Committee-Chair: Senator Roz Baker

Hearing-Date: Monday, Feb 25, 2008, 10:30am

My_Testimony_is: I support SB 3225 to regulate aquarium collection, with amendments as noted below. I support DAR's request for verification of catch reports.

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish interim FRA zones on the north shores and south shores of Kauai. Establish a limited entry program for all areas of all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors. b) Permits will be non-transferable. c) Permits will be non-renewable.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill should increase with each occurrence and should start at 5 times the retail value of the fish collected. Three or more violations should be cause for license revocation.

Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee

Committee-Chair: Senator Roz Baker

Hearing-Date: Monday, Feb 25, 2008, 10:30am

My_Testimony_is: I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

I do not live on Kauai anymore but have been blessed to live there for a short period. I have noticed fewer fish in the snorkeling areas and am concerned. I would like Kauai to be listed on this bill also.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee
Committee-Chair: Senator Roz Baker
Hearing-Date: Monday, Feb 25, 2008, 10:30am
My_Testimony_is: I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee

Committee-Chair: Senator Roz Baker

Hearing-Date: Monday, Feb 25, 2008, 10:30am

My Testimony is: As a avid snorkeler it is obvious that uncontrolled fishing and the aquarium fish trade are causing an havoc with the ocean environment. It does require much scientific knowledge to see the destruction of the ocean ecosystem. Hawaii's future depends on its ocean. Please consider the consequences of ignoring this situation now.

I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee

Committee-Chair: Senator Roz Baker

Hearing-Date: Monday, Feb 25, 2008, 10:30am

My_Testimony_is: My name is Jacqueline Roberts and I have lived on the islands since 1977. I've been an avid windsurfer and use to anchor out at Tunnels Beach over 20 years ago windsurf and snorkeling all day long. Back then I remember seeing lots of yellow tangs, but nowadays I see virtually none. It's apparent to us here on Kauai that Reef Fish Collectors have come to Kauai and stripped out the yellow tangs, and possibly other species as well. That DLNR say we don't have an aquarium fish trade on Kauai is not exactly true, and if the yellow tang replenishes the collectors will return. Please give due consideration to include Kauai in Bill SB3225 -- Kauai also needs protection from Fish Replenishment Areas. The earlier version of the Bills, imposing bag limits to 20 fish a day was much more pono and supportive of sustainable fish populations, and protection of our economy as well. Please re-introduce bag limits into the latest version of the Bill. I also support the amendments listed below.

Many mahalo's for your consideration.

I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee
Committee-Chair: Senator Roz Baker
Hearing-Date: Monday, Feb 25, 2008, 10:30am
My_Testimony_is: I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee
Committee-Chair: Senator Roz Baker
Hearing-Date: Monday, Feb 25, 2008, 10:30am
My_Testimony_is: I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee

Committee-Chair: Senator Roz Baker

Hearing-Date: Monday, Feb 25, 2008, 10:30am

My Testimony is: Aloha, I am a 30 year resident of Kauai, and have logged over 175 scuba dives here since 1978, in addition to hundreds of snorkeling outings all around Kauai. I am shocked and very distressed at the decimation of reef fish and degradation of the reef I have witnessed. I find it unconscionable the aquarium trade continues to harvest young fish unregulated. Our entire ecosystem depends on a healthy reef. Healthy and abundant oceans or money...think about it folks, we must live in harmony with nature, that is what is Pono. I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. 2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

7) Establish an interim FRA's at; Nualolo Kai, Makua Beach (Tunnels), Makahoa point to Kenomene Beach, Kauapea Beach to Mokolea point, Ahukini Landing to Ninini Point, Kipu Kai to Mahaulepu Beach, Lawai Beach to Numilo Fish Pond, Pakala Village to A'akukui Beach.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee

Committee-Chair: Senator Roz Baker

Hearing-Date: Monday, Feb 25, 2008, 10:30am

My Testimony is: Aloha, I have long been an advocate to protect our natural resources. I have seen elderly people feed our fish cheeze-whiz. I have seen frenzied fish charging little children who then gulp too much water and safety compromised. I have seen the dwindling fish stocks in the 10 years since living here.

WE NEED TO DO ALOT MORE TO PROTECT OUR REEFS which includes more messages to those arriving by plane and people should be required to sign a document saying they will not harm such resources, just as they sign a document saying they are not bringing in fruit!!! Our ocean economy is just as vulnerable as our agriculture!

I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee

Committee-Chair: Senator Roz Baker

Hearing-Date: Monday, Feb 25, 2008, 10:30am

My_Testimony_is: I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Additional, I am an avid scuba diver and have personally seen how some collectors are being very destructive to the reef while in pursuit of the fish they are attempting to collect. We must have some means put in place to better monitor these practices. Our reefs are priceless and in need of our protection as they protect us - in the event of major oceanic activity (ie: tsunami) they are our first line of defense! Please support this bill as it preserves a vital natural resource!

Mahalo nui loa ... please remember UA MAU KE EA O KA AINA E KA PONO (my apologies if this is misspelt no Hawaiian spell check yet)

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

I spend a few weeks on the Big Island every year or two, and the health of reef fish populations is of utmost importance to me. It is one of things that defines the islands for residents and visitors alike. Let's do every reasonable thing we can to ensure that Hawaii's reefs are protected and secured for future generations in this age of global changes.

My_Testimony_is: Dear Senator Baker,

How is it possible that Hawaii, of ALL places our HAWAII(!) is struggling over legalizing the exploitation of one of it's greatest natural resources, it's most magnificent "calling card" to the rest of the world? At a time when the whole world is FINELY getting a heart and mind for preserving and nurturing nature and protecting the planet for future generations, HAWAII, one of the MOST beautiful natural wonders on earth, is seriously considering actions that are irresponsible, disrespectful, and without vision for it's own natural resources. I cannot adequately express how disappointing this controversy has been and how much doubt it has planted in my mind about the leadership in office. If Hawaii's fish are not going to be protected for the future of the reefs, what will you sell off next?

I support SB 3225 to regulate aquarium collection, with amendments as noted:

- 1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.
- 2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.
- 3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.
- 4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.
- 5) Permits will be valid only on the island for which they are issued.
- 6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.

Subject: Testimony for SB 3225

Committee: Senate Ways & Means Committee

Committee-Chair: Senator Roz Baker

Hearing-Date: Monday, Feb 25, 2008, 10:30am

My_Testimony_is: My wife & I vacation in Hawaii at least once a year since 1990. Our main purpose is to SCUBA and do underwater photography. It is extremely important to protect the reefs & fish (many of which can only be found in Hawaii). We have noticed a large growth of the turtle population in Hawaii since laws were introduced to protect them. Many people SCUBA & snorkel to see the turtles & the fish.

About 28 yrs ago we used to try to maintain a salt water aquarium. It was a lot of work, but also, very discouraging. There were some species of fish we purchased that would die, not because of our lack of care, but because of the way they were caught in the ocean.

I support SB 3225 to regulate aquarium collection, with amendments as noted:

Testimony to date is 3 to 1 in support over opposition. Support reflects a wide and varying cross section of community groups, advisory groups, user groups, Hawaiian Civic Clubs, Maui County's mayor and community leaders. Those opposed are all aquarium collectors, exporters, re-sellers and suppliers.

1) Establish an interim FRA for South Maui from Kahekeli Park heading south to Ahihi Keanou. This would span an open area between two existing management areas, and it takes up far less than the 30% of Maui's shoreline prescribed. Olowalu south past Ukumehame is all finger coral and could be a prime recovery area if protected.

2) Establish an interim FRA for Oahu covering all of Kaneohe Bay. Three Hawaii Civic clubs are clamoring for this recovery for their species and habitat. They have suffered massive coral destruction there.

3) Establish a limited entry program for all islands as drafted by the West Hawaii Fisheries Council and DAR, with the following changes: a) There will be no exceptions to the limited entry program for those licensed and permitted collectors outside West Hawaii. b) Permits will be non-transferable. c) Permits will be non-renewable outside West Hawaii.

4) Establish an interim no-take list effective immediately to include all species known to die in transit or soon after. This interim no-take list shall be replaced by a permanent no-take list once adequate science occurs to develop that list.

5) Permits will be valid only on the island for which they are issued.

6) Fines for collecting marine species in violation of any of the terms of this bill will be: \$50/fish for the 1st offense, \$100/fish for the 2nd offense, \$200/fish for the 3rd offense, permit revoked on the 4th offense.

I support DAR's request for verification of catch reports, and further request that any and all appropriation(s) be deleted from this bill.
