

Hawaii Association of Health Plans

March 1, 2011

The Honorable David Ige, Chair
The Honorable Michelle Kidani, Vice Chair
Senate Committee on Ways and Means

LATE

Re: SB 122 SD1– Relating to Naturopathic Physicians

Dear Chair Ige, Vice Chair Kidani and Members of the Committee:

My name is Howard Lee and I am President of the Hawaii Association of Health Plans (“HAHP”). HAHP is a non-profit organization consisting of eight (8) member organizations:

AlohaCare	Kaiser Permanente
Hawaii Medical Assurance Association	MDX Hawai‘i
HMSA	University Health Alliance
Hawaii-Western Management Group, Inc.	UnitedHealthcare

Our mission is to promote initiatives aimed at improving the overall health of Hawaii. We are also active participants in the legislative process. Before providing any testimony at a Legislative hearing, all HAHP member organizations must be in unanimous agreement of the statement or position.

HAHP appreciates the opportunity to testify in opposition to SB 122 SD1 which would require health plans include naturopaths in any complementary care riders and set reimbursement rates for these services based on Worker’s Compensation statute. HAHP generally opposes legislation considered to be a mandated benefit, whether it be mandating health plans provide coverage for a certain service or to provide certain services rendered by a specific provider type. At this time, most HAHP plans do not provide benefits for the coverage of services provided by naturopaths so mandating that all plans recognize them as PCPs would ultimately cause naturopaths to become a mandated provider type. Naturopathic services are also not required to be provided as basic benefits under the rules of the Hawai‘i Prepaid Health Care Council.

We would support requiring the Hawaii State Auditor to perform a study to examine the impacts of including coverage for naturopathic care as required under HRS 23-51. This statute requires that prior to passage of a mandate requiring the coverage for “certain providers of health care services”, the Auditor examine the social and financial affects of the mandated coverage. It has come to our attention that the Auditor performed a study on this issue 22 years ago in 1989. It is likely that some things have changed in that time and the provision of updated, relevant information would assist the legislature in determining whether to proceed with this mandate.

It is worthwhile to note that once the Health Insurance Exchange is up and running in 2014, only those services considered to be “essential health benefits” will be required to be covered by qualified health plans. Any services mandated by a state which fall outside of the essential health benefits definition will be the financial liability of the state for those plans providing coverage within the Exchange. While it is unclear at this time

what types of services will and will not be included within the definition, the state needs to be aware that there is a risk of being financially liable for the inclusion of these types of mandates.

Due to the concerns expressed above, we would respectfully request that this measure be held and instead that the Auditor be requested to perform a study on mandating naturopathic services.

Thank you for the opportunity to provide testimony.

Sincerely,

Howard Lee
President

Testimony in Opposition to SB 122 SD1 Relating to Naturopathic physicians

SB 122 SD1 proposes to define coverage for services by a naturopathic physician. Section 4 of the bill amends the definition of child health services to include those provided by a "naturopathic physician". This is inconsistent with the American Academy of Pediatrics Policy Statement entitled "Scope of Practice Issues in the Delivery of Pediatric Health Care." MDs/DOs have significantly longer and more extensive graduate level training in the care of children. For example:

MDs/DOs = Length of graduate level education - 4 years (90 credit hours); Years of residency/fellowship training - 3 years; Total patient care hours required through training - 12,000-16,000 hours.

Naturopaths = Length of graduate level education - 4 years; Years of residency/fellowship training - not required; Total patient care hours required through training - 720 -1,200 hours.

The Hawai'i Chapter of the American Academy of Pediatrics, along with the American Academy of Pediatrics nationally, is concerned about risks to quality and patient safety in the care of children that could result by the passage of this bill.

The Hawai'i Chapter of the American Academy of Pediatrics strongly opposes the passage of SB 122 SD1 relating to Naturopathic physicians.

Respectfully submitted,
Kenneth T. Nakamura, M.D.
President, Hawai'i Chapter
American Academy of Pediatrics

LATE

Subject: SB122_SD1, March 1, 2011, 9:20 a.m. IN SUPPORT.

Dear Chairperson Ige, Vice-Chair Kidani, and members of the committee:

I am Ann K. Driggs. I live in Kailua-Kona, HI). I have greatly benefited from naturopathic medicinehealthcare. However, because my healthcare insurance does not cover naturopathic medicine, I cannot afford to access naturopathic care. The services provided by naturopathic physicians are an important component of comprehensive health care. In the context of Hawaii's chronic shortage of qualified health care providers, naturopathic physicians can play a role in expanding access to primary health care within the State. Allowing people to select the services of a naturopathic physician is an important component of preserving choice in the health care system. Please support the passage of SB122_SD1.

LATE

Aloha,

Please vote to cover naturopathic care by our medical insurance companies.

We have had great success being treated by a good naturopathic doctors even when regular MD's and specialists could not cure me!

Also it would save us all money since they do not prescribe expensive drugs with bad side effects.

Thank You,

Carol and Daniel Dierickx

Comments:

Please do not include "naturopathic physician's" in any bill concerning children's health. This is very concerning to me as a pediatrician and child psychiatrist. The term "physician" is misleading when discussing naturopaths, their educational curriculum and scope of practice is distinct from MD's/DO's (MDs/DOs = Length of graduate level education - 4 years (90 credit hours); Years of residency/fellowship training - 3 years; Total patient care hours required through training - 12,000-16,000 hours. Naturopaths = Length of graduate level education - 4 years; Years of residency/fellowship training - not required; Total patient care hours required through training - 720 -1,200 hours). This is potentially very dangerous if they are allowed to treat our keiki.

Comments:

Section 4 of the bill proposes amending the definition of child health services to include those provided by a "naturopathic physician". The difference in education, knowledge and training for MD/DO pediatricians versus naturopaths are huge and represent a significant safety, health, quality of care and liability risks for potential pediatric patients of naturopaths. I strongly urge you to NOT to include child health services provided by a "naturopathic physician".

Dear Chairperson Ige, Vice-Chair Kidani, and members of the committee:

Aloha! My name is Alisyn Vinsh, and I am a resident of Honolulu, Hawaii. In the last two years I have seen a Naturopathic Physician on a couple of occasions and have really benefited from the comprehensive care she provides. I have been able to reduce use of prescription medications under her guidance of using natural remedies and other homeopathic means, and my health was improving greatly. However, because my health insurance does not cover naturopathic medicine, I cannot afford to access naturopathic care on a regular basis or sometimes even when I am sick, and I feel that I suffer because of this.

The services provided by naturopathic physicians are an important component of comprehensive health care. Also, the physician's in Hawaii seem to be overloaded with patients and it seems there are never enough; with this chronic shortage of qualified health care providers, naturopathic physicians can help fill in the gaps and provide expanded access to primary health care within the state. Allowing people to select the services of a naturopathic physician is an important component of preserving choice in the health care system.

Please support the passage of SB122 SD1.

The amount of patient care hours and training that sets apart a naturopath and MD/DO is very large. I feel the naturopathic medicine may play a role but if these health care professionals want to provide health services to out keiki, then let them also get accepted and go through the same residency that physicians go through.
