# SENATE CONCURRENT RESOLUTION

REQUESTING THE HAWAII STATE LEGISLATURE TO CONVENE A HAWAII  
HEALTH CARE SUMMIT TO DEVELOP A STRATEGIC AND COMPREHENSIVE  
PLAN FOR HEALTH CARE IN HAWAII.

1           WHEREAS, Hawaii ranked number one among all of the states  
2 in health system performance, is a leader in reforming and  
3 improving its health system, and has one of the lowest uninsured  
4 rates in the nation according to the State Scorecard published  
5 in 2007 by The Commonwealth Fund; and  
6

7           WHEREAS, life expectancy at birth in Hawaii is among the  
8 longest in the nation. In 2000, the most recent year for which  
9 state estimates are available, people born in Hawaii had a life  
10 expectancy of eighty years, three years longer than the United  
11 States average and the fifth longest average life expectancy in  
12 the world; and  
13

14           WHEREAS, survey data collected by the federal government  
15 that compares private employer-sponsored health insurance  
16 premiums in Hawaii with those for the country as a whole  
17 reported that, as of 2003, Hawaii premiums for single coverage  
18 averaged thirteen per cent below the nation as a whole, and  
19 family coverage averaged nearly fifteen per cent below the  
20 nation. Predicted rates for 2006 indicate that Hawaii's rates  
21 will be twenty-one per cent below the national average for both  
22 single and family coverage; and  
23

24           WHEREAS, Hawaii has the lowest Medicare cost per capita in  
25 the nation, spending a mere \$5,311 per Medicare enrollee  
26 compared to New York's high spending at \$9,564 per enrollee; and  
27

28           WHEREAS, Hawaii has a robust network of federally qualified  
29 community health centers that provide quality health care to  
30 more than 100,000 uninsured; and  
31

1 WHEREAS, however, Hawaii hospitals have lost \$150 million  
2 in the last year, primarily due to uncompensated care and low  
3 Medicare and Medicaid reimbursement rates that do not cover the  
4 costs of health care; and  
5

6 WHEREAS, hospitals and community care clinics shoulder the  
7 burden of providing care with little or no reimbursement, while  
8 businesses and individuals are affected with higher insurance  
9 premiums; and  
10

11 WHEREAS, Hawaii has a shortage of beds in its long-term  
12 care facilities resulting in a diminished quality of life for  
13 the patient obliged to remain in an acute care hospital, an  
14 unavailability of acute care beds in the hospital that may be  
15 needed by someone else with an acute illness or injury, and an  
16 unnecessary stay in high cost acute care hospital beds for which  
17 the added cost is often absorbed by the acute care hospitals;  
18 and  
19

20 WHEREAS, changes in demographics, the delivery of health  
21 care services, low physician salaries, and the escalating costs  
22 of education have resulted in severe shortages of physicians,  
23 medical specialists, and other health care professionals,  
24 particularly in rural areas of the State; and  
25

26 WHEREAS, hospitals and physicians have reported low  
27 reimbursements from insurers; and  
28

29 WHEREAS, the costs of emergency and trauma care are  
30 escalating and fewer doctors are willing to serve on-call; and  
31

32 WHEREAS, natural disasters, such as Hurricane Katrina,  
33 illustrate the need for improvements for disaster preparedness,  
34 especially in health care; and  
35

36 WHEREAS, the complexity of health care reform is  
37 demonstrated by the impact that each part of the health care  
38 system has on other parts of the health care system; and  
39

40 WHEREAS, therefore, a strategic and comprehensive plan for  
41 health care in Hawaii is necessary to develop an effective  
42 solution for health care today and in the future; now,  
43 therefore,  
44
