

1 "Informed consent" means a patient's written agreement to
2 the use of reprocessed devices in treating and caring for that
3 patient.

4 "Medical emergency" means a condition which, on the basis
5 of the attending physician's good faith clinical judgment, so
6 complicates a patient's medical condition as to necessitate the
7 immediate provision of medical care to the patient in order to
8 avert the patient's death, or for which a delay will create
9 serious risk of substantial and irreversible impairment of
10 major bodily function.

11 "Original device" means a new, unused single-use device.

12 "Original manufacturer" means a person, company, or other
13 entity that designs, manufactures, fabricates, assembles, or
14 processes an original device.

15 "Reprocessed device" means an original device that has
16 previously been used on a patient and has been subjected to
17 additional processing or manufacturing for the purpose of
18 additional use on a different patient. The subsequent
19 processing or manufacture of an original device shall result in
20 a device that is reprocessed within the meaning of this
21 definition; and any single-use device that meets this definition
22 shall be considered a reprocessed device without regard to any

1 description of the device used by the manufacturer, reprocessor,
2 or other person or entity, including use of the term "recycled,"
3 "reprocessed," "refurbished," "reconditioned," "rebuilt,"
4 "reused," or other similar term rather than the term
5 "reprocessed."

6 "Reprocessor" means a person, company, or other entity that
7 undertakes procedures, including, but not limited to, additional
8 processing, manufacturing, re-labeling, or re-packaging of an
9 original device after it has been used on a patient for the
10 purpose of creating a reprocessed device to be used on a
11 different patient, or provides a means for the sale or
12 distribution of reprocessed devices.

13 "Single-use device" means a medical device that is
14 designed, manufactured, and approved by the federal Food and
15 Drug Administration for one use on a single patient during a
16 single procedure and is intended to penetrate normally sterile
17 tissue or body spaces or contact intact mucous membranes during
18 use.

19 **§328-B Requirements for use of reprocessed devices.** (a) A
20 hospital, facility, or health care professional shall not use a
21 reprocessed device in treating or caring for a patient without
22 first having obtained the patient's informed consent in

1 accordance with the provisions of this part and on a form and in
2 a manner prescribed by the director.

3 (b) A hospital or facility shall require that upon each
4 admission or registration of a patient at a hospital or
5 facility:

6 (1) A representative of the hospital or facility
7 provide each patient with a written notice that
8 describes:

9 (A) The policy of the hospital or facility
10 regarding the use of reprocessed devices,
11 including the circumstances under which
12 these devices are used and the safeguards
13 taken by the hospital or facility to
14 ensure the safety of the patient under
15 those circumstances; and

16 (B) The potential risks of using reprocessed
17 devices generally and in the specific
18 application for that patient, which shall
19 be consistent with the contents of the
20 informed consent form adopted by the
21 director pursuant to section 328-C; and

1 (2) The patient's attending physician, or the
2 attending physician's designee:

3 (A) Verbally describe the patient's
4 opportunity to indicate the patient's
5 consent or refusal to consent to the use
6 of reprocessed devices in the patient's
7 treatment or care, and explain the
8 contents of the informed consent form
9 adopted by the director pursuant to
10 section 328-C; and

11 (B) Make every reasonable effort to ensure
12 that the patient understands the informed
13 consent form.

14 (c) Before providing treatment or care to a patient in a
15 setting outside a hospital or facility, a health care
16 professional shall:

17 (1) Provide the patient with a written notice that
18 describes:

19 (A) The policy of the health care professional
20 regarding the use of reprocessed devices,
21 including the circumstances under which
22 these devices are used and the safeguards

1 taken by the health care professional to
2 ensure the safety of the patient under
3 those circumstances; and

4 (B) The potential risks of using reprocessed
5 devices generally and in the specific
6 application for that patient, which shall
7 be consistent with the contents of the
8 informed consent form adopted by the
9 director pursuant to section 328-C;

10 (2) Verbally describe the patient's opportunity to
11 indicate the patient's consent or refusal to consent
12 to the use of reprocessed devices in the patient's
13 treatment or care, and explain the contents of the
14 informed consent form adopted by the director
15 pursuant to section 328-C; and

16 (3) Make every reasonable effort to ensure that the
17 patient understands the informed consent form.

18 (d) The provisions of subsections (a), (b), and (c) of
19 this section shall not apply in the case of a medical emergency.

20 (e) A patient's refusal to provide informed consent shall
21 not, in any way, limit or restrict the patient's access to

1 health care, including treatment or care that includes the use
2 of an original device.

3 (f) An informed consent form signed by a patient pursuant
4 to this section shall be included as part of the patient's
5 permanent medical record.

6 **§328-C Informed consent forms.** (a) The director shall
7 adopt a uniform form for obtaining informed consent from
8 patients as required by this part. The form shall be designed
9 to ensure that the patient is provided with information, in a
10 manner and in terms the patient understands, which is necessary
11 for the patient to determine whether or not to provide written
12 consent to the use of reprocessed devices in the patient's
13 treatment or care. The information shall include, but not be
14 limited to, any risk to the patient from the use of reprocessed
15 devices and the fact that the patient's refusal to provide
16 informed consent will not, in any way, limit or restrict the
17 patient's access to health care. The form shall specifically
18 include a notice to the patient that reprocessed devices may
19 undergo structural or chemical degradation and may contain more
20 than trace amounts of biological or chemical residue.

1 (b) The form shall include a place for the patient to
2 indicate the patient's consent or refusal to consent to the use
3 of reprocessed devices in the patient's treatment or care.

4 **§328-D Duties of hospitals, facilities, and health care**
5 **professionals.** (a) A hospital or facility shall provide each
6 health care professional who is employed or has privileges at
7 the hospital or facility with:

8 (1) A written copy of the policy adopted by the hospital
9 or facility on using reprocessed devices;

10 (2) Written notification if a specific device that the
11 hospital or facility makes available for the use of
12 the health care professional is a reprocessed device;
13 and

14 (3) Written notification, prior to the rendering of a
15 service or procedure with respect to a patient, as to
16 whether the patient has provided informed consent.

17 (b) A health care professional who is employed or has
18 privileges at a hospital or facility shall file a disclosure
19 form with the hospital or facility acknowledging that the
20 professional has been notified of the policy adopted by that
21 hospital or facility on using reprocessed devices.

1 (c) A hospital or facility shall provide each health care
2 professional who is employed or has privileges at the hospital
3 or facility with the opportunity to file an objection to using a
4 reprocessed device. A hospital or facility shall not force a
5 health care professional who files such an objection to use a
6 reprocessed device, and shall not take any disciplinary or
7 punitive action against a health care professional for filing
8 such an objection.

9 **§328-E Inventory of reprocessed devices.** (a) A patient's
10 attending physician shall record in a patient's permanent
11 medical record an inventory of each reprocessed device that is
12 utilized in the course of a patient's treatment, and shall
13 indicate the procedure in which the device was used. This
14 inventory shall include, but not be limited to: the types of
15 devices used; the name of the reprocessor that supplied each
16 reprocessed device; and the reprocessor's lot number from which
17 the reprocessed device came.

18 **§328-F Monitoring of patients.** A hospital or facility, at
19 its own expense and in accordance with rules adopted by the
20 director, shall, after discharge from the hospital or facility
21 of a patient for whom a reprocessed device was utilized in the
22 course of the patient's treatment at the hospital or facility,

1 monitor the patient for infection and disease. If the patient
2 develops an infection or disease, the hospital or facility shall
3 notify the department on a form and in a manner determined by
4 the director, and the department shall investigate and determine
5 if the infection or disease was caused by the use of a
6 reprocessed device. The monitoring protocol prescribed by the
7 director shall include, but not be limited to, the period of
8 time that the patient is to be monitored and the tests that the
9 monitoring is to include.

10 **§328-G Duties of reproprocessors; registration.** (a) A

11 reproprocessor that provides reprocessed devices to a hospital,
12 facility, or health care professional in the State shall:

- 13 (1) Register annually with the department, for which
14 purpose the reproprocessor shall furnish to the
15 department such information as the director requires,
16 including, but not limited to: the reproprocessor's name,
17 address, telephone number, list of corporate officers,
18 and list of reprocessed devices that the reproprocessor
19 distributes to hospitals, facilities, or health care
20 professionals; and
21 (2) Provide the department with:

- 1 (A) Notice of any inspection conducted by any
- 2 governmental entity;
- 3 (B) A copy of any report produced as a result of
- 4 that inspection;
- 5 (C) Immediate notice of any violation discovered
- 6 through such an inspection;
- 7 (D) A copy of any remedial plan prepared by the
- 8 reprocessor to correct any violation; and
- 9 (E) Proof of liability insurance or a statement
- 10 that the reprocessor is self-insured.

11 (b) The director shall issue a distinct identification
12 number to each reprocessor that registers with the department.

13 (c) The director may charge a registration fee to a
14 reprocessor in an amount not to exceed the reasonable costs
15 incurred by the department to process and record the
16 registration.

17 (d) A reprocessor shall notify the director of any new
18 reprocessed device not listed in its most recently filed annual
19 registration, which the reprocessor intends to distribute to a
20 hospital, facility, or health care professional in the State, by
21 filing a registration amendment not less than thirty days prior
22 to distribution of the new reprocessed device.

1 **§328-H Liability; reporting.** (a) A reprocessor shall be
2 liable for the safety and effectiveness of each reprocessed
3 device that the reprocessor distributes to a hospital, facility,
4 or health care professional. In no event shall an original
5 manufacturer be held liable for the use, safety, or
6 effectiveness of a reprocessed device, unless the original
7 manufacturer has expressly and specifically consented to the use
8 of the reprocessed device in that specific instance.

9 (b) A person who recycles, reprocesses, refurbishes,
10 reconditions, rebuilds, or otherwise provides for the reuse of a
11 single-use device, and who comes to believe that the single-use
12 device that was recycled, reprocessed, refurbished,
13 reconditioned, rebuilt, or reused may have caused or contributed
14 to a death or serious injury or has malfunctioned and would be
15 likely to cause death or serious injury if the malfunction were
16 to recur, shall report that information to the department on a
17 form and in a manner prescribed by rule of the director.

18 (c) The failure of a reprocessor, health care
19 professional, hospital, or facility to comply with the
20 provisions of this section shall be prima facie evidence that
21 the reprocessing of a single-use device has rendered the

1 reprocessed device unreasonably dangerous and unfit for its
2 intended use.

3 **§328-I Packaging standards; documentation.** (a) The
4 director shall develop standards for the packaging of
5 reprocessed devices distributed to hospitals, facilities, and
6 health care professionals in this State, in order to ensure an
7 easy and immediate visual means of identifying a device as a
8 reprocessed device, including, but not limited to, a requirement
9 that the packaging bear a prominently displayed statement that
10 the enclosed device is a reprocessed device.

11 (b) Each reprocessed device distributed to a hospital,
12 facility, or health care professional in this State shall:

13 (1) Bear the identification number issued to the
14 reprocessor by the department pursuant to section 328-
15 G; and

16 (2) Include documentation as to:

17 (A) The source from which the reprocessor received
18 the previously-used device;

19 (B) The number of times that device has been
20 reprocessed; and

21 (C) A description of the means by which the device
22 was reprocessed.

1 **§328-J Lists of reprocessed devices.** (a) The director
2 shall develop a list of all reprocessed devices distributed to
3 hospitals, facilities, and health care professionals based upon
4 the information obtained by the department pursuant to section
5 328-G, and shall update the list whenever a reprocessor notifies
6 the director that it intends to distribute additional
7 reprocessed devices to a hospital, facility, or health care
8 professional pursuant to section 328-G.

9 (b) The director shall make available to the public on the
10 internet website of the department: the list of reprocessed
11 devices distributed to hospitals, facilities, and health care
12 professionals; and each annual registration and amendments filed
13 by a reprocessor pursuant to section 328-G.

14 **§328-K Violations; discipline.** (a) A reprocessor,
15 hospital, or facility that fails to comply with the provisions
16 of this part, or any rules adopted pursuant thereto, shall be
17 subject to a penalty as set forth in rules adopted by the
18 director.

19 (b) A health care professional who fails to comply with
20 the provisions of this part, or any rules adopted pursuant
21 thereto, shall be subject to disciplinary action by the
22 appropriate licensing board.

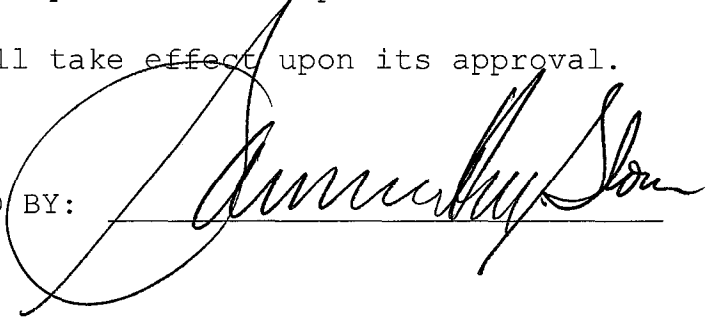

1 (c) The provisions of this part shall not be construed to
2 preclude any other remedy that may be pursued against a
3 reprocessor, hospital, facility, or health care professional.

4 §328-L Rules. The director shall adopt rules pursuant to
5 chapter 91 to effectuate the purposes of this part."

6 SECTION 2. This Act shall take effect upon its approval.

7

INTRODUCED BY:

A large, stylized handwritten signature in black ink, appearing to read "Ann Kelly Sloan", is written over a horizontal line. The signature is positioned to the right of the text "INTRODUCED BY:".

Report Title:

Single-Use Medical Devices; Reprocessed Devices; Informed
Consent Prior to Use on a Patient

Description:

Requires health care providers to obtain informed consent from
patients for use of certain reprocessed medical devices.
Requires director of health to provide oversight and to adopt
rules pertaining to reprocessed single-use devices.
