**Report Title:**

Land Use; District Boundary Amendment Process

**Description:**

Establishing a quasi-legislative process to simplify the State Land Use Commission's procedures in limited situations involving state or county petitions for district boundary amendments to conform State land use classification with county plans.

JUSTIFICATION SHEET

DEPARTMENT: Business, Economic Development, and Tourism

TITLE: A BILL FOR AN ACT RELATING TO LAND USE.

PURPOSE: The purpose of this bill is to establish a quasi-legislative process to simplify the State Land Use Commission's procedures in limited situations involving state or county petitions for district boundary amendments to conform state land use classification with county plans.

MEANS: Add three new sections to chapter 205, Hawaii Revised Statutes.

JUSTIFICATION: Under the existing land use system, long-range land use policy is in effect decided on a project-by-project basis as cases come before the State Land Use Commission. There is a need to take a longer-range, more comprehensive and planning-oriented view. The existing land use process also treats county government-initiated petitions for large regional areas the same as project-by-project developer-initiated petitions, notwithstanding that the county petitions are based on county general and development plans prepared with extensive community input.

This bill establishes a new quasi-legislative process that simplifies the State Land Use Commission's procedures for petitions by county planning departments or the State Office of Planning for regional boundary amendments that conform to county plans and meet other specified requirements.

Impact on the public: This bill will allow for a longer range, comprehensive, and planning-oriented review of land use changes because it will facilitate regional boundary amendments that conform to county plans and that are initiated by the State or the counties. Regional land use changes will be evaluated as a whole and cumulatively rather than on a project-by-project basis. The implementation of county plans that have been prepared with extensive public input will be facilitated.

Impact on the department and other agencies: Since the bill is intended to facilitate regional boundary amendments, it is anticipated that over the long term, the workload of the State Office of Planning, the State Land Use Commission and the county planning agencies would decrease because more land use changes would be reviewed on a regional basis rather than on a case-by-case basis.

OTHER FUNDS: None.
