### TO THE HOUSE COMMITTEE ON FINANCE THE TWENTY-FIFTH LEGISLATURE REGULAR SESSION OF 2009

Thursday, April 02, 2009 2:00 pm Conference Room 308

### TESTIMONY ON SENATE BILL NO. 301, S.D. 2 RELATING TO THE HAWAII REGISTERED AGENTS ACT

TO THE HONORABLE MARCUS R. OSHIRO, CHAIR, AND MEMBERS OF THE COMMITTEES:

My name is Tung Chan, Commissioner of Securities and head of the Business Registration Division, Department of Commerce and Consumer Affairs ("Department"). The Department appreciates the opportunity to testify on Senate Bill No. 301, Senate Draft 2, relating to the Hawaii Registered Agents Act. We strongly support this measure and respectfully request that the Committees pass Senate Bill No. 301, Senate Draft 2, as is.

The purpose of this bill is to allow registered agents to choose to register as a new designation, a "Commercial Registered Agent" ("CRA"). CRAs will then be provided a number of services, including the right to make single filings under certain circumstances and to coordinate entity representation through the Internet.

As background, it should be noted that every entity filed with the Department must have a registered agent for service of process. Almost all the states in the country

DCCA Testimony April 02, 2009 SB301, S.D. 2 Page 2

require agents because of the critical nature of timely service of process and this has created a cottage industry where companies act as registered agents for multiple entities. Under current Hawaii law, when a registered agent changes its address, name or jurisdiction, it must file an application of change for each entity it represents. For example, in August, a registered agent was required by the U.S. Post Office to revise its address and had to file change of address applications for each of the entities it represented. It filed over 3000 applications with the Department and it took almost 3 months for staff to process all the filings, burdening staff and slowing down the other registry work.

Under this new bill, agents who choose to be registered as a CRA are able to file one single change application online that would change their address, name or type of entity for each of the entities they represent, thus streamlining the change process for them and increasing efficiency for the Department. This new bill also requires the CRAs to keep their records current. If a CRA does not do so, they can be deregistered as agents by the Director. The converse is that the bill requires the Department to make the CRA information and list of represented entities available to the CRA at regular intervals.

The bill also cleans up provisions in our current law. In particular, current law does not permit an agent to resign from a dissolved entity even if the entity has stopped paying the agent for its services. Under this bill, agents can resign from a dissolved entity. The Department also appreciates adopting a model act that provides more

DCCA Testimony April 02, 2009 SB301, S.D. 2 Page 3

uniformity of our business registration laws while improving the Department's efficiency and increasing the accuracy of agent information collected in our databases.

Regarding the amendments made by the previous committees and resulting in Senate drafts 1 and 2, we support all cumulative changes. While most changes made by Senate Draft 1 are nonsubstantive, a provision clarifying how commercial registered agent information will be handled in DCCA's business registry was also added in new section \_\_\_-6(d) of the Hawaii Registered Agents Act. This additional language will give the Department clear authority to change a commercial registered agent's business address in the records of all the business entities it represents with just one filing. This Senate Draft 2 makes nonsubstantive, technical amendments as recommended by the Legislative Reference Bureau.

I respectfully request your support of Senate Bill No. 301, Senate Draft 2, which will help improve the business climate in Hawaii. Thank you for the opportunity to testify. I will be happy to answer any questions the Committees may have.

## TESTIMONY OF THE COMMISSION TO PROMOTE UNIFORM LEGISLATION

# ON S.B. NO. 301, S.D. 2, RELATING TO THE HAWAII REGISTERED AGENTS ACT.

### BEFORE THE HOUSE COMMITTEE ON FINANCE

**DATE:** Thursday, April 2, 2009, at 2:00 p.m.

Conference Room 308, State Capitol

PERSON(S) TESTIFYING: PETER HAMASAKI

Commission to Promote Uniform Legislation

WEB: http://www.capitol.hawaii.gov/emailtestimony

Chair Oshiro and Members of the House Committee on Finance:

On behalf of the State of Hawai'i Commission to Promote Uniform Legislation (CPUL), thank you very much for this opportunity to testify in support of S.B. No. 301, S.D. 2, relating to the Hawaii Registered Agents Act. S.B. No. 301, S.D. 2, is substantially similar to H.B. No. 272, H.D. 1, which was passed by your Committee and by the House.

S.B. No. 301, S.D. 2, enacts, with some modifications, the Model Registered Agents Act that was developed by the National Conference of Commissioners on Uniform State Laws (NCCUSL) in 2006. A summary of the Model Registered Agents Act prepared by the NCCUSL is appended to this testimony.

Although S.B. No. 301, S.D. 2, appears lengthy, the primary purpose of the bill is straight-forward. Every domestic or foreign entity registered to do business in the State of Hawaii is required to have a registered agent who is located in the State to accept service of process. In many cases, the agent is a company that acts as the registered agent for many entities in the State. The Model Registered Agents Act creates a registry of commercial agents, so that if there are any changes in the name, address or other information of the commercial agent, the change need only be noted in

registration for the commercial agent and not in the registration for each of the entities for whom the commercial agent acts as a registered agent. This simple change will save both the registrants and the DCCA significant amounts of time and cost when there is a change in the commercial agent. In addition, the Model Registered Agents Act clarifies the duties of registered agents.

The Model Registered Agents Act has been adopted in eight (8) states since it was approved by NCCUSL in 2006.

Because it is based upon a model act, the Hawaii Registered Agents Act can help to facilitate interstate commerce by being part of a uniform system of business registration among the different States.

In summary, we support S.B. No. 301, S.D. 2.

Thank you very much for this opportunity to testify.

#### **SUMMARY**

### **Model Registered Agents Act**

Any business entity other than an individual proprietorship in every state may register an agent for three purposes: to receive service of process; establish venue for any legal action; and for publication of notices required by the entity's organic law. Partnerships, limited partnerships, limited liability companies and corporations are entities that all have provisions for registering agents in their organic statutes in every state. Nonprofit entities also have provisions for registering agents in their organic statutes in many states.

These organic statutes also include registration of agents for foreign entities, those entities which are formed under an organic statute in another state. Generally, the foreign entity avails itself of registration when it enters another state to do business. The penalty for not registering is submission to jurisdiction when service of process is made upon a state agency.

Because registering of agents is virtually the same for every type of entity, the efficiency of one statute governing registration of an agent, no matter the kind of entity, has become apparent. If a state's organic statutes governing partnerships, limited partnerships, limited liability companies or corporations, for example, have slightly different provisions for agent registration, the result is an unnecessary administrative headache. Usually the same office is responsible for registering every kind of entity in every state. Having one statute with one set of registration provisions for every kind of entity just makes common sense.

The initial interest in such a statute came from the International Association of Commercial Administrators (IACA), to which the administrators of entity statutes in every state belong. It began an initial draft and then began to work with the Ad Hoc Committee on Entity Rationalization of the American Bar Association Business Law Section. That Committee then approached the Uniform Law Commission about a joint project. The result is the **Model Registered Agents Act and Amendments to Entity Acts to Rationalize Annual Filings**, promulgated at the 2006 Annual Meeting of the Uniform Law Commission.

The Model Act governs the procedures for registering, including contents of a registration application, changing a prior filing, or resigning as a registered agent. Many entities utilize commercial registered agents, that is, businesses that provide registered agent services to any entity that wants to engage an agent. The Model Act accommodates commercial registered agents with simplified procedures for listing and terminating a listing of a commercial registered agent. Fees for registering an agent may be set in the statute. The Model Act does not suggest fee amounts, leaving that to each state. In some states fees are set by administrative rule. These states would not use the section on fees in their enactment of the Model Act.

No entity is required to register an agent under the Model Act and most current law. The registration is purely voluntary. There is no penalty for not registering an agent. If an entity does not register an agent or a registration lapses completely, service of process first may be made on the principal office of the entity by registered or certified mail, return receipt requested. Service perfects (sets jurisdiction) upon the date the entity receives the mailed process documents, the date shown on the return receipt for delivery, or, if neither of these two, five days after deposit with the U.S. Postal Service. If service cannot be made on the principal office, any place of business the entity maintains in a state will do. Further, any other method for perfection

under other law will also perfect service under the Model Act.

A foreign entity that is not doing business in a state and an entity that is not a filing entity (general partnership with no liability shield or an individual proprietorship) may also register an agent under the Model Act. The Act makes the distinction between filing entities and non-filing entities because the information that must be provided in a filing differs. A filing entity already has a legal presence and identity because it has filed a document in a state that establishes its existence. Non-filing entities do not have that characteristic.

A registered agent has one principal duty, to provide an entity with notice of any service, and of notice required by law or other demand made upon the agent on behalf of the entity. Agents must also keep the registration records current under the Model Act.

An Appendix containing conforming amendments to the common uniform and model acts under which guide the states in enacting their organic statutes for each kind of entity. This is done in an appendix because the organic law, with the exception of partnership and limited partnership law, in each state has substantial variations on the issue of agent registration and annual reports. The Appendix, therefore, stands as a guide to those who must consider their local law in enacting the Model Act. This is why these amendments are presented as an appendix and not as part of the Model Act itself.

The Model Registered Agents Act and Amendments to Entity Acts to Rationalize Annual Filings advance the efficiency of administration of entity law in every state. Simply putting the rules in one statute no matter the kind of entity, and repealing the registration provisions in each entity statute, will improve efficiency without more. But the Model Act strives to enact the best practices for registration and extends the potential efficiencies to be obtained much further. The Model Act should be considered in every state as soon as possible.
