

JAN 22 2010

A BILL FOR AN ACT

RELATING TO TAXATION.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the economic
2 multiplier effect from large construction projects can have a
3 profound effect on stimulating the economy in this State. Large
4 construction projects in particular can have an enormous
5 positive impact on the workforce in this State, from blue-collar
6 laborers, machinists, material suppliers, architects, lawyers,
7 escrow officers, and realtors to name a few. The urgency for
8 large construction projects to spur or induce a positive
9 economic multiplier is partly evidenced by the impending project
10 in Kapolei that is a joint partnership between the Hawaii
11 housing finance and development corporation and a private
12 builder which will develop one hundred forty affordable
13 residential units that are targeted at the one hundred twenty
14 per cent average median income first-time home buyer. This
15 project is anticipated to begin in early 2010 and will hopefully
16 provide a much needed momentum to turn around the economy in
17 this State.

1 However, although the project in Kapolei will be a positive
2 step in the right direction for the construction industry, with
3 the looming expiration of the federal government's \$8,000
4 first-time homebuyer income tax credit and \$6,500 income tax
5 credit for other qualified homebuyers, the sales absorption of
6 the one hundred forty affordable residential units in Kapolei is
7 expected to be slow, thus delaying or prolonging construction
8 activity for many of these affordable residential units. The
9 expiring federal income tax credit could hamper any momentum
10 that the project in Kapolei develops, which could consequently
11 prevent a complete recovery of the construction industry in this
12 State.

13 Under normal circumstances, when the sales absorption of
14 completed units is not slow, the development and delivery of one
15 hundred forty residential units would create an estimated one
16 hundred two direct construction jobs over a two-year period.
17 Thus, it seems that stimulating the demand side of buying new
18 homes by providing financial incentives to homebuyers would be
19 the greatest asset in turning around the current economic crisis
20 faced by the construction industry and the overall economy in
21 this State.

1 A state income tax credit for qualified taxpayers on the
2 purchase of a qualified principal residence that mirrors the
3 federal tax credit would likely provide a source for stimulating
4 the demand side for affordable new housing in Hawaii. In
5 addition, a tax credit that is appropriately crafted could also
6 provide more economic benefits to the State than costs.

7 For example, if the one hundred forty affordable
8 residential units in Kapolei were purchased by qualified
9 taxpayers and each qualified taxpayer received a refundable
10 income tax credit equal to \$6,000, then the total cost to the
11 State for the refundable tax credit would be \$840,000
12 (140 units x \$6,000). However, the direct labor costs
13 associated with developing and delivering to market one hundred
14 forty residential units, included the hiring of labor, purchase
15 of materials, and other direct and indirect services is
16 estimated to be \$12,400,000. Taking into consideration the
17 windfall of general excise taxes, income taxes, payroll taxes,
18 and the like that would be remitted to the State, the project in
19 Kapolei would generate positive tax revenues for the State of
20 approximately \$900,000, and that is assuming that each of the
21 one hundred forty residential units are purchased by a qualified
22 taxpayer that is eligible for and claims the \$6,000 refundable

1 tax credit. Thus, the multiplier effect that would be created
2 by a large construction project, such as the impending project
3 in Kapolei, would more than offset any refundable tax credit
4 payments made to taxpayers by the State.

5 There is widespread concern in the real estate and
6 financing industry in this State that with the looming
7 expiration date of the \$8,000 federal tax credit for first-time
8 homebuyers and \$6,500 credit for other homebuyers there will be
9 a further decline in the housing and construction industry in
10 this State. Establishing a state income tax credit for
11 qualified taxpayers that purchase a newly constructed principal
12 residence would help to reduce or avoid a potentially crippling
13 housing market scenario in Hawaii once the federal tax credit
14 expires by putting back to work many of Hawaii taxpayers who
15 make a living in the construction industry. A tax credit could
16 also influence contracts to develop a greater supply for
17 affordable housing in this State if the contractors feel that
18 there is sufficient demand for purchasing affordable housing.

19 Senate Concurrent Resolution No. 132, S.D. 1 (2009),
20 established a task force to determine the economic contributions
21 of the construction industry in Hawaii. As directed in the
22 concurrent resolution, the task force has developed a series of

1 proposals for state actions to preserve and create new jobs in
2 the local construction industry. The intent of this Act is to
3 implement one of the task force's proposals.

4 Accordingly, the purpose of this Act is to establish a
5 refundable state income tax credit that mirrors the federal
6 income tax credit but limits the tax credit to qualified
7 taxpayers that purchase a qualified principal residence on or
8 after April 1, 2010, and before January 1, 2012.

9 SECTION 2. Chapter 235, Hawaii Revised Statutes, is
10 amended by adding a new section to be appropriately designated
11 and to read as follows:

12 "§235- Ohana residential housing income tax credit. (a)
13 There shall be allowed to each qualified taxpayer subject to the
14 tax imposed by this chapter an ohana residential housing income
15 tax credit which shall be deductible from the taxpayer's net
16 income tax liability, if any, imposed by this chapter for the
17 taxable year in which the credit is properly claimed.

18 (b) For purposes of this section:

19 "Newly constructed principal residence" means a dwelling or
20 residential unit that did not previously exist and that will
21 result in a new structure that will be built from the ground up.

1 A newly constructed principal residence includes a single-family
2 home, duplex, condominium, manufactured home, or townhouse.

3 "Principal residence" means an individual's principal
4 residence located in the State where the individual lives for
5 more than two hundred seventy calendar days per calendar year.

6 "Purchase price" means all direct and indirect costs
7 associated with building a newly constructed principal
8 residence, excluding land acquisition costs and escrow closing
9 costs.

10 "Qualified principal residence" means a principal residence
11 that is a newly constructed principal residence, whether
12 detached or attached, that adheres to all of the following:

- 13 (1) Received a certificate of completion on or after
14 April 1, 2010;
15 (2) Used by the taxpayer as the taxpayer's principal
16 residence for the immediately following two years; and
17 (3) A principal residence that is eligible for the
18 homeowner's exemption.

19 "Qualified taxpayer" means an individual that signs a
20 binding contract to purchase a qualified principal residence on
21 or after April 1, 2010, and before January 1, 2012; provided
22 that the individual closes on the purchase of the individual's

1 newly constructed principal residence on or after April 1, 2010,
2 and before March 1, 2012.

3 (c) The amount of the tax credit shall be equal to the
4 lesser of:

5 (1) Two per cent of the purchase price of the qualified
6 principal residence; or

7 (2) \$6,000;

8 provided that the tax credit shall be payable in two equal
9 installments over two consecutive taxable years beginning with
10 the taxable year in which the binding contract to purchase the
11 qualified principal residence is signed; provided further that
12 if more than one qualified taxpayer is claiming the tax credit
13 under this section, then the applicable tax credit shall be
14 divided equally between each qualified taxpayer. For purposes
15 of this paragraph a married couple is considered to be one
16 qualified taxpayer.

17 (d) If the tax credit under this section exceeds the
18 taxpayer's net income tax liability, the excess of credit over
19 liability shall be refunded to the taxpayer; provided that no
20 refunds or payment on account of the tax credit under this
21 section shall be made for amounts less than \$1. All claims for
22 a tax credit under this section, including amended claims, shall

1 be filed on or before the end of the twelfth month following the
2 close of the taxable year for which the tax credit may be
3 claimed. Failure to comply with the foregoing provision shall
4 constitute a waiver of the right to claim the tax credit.

5 (e) The tax credit under this section is limited to
6 qualified principal residences with a purchase price of \$625,000
7 or less.

8 (f) Each qualified taxpayer that is taking title to the
9 qualified principal residence shall meet the following adjusted
10 gross income limitations in order for any of the taxpayers that
11 are taking title to the qualified principal residence to be
12 eligible to claim the tax credit under this section:

13 (1) An individual with adjusted gross income of \$75,000 or
14 less;

15 (2) A married couple with adjusted gross income of
16 \$150,000 or less; or

17 (3) A grantor of any trust with adjusted gross income of
18 \$75,000 or less.

19 (g) If a qualified taxpayer sells or no longer uses the
20 qualified principal residence as the taxpayer's principal
21 residence within seven hundred thirty days after closing on the
22 qualified principal residence, then the taxpayer shall be

1 subject to recapture on the previously claimed credit under this
2 section on a pro-rata dollar-for-dollar basis.

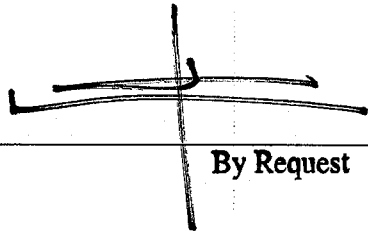

3 (h) The director of taxation shall prepare any forms that
4 may be necessary to claim a credit under this section. The
5 director may also require the taxpayer to furnish information to
6 ascertain the validity of the claim for the tax credit made
7 under this section and may adopt rules necessary to effectuate
8 the purposes of this section pursuant to chapter 91."

9 SECTION 3. New statutory material is underscored.

10 SECTION 4. This Act, upon its approval, shall apply to
11 taxable years beginning after December 31, 2009.

12

INTRODUCED BY:

By Request

Report Title:

Construction Task Force; Tax Credit; Ohana Residential Housing;
New Construction

Description:

Establishes a refundable ohana residential housing income tax credit for qualified taxpayers that purchase a qualified principal residence on or after April 1, 2010, and before January 1, 2012, that is payable to the qualified taxpayer in two equal installments over the immediately following two taxable years.
