Comments:

What will if any the chance of us waterman becoming ill ,We are already at risk, especially after heavy runoff situations and have suffered illnesses after working under these conditions.

Lifeguards ,General Public, Surfers, Fishers, etc .all are exposed to what ever bacteria"s Toxic chemicals etc.,are amongst us while in the water ,this bill is dangerous to make this decision and pass this out would be irresponsible Our legislature ought bare in mind the word cumulative and should know there exist other impacts that already have us at risk. but allowing for a higher toxicity will certainly put us at a greater risk,

Mahalo for allowing me to testify my thoughts and concerns

Carl P Jellings Sr
