Senate Committee on Health

SB 2729, RELATING TO IMMUNIZATION

Testimony of Chiyome Leinaala Fukino, M.D.
Director of Health

February 5, 2010, 2:55 p.m.

- 1 **Department's Position:** The Department of Health strongly supports this administration bill.
- 2 **Fiscal Implications:** None. No state funds are required to implement this proposal. The Hawai'i
- 3 Immunization Registry (HIR) is supported via a federal Centers for Disease Control and Prevention
- 4 Immunizations and Vaccines for Children grant as well as a grant from the Hawaii Medical Services
- 5 Association Foundation.
- 6 **Purpose and Justification:** The intent of this proposal is to officially establish HIR in the Hawaii
- 7 Revised Statutes and grant the Department and other healthcare providers the authority to include patient
- 8 demographic and immunization information in HIR via implied patient or parent/guardian consent.
- 9 HIR is a secure, confidential, computerized system that has the capability to store immunization
- 10 information for individuals of all ages in the State of Hawai'i. As individuals and families move or
- 11 change health care providers, HIR will consolidate their immunization records, making them easily
- 12 accessible to new immunization providers and ensuring that patients receive the immunizations that they
- 13 need while preventing the receipt of unnecessary doses of vaccines. In the event of an influenza
- 14 pandemic or other public health emergency, HIR will provide the Department with the ability to record,
- 15 track, and monitor the administration of vaccinations as well as the distribution of antiviral and other
- 16 medications. This information is essential for the Department to rapidly assess who has been vaccinated

1 and identify under-immunized populations at risk for disease. This information is especially critical in
2 public health emergency situations to effectively direct scarce or otherwise limited Departmental
3 resources to the populations or areas most in need.

4 Thank you for the opportunity to testify on this important measure.

February 5, 2010

The Honorable David Ige, Chair
The Honorable Josh Green M.D., Vice Chair
Senate Committee on Health

Re: SB 2729 – Relating to Immunization

Dear Chair Ige, Vice Chair Green and Members of the Committee:

My name is Howard Lee and I am President of the Hawaii Association of Health Plans (“HAHP”). HAHP is a non-profit organization consisting of seven (7) member organizations:

AlohaCare	MDX Hawai‘i
Hawaii Medical Assurance Association	University Health Alliance
HMSA	UnitedHealthcare
Hawaii-Western Management Group, Inc.	

Our mission is to promote initiatives aimed at improving the overall health of Hawaii. We are also active participants in the legislative process. Before providing any testimony at a Legislative hearing, all HAHP member organizations must be in unanimous agreement of the statement or position.

HAHP appreciates the opportunity to testify in support of SB 2729 which would establish and maintain a repository of immunization records to assist in the control and prevention of vaccine-preventable diseases.

Many other states have implemented the use of an immunization registry as a means to track and monitor the administration and distribution of vaccinations and other antiviral medications. Information of this type is used during public health emergencies to ensure that scarce resources are directed to those most in need. The registry will also be used by the Department of Health to report to the Centers of Disease Control and Protection.

We believe that this is an extremely important initiative especially when considering new and emerging diseases such as the H1N1 flu. An immunization registry will assist in the protection of Hawaii’s residents in the case of a public health emergency. As such, we urge the Committee to pass SB 2729.

Thank you for the opportunity to offer comments today.

Sincerely,

Howard Lee
President

Conference Room 016

Re: SB 2729 Relating to Immunization

Chair Ige and committee members thank you for this opportunity to provide testimony on this bill relating to immunization.

Kaiser Permanente supports this bill.

Kaiser Permanente appreciates that the Hawaii Immunization Registry (“Registry”) will help ensure that Hawaii’s population is protected from vaccine-preventable diseases. Kaiser Permanente recognizes that nationwide, immunization registries like the Hawaii Immunization Registry have proven to be valuable tools for the management and reporting of immunization information for parents/guardians, public and private health care providers, and public health professionals.

Kaiser Permanente agrees that patient immunization information should be available in the Registry without requiring prior patient authorizations for inclusion to facilitate the transferring of the most accurate and complete information to authorized immunization providers.

Thank you for your consideration.

The Honorable David Ige, Chair
The Honorable Josh Green M.D., Vice Chair

Senate Committee on Health

Re: SB 2729 – Relating to Immunization

Dear Chair Ige, Vice Chair Green and Members of the Committee:

The Hawaii Medical Service Association (HMSA) appreciates the opportunity to testify in support of SB 2729 which would authorize the Department of Health to establish and maintain an immunization registry.

HMSA is involved with many public health initiatives throughout the community and the DOH's work towards creating a "Hawaii Immunization Registry" (HIR) is one such project. The HMSA Foundation provided a three year grant for close to \$600,000 to assist DOH in the planning and implementation of the HIR.

The HIR will be a useful tool to store and track immunization information for individuals of all ages in Hawaii. This information will be kept in a secure, computerized system and used to assist the state in instances of public health emergencies. The HIR will also be able to provide statewide data for the management and reporting of immunization information to many different stakeholders.

HMSA supports this legislation to officially establish the HIR in the Hawaii Revised Statutes, and we respectfully request the Committee to pass SB 2729.

Thank you for the opportunity to testify today.

Sincerely,

Conference Room 016

DATE: February 3, 2010

TO: Senate Committee on Health
Senator David Ige, Chair
Senator Josh Green, Vice Chair

FROM: Dennis Arakaki, Executive Director

RE: SUPPORT FOR SB2729, Relating to Immunization

Honorable Chair Senator Ige and members of the Senate Committee on Health, I am Dennis Arakaki, **representing both the Hawaii Family Forum and the Roman Catholic Church in the State of Hawaii.**

Hawaii Family Forum is a non-profit, pro-family education organization committed to preserving and strengthening families in Hawaii, representing a network of over 250 Christian churches. The Hawaii Catholic Conference is the public policy voice for the Roman Catholic Church in Hawaii, which under the leadership of Bishop Larry Silva, represents over 220,000 Catholics in Hawaii. I also speak today in behalf our community partner, the Catholic Schools of Hawaii.

We are in strong support this bill that authorizes the department of Health to establish and maintain a single repository of immunization records to be designated as the Hawaii Immunization Registry.

Health care for children and youth has long been a priority of the House and you, chair Yamane, know as well as I do, that prevention and early intervention not only saves money but saves lengthy and expensive treatment costs when children develop chronic illnesses. It is far better to prevent the illness rather than providing the treatment and cure. This registry, along with other registries that track immunizations, treatment and prevalence related to childhood diseases, will provide valuable information and data regarding effective prevention, intervention and treatment strategies, especially when dealing with pandemic diseases. I urge you to pass this measure and allow the department of health to establish this registry.

Thank you for allowing me to testify and share my mana'o regarding this very critical measure.

To: Committee on Health - Senator David Ige, Chair and Senator Josh Green, M.D., Vice Chair

RE: Testimony in SUPPORT of SB 2729: Relating to Immunization

Aloha,

Been waiting for this a long time. Started practicing Pediatrics at Kalihi-Palama Health Center over twenty years ago. For the underserved children who needed medical care, holding onto that “yellow card” never was a priority amongst all the other issues that had to be dealt with. Calling other doctors for shot records, waiting for the faxes and checking with the hospitals didn’t seem particularly efficient or effective.

The concept of “implied consent” is critical to the Hawaii Immunization Registry. Without the ready transfer of vaccination information between providers, the system is basically crippled from the start. The two areas most harmed include the functionality of the registry and the trust from the very providers that should benefit the most. If parents or guardians must “Opt-In” the information becomes piecemeal where the system can no longer “**Connect the Dots**”.

SB2729 is a move towards a better way to access immunization information in Hawaii.

Mahalo,

Ricardo C. Custodio, M. D., M.P.H.

TESTIMONY TO
THE SENATE COMMITTEE ON HEALTH

RE: SB 2729 – Relating to Immunization

Dear Chair Ige, Vice Chair Green, and Members of the Committee:

My name is Robert Witt and I am executive director of the Hawaii Association of Independent Schools (HAIS), which represents 99 private and independent schools in Hawaii and educates over 33,000 students statewide.

The Association is in support of Senate Bill 2729 – Relating to Immunization which authorizes the Department of Health to establish and maintain a single repository of immunization records to be designated as the “Hawaii Immunization Registry” in order to aid, coordinate, and help promote efficient and cost-effective screening, prevention, and control of vaccine preventable diseases, including pandemic influenza.

The Hawaii Immunization Registry (HIR) will help to ensure that all of Hawaii’s people are protected from vaccine-preventable diseases. HIR has the capability to store and track immunization information, consolidate immunizations given by multiple providers into one record and make them available to authorized immunization providers.

The Registry will not require any additional reporting by schools; it will reduce school personnel workloads by allowing authorized school personnel access to student immunization information to quickly and easily determine a student’s compliance with Hawaii’s mandatory student immunization requirements.

HAIS believes that establishment of the Hawaii Immunization Registry will protect the health and safety of the public as well as an individual’s right to privacy and the protection of confidential information.

Thank you for this opportunity to testify in support of this measure.

Subject: Hawaii Immunization Registry Proposal SB2729

To Whom It May Concern:

I would like to show support for immunization registry proposal, SB2729. I am a practicing pediatrician in Honolulu and I find that the sharing of health care information, notably immunizations, among schools, emergency rooms, and health care providers are very important to minimize mistakes in giving unnecessary doses of vaccines or to ensure that a child is fully protected and immunized against potentially deadly infections.

Given the grim economic climate this year, I believe that a statewide Internet based immunization registry will help to save the government money by avoiding extra, unnecessary doses of expensive vaccines.

I do hope that you will pass SB2729. Thank you.
