The Honorable Clayton Hee, Chair  
and Members of the Committee on  
Water and Land  
The Senate  
State Capitol  
Honolulu, Hawaii 96813

Dear Chair Hee and Members:

**Subject: House Bill No. 2523  
Relating to the Land Use Commission**

The Department of Planning and Permitting **supports** House Bill 2523, which requires the Land Use Commission to explicitly consider county general plans and regional development plans in its deliberations over requests for land reclassification.

Please adopt House Bill 2523.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Henry Eng", is written over the typed name and title.

March 26, 2008

**The Honorable Clayton Hee, Chair**  
Senate Committee on Water and Land  
State Capitol, Room 228  
Honolulu, Hawaii 96813

**RE: H.B. 2523, Relating to the Land Use Commission**  
**Hearing Date: Friday, March 28, 2008 @ 2:45 p.m., Room 414**

On behalf of our 10,000 members in Hawaii, the Hawaii Association of REALTORS® (HAR) supports H.B. 2523.

The Smart Growth initiatives that were introduced this session were well received. To really bring the message home about Smart Growth, the HAR's Government Affairs Committee sponsored a forum to discuss these principles with legislators.

In January 2008, in front of a standing-room-only crowd, Realtor Ken Chong shared his wisdom and experience through similarities between Smart Growth principles of today and those done when developing Hawaii Kai forty years ago. The dynamic speaker Katherine Perez, from Forest City, discussed transient-oriented development initiatives conducted in Oakland that stressed the importance of combining mixed-use & mixed-income communities with public transportation.

Each county is unique and one size does not fit all; county governments understand their situations and needs better than any other governing body. The HAR also supports passage of **HB2522, which allows individual counties to reclassify lands of not more than 50 acres and provide for the consolidation of the boundary amendment process with county proceedings.**

The HAR believes that both HB2522 and HB2533 will complement each other in State and County land use approvals by allowing counties to reclassify parcels of land of less than 50 acres while permitting the Land Use Commission to include and consider a County's General Plan.

Mahalo for the opportunity to testify.

2:45 PM  
State Capitol, Conference Room 414

in consideration of  
**HB 2523**  
**RELATING TO THE LAND USE COMMISSION.**

Chair Hee, Vice Chair Kokubun, and Members of the Senate Committee on Water and Land.

The Office of Planning supports HB 2523 which would require the State Land Use Commission (LUC) to consider County plans in their decision-making on district boundary amendments.

Requiring the LUC to consider the county general plan and adopted community or development plans when making decisions is supportive of good planning practice. In fact, the LUC already has adopted in its own administrative rules (Section 15-15-77(b)(4), Hawaii Administrative Rules) a requirement that "...In establishing the boundaries of the districts in each county, the commission shall give consideration to the general plan of the county in which the land is located." Also, the Office of Planning, as a matter of practice, incorporates the status of county general and adopted community or development plans into our reviews and position statements on all petitions. Therefore, passage of the proposed bill would serve to more closely align Section 205-17, Hawaii Revised Statutes, with current practice.

Thank you for the opportunity to testify.

March 27, 2008

TO: Honorable Clayton Hee, Chair  
Senate Committee on Water and Land

FROM: G. Riki Hokama   
Council Chair

SUBJECT: **HEARING OF MARCH 28, 2008; TESTIMONY IN SUPPORT OF HB 2523,  
RELATING TO THE LAND USE COMMISSION**

Thank you for the opportunity to testify in support of this important measure. The purpose of this measure is to require the Land Use Commission to consider each county general plan and all community, development, or community development plans adopted pursuant to the county general plan when making land use classification decisions.

The Maui County Council has not had the opportunity to take a formal position on this measure. Therefore, I am providing this testimony in my capacity as an individual member of the Maui County Council.

I support this measure for the following reasons:

1. County general plans, community plans, and other long-range plans adopted pursuant to the general plans are enacted after lengthy review and consultation, with considerable input from the public (including volunteer commissioners), county agencies, and State agencies. Requiring the Land Use Commission to formally acknowledge and contemplate these plans is a matter of basic respect and common sense.
2. The best land use decisions are those made at the local level of government, and this measure will help to ensure that the Land Use Commission gives due consideration to counties' decisions as expressed in their long-range plans.
3. With Maui County currently working on an update of its General Plan, this measure is timely.

For the foregoing reasons, I support this measure.

Council Chair  
G. Riki Hokama

Vice-Chair  
Danny A. Mateo

Council Members  
Michelle Anderson

**Senate Committee on: Water and Land**  
**Attn: Honorable Clayton Hee, Chair**  
**Testimony Supporting HB2523: Relating to the Land Use Commission**

**February 28, 2008**

Aloha Chair Hee and Members of the Committee:

Thank you for the opportunity to testify on this important measure. As the Maui County Council has not had opportunity to take a formal position on this measure, I am providing this testimony in my capacity as an individual member of the Maui County Council.

**I strongly support HB 2523 for the following reasons:**

1. Land use decisions that affect residents living and working within the counties should be made at the level closest to the people. This measure will help to ensure that the Land Use Commission gives due consideration to counties' decisions as expressed in their long-range plans.
2. County general plans and community plans are key long-range planning documents that reflect current and anticipated conditions of the counties, including population and physical development patterns; unique problems and needs of the regions; social, economic, and environmental consequences related to potential developments; and, the desired sequence patterns and characteristics of future developments.
3. These long-range plans are enacted after lengthy review and detailed input from the public, County agencies, and State agencies.
4. As Maui County is currently working on an update of its General Plan, this measure is timely.

For the foregoing reasons, I support HB 2523.

Sincerely,

  
Michelle Anderson,  
Council Member

RL: 2207

HB 2523  
RELATING TO THE LAND USE COMMISSION

Senate Committee on Water and Land  
Public Hearing – March 28, 2008  
2:45 p.m., State Capitol, Conference Room 414

by  
Peter Flachsbart, Urban and Regional Planning  
David Callies, Richardson Law School  
Peter Rappa, Environmental Center

HB 2523 amends the Land Use Commission's decision-making criteria to include the County General Plan and plans adopted pursuant to the general plan. Our statement on this measure does not represent an institutional position of the University of Hawaii.

This bill proposes that the state Land Use Commission consider one additional criterion in its review of petitions for reclassification of district boundaries. The new criterion is:

"(5) The county general plan and all community, development, or community development plans adopted pursuant to the county general plan, as they relate to the land that is the subject of the reclassification petition."

This revision appears to remove inconsistencies that may arise between the state's land use boundaries and the urban district boundaries of the county general plans or community development plans at the county level. This revision may address a weakness in the present law as it affects decision-making by the Land Use Commission

While adding county plans and related laws to the mix of what the LUC should consider among the other specifics in that portion of the Land Use Law to be amended is a good idea, the concept of specific inquiries generally is flawed in its execution. The LUC should be concerned only with broad classification issues under the Land Use Law: do we need more urbanization where and when there is a proposal for a boundary amendment to Urban from either Agriculture or Conservation Districts. It is inappropriate for the LUC to inquire into precise proposed uses/projects. That's the responsibility of the relevant

**THE UNIVERSITY OF HAWAII ENVIRONMENTAL CENTER IS  
PLEASED TO SUBMIT THIS TESTIMONY IN ACCORDANCE  
WITH ACT 132 OF 1970 WHICH CREATED THE CENTER.  
AUTHORS ARE MEMBERS OF THE UNIVERSITY COMMUNITY.**

county. Only if the LUC is petitioned for a special use permit is it entitled to ask about specific projects.

Indeed, it would be useful for the Legislature to consider an amendment making this whole section relevant only for special use petitions - rather than land use boundary change -, in order to confine the Commission to its broad-brush role (urban, rural, agric. or conservation) as envisioned when the Land Use Law was originally passed, leaving the rest, appropriately to the counties.

Thank you for the opportunity to comment on this bill.

**Testimony in Support of the Intent of SCR17/SR11 With Cautions**

Senate Committee on Water and Land  
Room 414 on Friday, 28 March 2008

Chair Hee and Respected Members of the Committee;

My name is Reg White. I live work and play in our local marine environment. I truly support the intent of this resolution to explore the establishment of bag limits for ornamental reef fish as a way to preserve and perpetuate the resource, but I have serious concerns that this is an unfunded mandate for DLNR as they are already taxed to the hilt in so far as enforcement resources are concerned. We have posted no fishing areas now that are not enforced just because of a lack of sufficient manpower to do the job. Please work with the department to see what is needed to accomplish this goal and then support them in going forward.

Sincerely,

Reg White

**On Senate Concurrent Resolution 17/Senate Resolution 11– URGING THE DEPARTMENT OF  
LAND AND NATURAL RESOURCES TO DEVELOP AND ADOPT ADMINISTRATIVE  
RULES REGARDING THE CREATION AND ENFORCEMENT OF BAG LIMITS FOR  
ORNAMENTAL REEF FISH.**

**BEFORE THE SENATE COMMITTEE ON  
WATER AND LAND**

March 28, 2008

Senate Concurrent Resolution 17/Senate Resolution 11 urge the Department of Land and Natural Resources (Department) to develop and adopt administrative rules for the creation and enforcement of bag limits for ornamental reef fish. The Department provides qualified support for the intent of these resolutions and offers the following comments.

The current legislative session has witnessed wide ranging and constructive dialogue regarding the ornamental fish industry, and various means by which it might be further regulated. Based on this, the Department expects to initiate discussions with the public in regard to the issue, and to investigate options such as area-based management, limited entry for commercial fishers, and full protection for species considered to be at risk or of particular concern. These discussions are also expected to include the subject of catch restrictions or bag limits. The Department perceives that there is a clear need to move forward with some additional regulation of this fishery, but notes that the wide range of opinions regarding the proper course of action also necessitates considerable consultation with all stakeholders prior to such rulemaking, in order to ensure fairness and transparency.

Thank you for the opportunity to testify.

SR 11 and SCR 17 Testimony, Senate Water & Land Committee

Senator Clayton Hee, Chair  
Senator Russell S. Kokubun, Vice Chair  
Committee on Water and Land  
Mike Moran (808) 891-9176  
Kihei Community Association (808) 879-5390  
Maui, HI  
Friday March 28, 2008 2:45 PM in conference room 414.

Support of SR 11 and SCR 17 Relating to Fishing

The Kihei Community Association (KCA) on Maui strongly supports SR 11 and SCR 17. The coral reefs in Hawaii are dying & the fish that support the ecosystem are quickly disappearing. Without immediate action, we will reach a point from which this vital component of Hawaii may be lost forever. A root cause of this problem is originated by actions outside of Hawaii, as we have seen so many times, by unscrupulous aquarium fish "collectors" worldwide who harvest millions of our reef fish each year, strictly for their financial gain. In addition to the natural loss, this action is detrimental to the state's economy, as it reduces the appeal of Hawaii's visitor industry, as so much of it is based on our ocean life quality. The ocean-based portion of this industry generates about \$1 billion each year.

The KCA respectfully urges your committee to pass both resolutions SR 11 and SCR 17. Mahalo for this opportunity to testify on this important matter.

Sincerely,

Mike Moran  
VP, Kihei Community Association

**To:** testimony  
**Subject:** WTL Committee, March 28, 2008, 2:45; SR 11 & SCR 17 in Support

Dear Senator Hee & Members of the Senate Water & Land Committee,

I support SR 11 and SCR 17 to urge DLNR/DAR to establish and enforce bag limits on "ornamental" reef fish.

Current aquarium trade practices, as allowed and promoted by the DLNR/DAR are detrimental to Hawaii's reefs, fish and people.

The unlimited catch, collection permits and locations that the DLNR has been allowing for decades has been proven by their own studies to have significant negative impacts.

Please urge DLNR/DAR to begin responsible protection of these species and habitats, and support the restoration of thriving, healthy and beautiful Hawaiian reef systems.

Thank you.

## KO`OLAUPOKO HAWAIIAN CIVIC CLUB

March 27, 2008

Senator Clayton Hee, Chair  
And Members  
Senate Committee on Water & Land  
Hawai'i State Senate  
State Capitol  
Honolulu, HI 96813

**SUBJECT: SCR 17 and SR 11, Urging the Department of Land and Natural Resources to Develop and Adopt Administrative Rules Regarding the Creation and Enforcement of Bag Limits for Ornamental Reef Fish**

On behalf of the Ko'olaupoko Hawaiian Civic Club, we offer our strong support for these two resolutions, Senate Resolution 11 and Concurrent Resolution 17, calling upon the DLNR to develop and adopt rules establishing bag limits and enforcement to protect ornamental reef fish.

The Ko'olaupoko Hawaiian Civic Club represents nine ahupua`a around Kane`ohe Bay. Our members monitor the bay closely, and we are deeply concerned about the health and sustainability of this important community resource. We have become increasingly alarmed at the decreasing numbers of native species, particularly native fish, over the past few years. Some that used to be plentiful in the past are now seen more infrequently and in smaller numbers.

We commend and applaud the author of these resolutions and all of you who care about our `aina and our ocean resources. As stewards of these areas, we are all responsible for protecting and preserving those things which are endangered or threatened, and which are valuable to all of us.

Testimony on SR11 and SCR 17 – Hearing Mar 28 2008

Page 2

Ko`olaupoko Hawaiian Civic Club

These resolutions will provide DLNR with the legislative encouragement needed to do what is pono for the protection of our native species in Kane`ohe Bay.

Please support these resolutions and pass them out of committee.

Mahalo nui loa.

Me kealoha pumehana,

/s/ MAHEALANI CYPHER

President

## testimony

---

**From:** makalea@honualani.com  
**Sent:** Wednesday, March 26, 2008 6:16 PM  
**To:** testimony  
**Subject:** Support for SR 11 & SCR 17

Committee: Senate Water & Land Committee  
Committee-Chair: Senator Hee  
Hearing-Date: Friday, March 28, at 2:45pm  
My\_Testimony\_is: Dear Senator Hee & Members of the Senate Water & Land Committee,

I support SR 11 and SCR 17 to urge DLNR/DAR to establish and enforce bag limits on a  
œœornamentalâœ reef fish.

Aquarium collectors are now unlimited on Hawaii reefs. Neither the number of collectors nor the number of fish they can take is regulated or limited in Hawaii. Reefs around the world are in peril. The health of our reefs depends partly on reef fish who feed on algae. As you know invasive algae is becoming a very serious problem in Hawaii. On the island of Kauai sea turtles now have algae growing on their shells, and are dying of various diseases. We no longer see shore fishermen as there are so few fish to catch. The reef fish populations need to be rebuilt for the health of our reefs and for our fishermen to be able to catch fish again. No reef extraction should continue without limits and enforcement.

I am dismayed by the lack of action by DLNR/DAR in managing reef fish stocks and healthy reefs. Please urge DLNR/DAR to begin responsible protection of these species and habitats.

Thank you.

**THE HUMANE SOCIETY  
OF THE UNITED STATES**

**HUMANE SOCIETY  
INTERNATIONAL**

March 27, 2008

To: Senate Water & Land Committee  
Senator Clayton Hee, Chair  
Friday, March 28, 2008, 2:45pm

From: The Humane Society of the United States / Humane Society International  
2100 L Street NW  
Washington, DC 20037

**SR 11 & SCR 17: In Support -Urging the department of land and natural resources to adopt administrative rules regarding bag limits for ornamental reef fish.**

The Humane Society of the United States (HSUS/HSI), this nation's largest animal protection organization, with more than 10.8 million members and constituents, including 46,243 in Hawaii, and The HSUS/HSI's international arm, Humane Society International (HSI), support SR 11 and SCR 17.

The global trade in live wild animals as pets—including live fish for display in home aquaria—involves hundreds of millions of animals every year. The trade threatens the survival of wild populations and causes unacceptable treatment of the animals. This thriving industry feeds on consumer demand for rare and beautiful animals. From monkeys, tigers, and small carnivores, to exotic birds such as parrots, to reptiles and amphibians, to fish, few species are safe from this demand.

The global trade in marine fish involves between 20 and 24 million individual animals, 99 percent of whom are wild-caught (Wabnitz et al. 2003). The U.S. Coral Reef Task Force has recognized that U.S. demand for aquarium species can threaten the sustainability of coral reef species and ecosystems (U.S. Coral Reef Task Force 2000). In this, the International Year of the Coral Reef, established by the International Coral Reef Initiative, it is fitting that Hawaii is re-examining its control over this destructive trade.

**The HSUS/HSI opposes the keeping of wild animals as pets.** By “wild” we mean any species that has not been domesticated by selective breeding for certain traits that make them appropriate companion animals, whether they are bred in captivity or taken directly from the wild.

**Keeping wild animals as pets is inhumane.** For wild-caught animals, one concern is that the means by which they are captured and transported to consumers cause unacceptable levels of injury and mortality. Those animals who survive the journey from the wild to the living room may fare no better. Wild animals are difficult to care for in a home environment. In many cases, the husbandry needs are unknown or impossible to meet. Many wild animals are sold as newborns or juveniles; as they grow to maturity they become difficult and dangerous to keep. As a result, wild animals suffer and die from malnourishment, neglect, and abuse in captivity.

High levels of mortality of marine fish in the aquaria trade, associated with inadequate handling and transport, have been widely recognized as a problem (Wabnitz et al 2003). One study demonstrated mortality rates of fish from Sri Lanka to the United Kingdom of 15 percent during and immediately after collection, 10 percent during transit, and 5 percent in holding facilities (Wood 1985). This means that 30 percent of the fish collected died before reaching the market. Once in a home aquarium, mortality rates continue to climb due to inadequate husbandry. The industry treats fish like cut flowers to be displayed until they die (often of starvation), then discarded and replaced.

**The wild-caught fish trade is cruel, wasteful, and destructive to Hawaii's biological diversity.** The husbandry needs of some of the most popular fish exported from Hawaii—such as butterflyfish (*Chaetodon* spp.) who must eat coral or the cleaner wrasses (*Labroides* spp.) who must eat ectoparasites and other materials such as mucous from the bodies of other fish—simply cannot be met in captivity. Experts on captive husbandry of marine fish have created lists of commonly traded species categorized by their suitability for maintenance in aquaria, such as one that created five categories ranging from species that are “almost impossible to keep and should be left on the reef” to those that are “very hardy with almost all individuals readily acclimatizing to aquarium conditions” (Michael 1999 in Wabnitz et al. 2003). Among the species that are most commonly exported from Hawaii, the Hawaiian cleaner wrasse (*Labroides phthiophagus*) and the ornate butterflyfish (*Chaetodon ornatissimus*) are considered to be “almost impossible to keep and should be left on the reef” due to their restricted diets. The fourspot butterflyfish (*Chaetodon quadrimaculatus*) and the multiband butterflyfish (*Chaetodon multicinctus*) are also among the top ten species collected in Hawaii, and as coral feeding specialists are unlikely to be suitable for long-term maintenance in home aquaria. Indeed, another author's list of species for “the beginner [hobbyist] to avoid” includes many taxa that are among the most commonly exported species from Hawaii: all butterflyfishes (Family Chaetodontidae), Achilles tang (*Acanthurus achilles*), and Moorish idol (*Zanclus cornutus*) (Paletta 2001). Collection and export of specimens that have virtually no chance of survival in the home aquaria should cease.

**Collection of animals from the wild for the pet trade is harmful to wild populations.** There are many examples of wild populations that have been decimated by over-collection to supply the exotic pet trade including the slow lorises of Southeast Asia (*Nycticebus* spp.), the hyacinth macaw of South America (*Anodorhynchus hyacinthinus*) of Central and South America, and the radiated tortoise of Madagascar (*Geochelone radiata*). Among marine fish species that are threatened by collection for the aquaria trade are the Banggai cardinalfish of Indonesia (*Pterapogon kauderni*), the scribbled angelfish of Australia and Papua New Guinea (*Chaetodontoplus duboulayi*), and the mandarinfish of The Phillipines (*Synchiropus splendidus*). In Hawaii, researchers have raised concerns about the collection of uncommon or rare species for the trade including Tinker's butterflyfish (*Chaetodon tinkeri*), the Hawaiian turkeyfish (*Pterois sphex*) and the flame angelfish (*Centropyge loricula*).

There are many problems with the current management of collection of fish for export from Hawaii. The number of fish exported from Hawaii annually is unknown. In 1995 the official export figure was 422,823 according to the Department of Land and Natural Resources (DLNR). However, this figure was based on reports filed by only 40 percent of people permitted or licensed to export fish, and therefore is believed to significantly underestimate the actual number of fish exported (Boggiatto et al. 2004). The fact that 60 percent of permit and license holders

disregard the requirement to provide monthly catch reports to DLNR apparently without consequence is of concern. The lack of such basic information as the number of fish exported on a species-specific basis does not allow effective management.

Although allowed by law, Hawaii's DLNR has not adopted regulations that limit the number of fish collected by each permit holder (a bag limit), size limits, open and closed seasons, or other common management tools adopted by other jurisdictions that export marine fish for the aquaria trade, such as Florida. The DLNR requires collectors to have permits, and commercial collectors to have licenses, but the nearly 200 permit holders can collect any number of fish of any species. They can also collect fish anywhere with the exception of Marine Life Conservation Districts, and Fish Replenishment Areas established in 2000 on the west coast of Hawaii island. As a result, although the industry is regulated in the sense that permits are issued, except as noted in the previous sentence, there is no management system being applied that would ensure that wild populations are not harmed by levels of collection. This is troubling given the apparent high level of trade.

There is ample scientific and anecdotal evidence that the level of collection of marine fish for the home aquaria trade has had significant detrimental impacts on wild fish populations in Hawaii. Research has established that collection of fish for the aquarium trade is a major source of over-fishing on the island of Hawaii (Tissot 1999; Tissot and Hallacher 2003); in one study, seven of ten fish species targeted by collectors were found to be significantly reduced in abundance (*ibid*). Anecdotally, independent divers and dive tour operators have been reporting declines in fish abundance for at least the past decade. Although every area where collection occurs has not been studied in order to scientifically determine the impact of collection on the abundance of species, this should not be used as an excuse for inaction. When it comes to extractive wildlife use, precaution should be applied in cases of scientific uncertainty in order to protect species from over-exploitation.

In addition to concerns about the sustainability of collection and the survival of collected species, current aquarium collection practices in Hawaii raise significant concerns about the effects of aquarium collection on Hawaii's valuable coral reef ecosystems. Among the top Hawaiian exports are the yellow tang (*Zebrasoma flavescens*), kole (*Ctenochaetus strigosus*), chevron tang (*Ctenochaetus hawaiiensis*), Achilles tang (*Acanthurus achilles*), and clown tang (*Naso lituratus*), all of which are important herbivorous species that have experienced significant population declines in areas where fish are collected for export. Herbivorous fish play a crucial role in reef ecosystems by preventing algae to outcompete living corals. On other reefs around the world, overfishing of herbivores has resulted in ecosystem shifts in which corals and other important reef-dwelling benthic invertebrates become smothered by overabundant fleshy algae.

**Destructive collection techniques are also of concern.** Collectors in Hawaii have been observed breaking coral to capture fish and even using bleach, both of which are illegal (Tissot and Hallacher 2003).

Given these serious concerns, The HSUS/HSI strongly supports SR 11 and SCR 17 to urge the DLNR to establish and enforce bag limits on the collection of ornamental reef fish. This is critical first step in addressing the problems associated with the wild-caught fish trade. Thank you for the opportunity to support written testimony in support of SR 11 and SCR 17.

Legislative Testimony

**SCR 17, URGING THE DEPARTMENT OF LAND AND NATURAL RESOURCES  
TO DEVELOP AND ADOPT ADMINISTRATIVE RULES REGARDING THE  
CREATION AND ENFORCEMENT OF BAG LIMITS FOR ORNAMENTAL REEF  
FISH**

Senate Committee on Water and Land

March 28, 2008

2:45 p.m.

Room: 414

---

The Office of Hawaiian Affairs (OHA) SUPPORTS, with amendments, S.C.R. 17, which urges the Department of Land and Natural Resources to develop and adopt administrative rules to regulate the collection of ornamental reef fish with "appropriate and reasonable limits" placed on the industry.

One of the threats that is currently endangering the health of Hawai'i's marine ecosystems is the unregulated collection of reef fish for aquariums. OHA realizes that this problematic practice is not effectively regulated and enforced. As such, there is a dire need to address this problem, and OHA sees this concurrent resolution as a step in the right direction. OHA further appreciates that this concurrent resolution, unlike HCR 347, includes all of Hawai'i State waters.

OHA requests, however, that the resolution be amended to include language that states that the proposed rules will not conflict with the West Hawai'i Fisheries Council's rules, which were created, with much effort and good faith, by that community to protect the area's marine resources. These rules have been a shining example of effective resource management created through healthy community collaboration and mutual respect of competing users of the nearshore resource. Moreover, we suggest that the proposed ornamental reef fishery industry rules actually reflect the West Hawai'i Fisheries Council's rules. We encourage the DLNR to reach out to the public and encourage community participation in the adoption of these rules.

As such, OHA urges the Committee to PASS S.C.R. 17, taking the above requests into account. Mahalo for the opportunity to testify.

Committee: Senate Water & Land Committee

Committee-Chair: Senator Hee

Hearing-Date: Friday, March 28, at 2:45pm

My\_Testimony\_is: Dear Senator Hee & Members of the Senate Water & Land Committee, I support SR 11 and SCR 17 to urge DLNR/DAR to establish and enforce bag limits on â€œornamentalâ€œ reef fish.

Aquarium collectors are now unlimited on Hawaii reefs. Neither the number of collectors nor the number of fish they can take is regulated or limited in Hawaii. Reefs around the world are in peril. No reef extraction should continue without limits and enforcement.

Please urge DLNR/DAR to begin responsible protection of these species and habitats.

Thank you.

My Testimony is: Dear Senator Hee & Members of the Senate Water & Land Committee, I support SR 11 and SCR 17 to urge DLNR/DAR to establish and enforce bag limits on â€œornamentalâ€œ reef fish.

Aquarium collectors are now unlimited on Hawaii reefs. Neither the number of collectors nor the number of fish they can take is regulated or limited in Hawaii. Reefs around the world are in peril. No reef extraction should continue without limits and enforcement.

I am originally from west virginia, and this reef extraction of fish is reminiscent of strip mining in west virginia...an unly practice that was allowed to go on for years and the countryside still has not recovered. Please stop this practice and save Hawaii's wonderful natural resources.

Thank you. Deb Shields
