**Comments:**

Supporting greater presence of agriculture in the schools is critical to educating the general public, and also cultivating future farmers. We need a working group to determine the best way to accomplish this statewide and look at models that are currently working, as well as other needs for a comprehensive solution.

Please support this resolution!

**Comments:**

Environment plays an important role in the health of our children. Since our children spend a majority of the day in school, it is important to surround them with healthy choices and educate them to want to make those choices. We are very lucky in Hawaii to live in an environment that can provide a wide range of fresh produce all year around. We need to take advantage of our environment and support our local farmers by allowing farm to school initiatives in public schools. I fully support this resolution because it is another step in successfully complete Healthy People 2010 goals.
