## HOUSE RESOLUTION

REQUESTING HAWAII AMERICAN WATER COMPANY TO IMPLEMENT AN ODOR  
MITIGATION PLAN FOR ITS FACILITY IN HAWAII KAI.

1           WHEREAS, Hawaii American Water Company is a wholly-owned  
2 subsidiary of American Water, the largest and most  
3 geographically diverse provider of water services in North  
4 America, and provides wastewater service to nearly 35,000 people  
5 in Hawaii Kai and along the Kona Coast of the Big Island; and  
6

7           WHEREAS, Hawaii American Water Company owns and operates  
8 East Honolulu Waste Water Treatment plant; and  
9

10           WHEREAS, the East Honolulu Waste Water Treatment plant over  
11 several years has been cited at numerous Hawaii Kai Neighborhood  
12 Board meetings as the source of excessive offensive odor  
13 emissions that have caused residents and vehicular traffic, both  
14 local and visitor, passing the plant on Kalaniana'ole Highway and  
15 users of Sandy Beach, one of the most popular on Oahu great  
16 discomfort, potential health problems and a deterioration in the  
17 quality of life; and  
18

19           WHEREAS, the offensive odor problems, which smell like  
20 rotten eggs, are the result of hydrogen sulfide emissions, most  
21 noticeable on Kona and windless days at waste water peak flow  
22 times in the early morning and evening hours; and  
23

24           WHEREAS, as the State Department of Health already knows,  
25 hydrogen sulfide can potentially cause eye irritation,  
26 respiratory difficulties, vomiting, nausea, and a host of other  
27 health problems and a definite deterioration in the quality of  
28 life; and  
29

30           WHEREAS, the stretch of Kalaniana'ole Highway from Hana'uma  
31 Bay to Makapu'u which includes several lookout points, the Blow  
32 Hole, Bamboo Ridge, Molokai Lookout, Sandy Beach, Makapu'u

1 Lighthouse, Rabbit Island and the Ka Iwi Coastline, is perhaps  
2 the most scenic pristine undeveloped drive on Oahu where  
3 residents and visitors alike enjoy Hawaii's natural beauty and  
4 where whale sightings are frequent and most popular, but often  
5 tainted by the offensive odors emanating from the East Honolulu  
6 Waste Water Treatment Plant;

7  
8 WHEREAS, The Hawaii State Constitution Art. XI, Section 1  
9 states that:

10  
11 "a. For the benefit of present and future generations, the  
12 State and its political subdivisions shall conserve and  
13 protect Hawaii's natural beauty and all natural resources,  
14 including land, water, **air**, minerals and energy sources,  
15 and shall promote the development and utilization of these  
16 resources in a manner consistent with their conservation  
17 and in furtherance of the self-sufficiency of the State.  
18 All public natural resources are held in trust by the State  
19 for the benefit of the people"; and

20  
21 WHEREAS, a representative of Hawaii American Water Company  
22 told the Hawaii Kai Neighborhood Board and the community that  
23 while the odor problem could be managed by chemical and other  
24 means, it would not be possible to eliminate all odors entirely;  
25 however, as there is no government supervision or enforcement of  
26 odor mitigation procedures or improvements, it is not known what  
27 steps, if any, the East Honolulu Waste Water Treatment plant  
28 operators have taken; and

29  
30 WHEREAS, there have reportedly been studies in the past,  
31 most recently in 2006, that address the problem of odor  
32 emissions from waste water treatment plants and recommend odor  
33 mitigation solutions; and

34  
35 WHEREAS, representatives of the Hawaii American Water  
36 Company have told the Hawaii Kai Neighborhood Board and the  
37 community that they have already implemented some of the  
38 recommendations mentioned in this most recent study, however, it  
39 has refused to release that study or to say whether it has  
40 implemented all the odor mitigation recommendations in that  
41 study; and

1  
2  
3  
4  
5  
6  
7  
8  
9  
10  
11  
12  
13  
14  
15  
16  
17  
18  
19  
20  
21  
22  
23  
24  
25  
26  
27  
28  
29  
30  
31  
32  
33  
34  
35  
36  
37  
38

WHEREAS, other treatment plants, such as, the Orange County Sanitation District in Huntington Beach and Fountain Valley, California which is the third largest treatment facility west of the Mississippi River, and more than 50 times larger in capacity flows than the East Honolulu Treatment plant have residential developments immediately adjacent to its facilities, yet the odors have been controlled to such an extent that complaints are rare; now, therefore,

BE IT RESOLVED by the House of Representatives of the Twenty-fifth Legislature of the State of Hawaii, Regular Session of 2009, that Hawaii American Water Company is requested to develop an odor mitigation plan identifying improvements and operations it will take and a schedule for implementation for the East Honolulu Waste Water Treatment plant no later than September 2009; and

BE IT RESOLVED that the Director of the State Department of Health is requested to monitor the implementation of these odor mitigation measures and to report to the Hawaii Kai Neighborhood Board on the progress of such; and

BE IT FURTHER RESOLVED that Hawaii American Water Company is requested to present that plan to the Hawaii Kai Neighborhood Board, the Public Utilities Commission, the Director of State Department of Health, the State House and Senate representatives of Hawaii Kai, and District 4 Honolulu City Councilperson before September of 2009; and

BE IT FURTHER RESOLVED that certified copies of this Resolution be transmitted to Hawaii American Water Company, the Hawaii Kai Neighborhood Board, the Public Utilities Commission, the Director of State Department of Health, the State House and Senate representatives of Hawaii Kai and the District 4 Honolulu City Councilperson.
