
A BILL FOR AN ACT

RELATING TO AGRICULTURE.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that Hawaii is
2 dangerously dependent on imported food. As the most
3 geographically isolated state in the country, Hawaii imports
4 approximately eighty-five per cent of its food. Currently,
5 Hawaii has a fresh supply of produce for no more than ten days.
6 Ninety per cent of the beef, sixty-seven per cent of fresh
7 vegetables, sixty-five per cent of fresh fruits, and seventy per
8 cent of all milk consumed in the State is imported. The
9 legislature acknowledges that Hawaii's reliance on out-of-state
10 sources of food places residents directly at risk of food
11 shortages in the event of natural disasters or worldwide
12 economic events.

13 Each food product imported to Hawaii is a lost opportunity
14 for local economic growth. Experts suggest that increasing the
15 amount of locally grown food by as little as ten per cent could
16 keep hundreds of millions of dollars circulating within Hawaii's
17 economy and create thousands of new jobs. This economic

1 diversification would make Hawaii more resilient to worldwide
2 events and stimulate the local economy.

3 The legislature finds that increasing local food production
4 would result in a decrease in the amount of transportation
5 involved to feed each family and thus reduce Hawaii's carbon
6 footprint. In addition, more local food ensures Hawaii would be
7 more resilient to potential climate change impacts such as sea
8 level changes, less rainfall, warmer temperatures, and severe
9 storm events.

10 The legislature acknowledges that the increased
11 availability of local food generally means fresher produce with
12 greater vitamin content and higher nutritional value. In the
13 long term, encouraging residents to eat locally produced food
14 would result in a healthier lifestyle and better nutrition.

15 The legislature further finds that, despite the apparent
16 benefits and need to diversify the economy and grow more local
17 food, the State's prime agricultural lands are increasingly
18 being consumed by development.

19 The legislature also finds that it is in the best interest
20 of Hawaii's residents to set a specific goal for food
21 self-sufficiency by creating measurable standards over a period
22 of time. By establishing this standard, Hawaii can ensure a

1 long-term commitment of resources and investment into producing
2 a significant portion of Hawaii's food.

3 SECTION 2. The Hawaii Revised Statutes is amended by
4 adding a new chapter to be appropriately designated and to read
5 as follows:

6 "CHAPTER

7 FOOD SUSTAINABILITY

8 § -1 Definitions. As used in this chapter, unless the
9 context otherwise requires:

10 "Department" means the department of agriculture.

11 "Food sustainability standard" means the percentage of food
12 sold in the State for local consumption, whether measured by
13 weight or caloric value, that is also grown in the State.

14 § -2 Food sustainability standards. Of all of the food
15 sold for consumption in the State, the following amounts shall
16 be grown within the State:

17 (1) per cent of net food sales by December 31,
18 2020;

19 (2) per cent of net food sales by December 31,
20 2030; and

21 (3) per cent of net food sales by December 31,
22 2040.

1 § -3 Department of agriculture responsibilities. (a)

2 The department shall be responsible for measuring the amounts of
3 food sold and grown in the State on an annual basis. This
4 information shall be made publicly available in accordance with
5 chapter 92F.

6 (b) The department shall certify whether the food
7 sustainability standards set forth in this chapter have been
8 achieved.

9 (c) The department shall be responsible for planning and
10 adopting the necessary incentives to ensure that the food
11 sustainability standards established under this chapter are met
12 or exceeded.

13 (d) The department shall submit to the legislature an
14 annual report, no later than twenty days prior to the convening
15 of each regular session, on the status of the department's
16 efforts to effectuate this chapter and any recommended policy
17 changes needed.

18 (e) The department may adopt rules pursuant to chapter 91
19 to effectuate this chapter."

20 SECTION 3. There is appropriated out of the general
21 revenues of the State of Hawaii the sum of \$ or so
22 much thereof as may be necessary for fiscal year 2011-2012 and

1 the same sum or so much thereof as may be necessary for fiscal
2 year 2012-2013 for the establishment of food sustainability
3 standards and the related oversight, planning, and monitoring
4 responsibilities.

5 The sums appropriated shall be expended by the department
6 of agriculture for the purposes of this Act.

7 SECTION 4. This Act shall take effect on July 1, 2050.

Report Title:

Department of Agriculture; Food Sustainability Standards;
Appropriation

Description:

Requires the State to attain certain food sustainability standards by enumerated deadlines. Requires DOA to monitor the State's progress in achieving the food sustainability standards. Requires DOA to report to the legislature annually. Appropriates funds to DOA. Effective 07/01/2050. (SD2)
