
A BILL FOR AN ACT

RELATING TO AGRICULTURE.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the safe
2 introduction of plants, non-domestic animals (such as fish,
3 birds, amphibians, and insects), microorganisms, (such as algae,
4 bacteria, fungi, protozoa, and viruses), and soil is managed
5 through permits, letters of authorization, and registrations
6 issued by the department of agriculture.

7 The framework for permit and other approvals was developed
8 with the concept that plants and domestic animals (e.g., cats,
9 dogs, horses, sheep, and cattle) are generally considered
10 desirable and that non-domestic animals (e.g., snakes, tigers,
11 mosquitoes, and piranha) and microorganisms (pathogens) are
12 generally considered undesirable. While mindful of the
13 potential harm that can result from these introductions, some
14 introductions benefit the State for purposes such as scientific
15 research, businesses, commerce, and other important state
16 interests.

17 To determine whether a plant, animal, or microorganism is
18 safe or harmful, the department of agriculture evaluates

1 applications based upon available information, the intended use,
2 and the availability of adequate safeguards and protocols with
3 respect to the plant animal or organism. The department also
4 evaluates the reliability of the responsible individual and the
5 risks and benefits associated with the particular introduction.
6 The evaluation also requires a science-based risk assessment of
7 scientific data with respect to the plant, animal, or organism
8 in a thorough, consistent, and logical manner.

9 The purpose of this Act is to establish fees for the
10 processing of permits and other requests for the importation or
11 possession of incoming plants, animals, and microorganisms into
12 the State.

13 SECTION 2. Chapter 150A, Hawaii Revised Statutes, is
