
A BILL FOR AN ACT

RELATING TO TAX ON TOBACCO PRODUCTS OTHER THAN CIGARETTES.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that, according to the
2 University of Minnesota, of the estimated ten million users of
3 smokeless tobacco, three million are under the age of twenty-
4 one. Almost twenty-five per cent of young users start by the
5 sixth grade, and almost seventy-five per cent start by the ninth
6 grade. In 1970, young males ages seventeen to nineteen used
7 smokeless tobacco the least of any age group. Today, usage by
8 males of these ages is the highest of any age group. In
9 America, more than three per cent of adult males, and less than
10 one per cent of females, use smokeless tobacco. Among youth in
11 grades nine to twelve, eight per cent use smokeless tobacco at
12 least once a month and two to three per cent use it daily.

13 Chewing, or smokeless, tobacco contains over two thousand
14 chemicals, many of which have been directly related to causing
15 cancer, especially in the oral cavity. Studies have revealed
16 potent carcinogens in chewing tobacco and snuff. The major
17 carcinogens in smokeless tobacco are nitrosamines, polynuclear

1 aromatic hydrocarbons, and radioactive and metallic compounds.
2 The nitrosamine content of smokeless tobacco exceeds more than
3 one thousand times the nitrosamine content allowed by the United
4 States Food and Drug Administration in products such as beer and
5 bacon.

6 Oral cancer has been shown to occur several times more
7 frequently among individuals who use smokeless tobacco than
8 nontobacco users, and the excess risk of cancers of the cheek
9 and gum reaches nearly fifty-fold among long-term snuff users.
10 Smokeless tobacco is also associated with cancers of the
11 esophagus, larynx, and stomach and an increased risk of heart
12 attacks and other cardiovascular diseases. About forty to sixty
13 per cent of smokeless tobacco users exhibit leukoplakia, which
14 is regarded as precancerous with a malignant transformation rate
15 of two to six per cent, in the area where the quid is held,
16 usually within a few months of beginning regular use.

17 Using smokeless tobacco is also addicting. The nicotine in
18 smokeless tobacco and snuff is absorbed directly into the
19 bloodstream. An individual who uses smokeless tobacco has a
20 similar, or even higher, level of nicotine than a smoker who
21 smokes a pack or more a day.

1 The purpose of this Act is to increase the deterrent
2 against the use of tobacco products other than cigarettes,
3 including smokeless tobacco, snuff, cigars, and pipe tobacco.

4 SECTION 2. Section 245-1, Hawaii Revised Statutes, is
5 amended by amending the definition of "tobacco products" to read
6 as follows:

7 ""Tobacco products" means tobacco in any form other than
8 cigarettes[7] that is prepared or intended for consumption by[7]
9 or for the personal use of[7] humans, including cigars and any
10 substitutes thereof other than cigarettes [~~which~~] that bear the
11 semblance thereof, snuff, chewing or smokeless tobacco, and
12 smoking or pipe tobacco."

13 SECTION 3. Section 245-3, Hawaii Revised Statutes, is
14 amended by amending subsection (a) to read as follows:
