

SB787

Measure
Title:

RELATING TO HEALTH.

Report
Title:

Health; Medicaid Reimbursements; Appropriation

Description:

Requires rates for medicaid reimbursements to hospitals keeping patients in beds to be equal to rates for similarly related services. Appropriates funds for increased medicaid reimbursements. (\$)

Companion:

Package:

None

Current
Referral:

HTH/HMS, WAM

In Strong Support of SB 787, Relating to Health

Chairs Chun Oakland and Green, Vice Chairs Ihara and Nishihara and Members of the Committee,

My name is Christina Donkervoet, Director of Care Coordination and Patient Flow at The Queen's Medical Center (QMC), testifying in strong support of SB 787, which adjusts the Medicaid reimbursement rates for waitlisted patients remaining in hospitals and develops sub-acute rates for complex patients being cared for in long-term care facilities.

We have testified on this bill in previous years, and again submit testimony in strong support. QMC continues to be greatly impacted by the limited community resources available to serve people in need of long-term care. There are many patients who remain at Queen's well beyond their acute inpatient medical stay, but who are unable to be discharged because the necessary community resources are not available. Prolonged stays at an acute care facility after the patient no longer needs hospitalization can result in a less than optimal quality of life for the patient and creates a serious financial drain on the hospital. The Medicaid reimbursement for these patients is at a rate that is twenty to thirty per cent of the actual cost of acute care hospitalization. The total loss to Hawaii hospitals in 2008 was estimated at over \$72 million.

Our Emergency Department, the busiest in the State, is sometimes forced to go on divert status because we simply do not have the bed capacity to admit patients needing hospitalization. We are often unable to accept patient transfers from hospitals across the state and the Pacific due to patients remaining in hospital beds waiting for long-term care services. This inability to admit acutely ill patients impacts not only QMC, but the health care system state-wide.

QMC understands the challenges of coordinating services between hospitals and long-term care facilities and will continue to work with state agencies and community facilities and programs to ensure access to quality care at the appropriate level for our patients. Thank you for the opportunity to support SB 787.

THE SENATE THE TWENTY-SIXTH LEGISLATURE REGULAR SESSION OF 2011

Committee on Health Committee on Human Services Testimony in Support of S.B. 787 Relating to Health

**Thursday, February 10, 2011, 1:15 P.M.
Conference Room 016**

Chair Chun-Oakland, Chair Green and Members of the Committees:

I am Louis Erteschik, Staff Attorney at the Hawaii Disability Rights Center, and am testifying in support of this bill.

The purpose of the bill is to provide Medicaid rates to hospitals for patients who are waitlisted for community care homes at a level which will fairly compensate the hospitals for the fact that the patient's level of care has otherwise changed from acute to long term.

We support this bill because it offers potential to assist individuals awaiting placement in community settings. The legislature has seen many examples in the past few years of the long waitlist for community housing experienced by patients in acute facilities. In addition, a few years ago, briefings were provided by the Healthcare Association on the problems of placing "challenging" patients into community settings.

Regarding the payment to hospitals of long term care based reimbursement rates, we are certainly sympathetic to the economic plight faced by the hospitals who are not receiving adequate reimbursement for these patients who really do not need to even be in the hospital after a point. They are often torn between the financial realities they face

and the general ethic they do possess which directs them to want to treat and care for these individuals. Any assistance the legislature can render will not only help these facilities; it will also make it more likely that these patients will continue to receive adequate care while they are developing an appropriate community placement discharge plan. It will alleviate the pressure hospitals may feel to attempt a premature, potentially inappropriate discharge.

Thank you for the opportunity to testify in support of this measure

SENATE COMMITTEE ON HEALTH
Senator Josh Green, M.D., Chair

SENATE COMMITTEE ON HUMAN SERVICES
Senator Suzanne Chun Oakland, Chair

Conference Room 016
Feb. 10, 2011 at 1:15 p.m.

Supporting SB 787.

The Healthcare Association of Hawaii advocates for its member organizations that span the entire spectrum of health care, including all acute care hospitals, as well as long term care facilities, home care agencies, and hospices. Thank you for this opportunity to testify in support of SB 787, which requires Medicaid to pay hospitals at the rate for acute care services for patients who are waitlisted for long term care. The bill also requires Medicaid to pay long term care facilities at at least the rate for subacute care services for patients with medically complex conditions who were waitlisted in hospitals.

On any given day there are an average of 150 patients in Hawaii's hospitals who have been treated so that they are well enough to be transferred to long term care, but who are waitlisted because long term care is not available. Waitlisting is undesirable because it represents an inappropriate quality of care for the patient and creates a serious financial drain on hospitals. Waitlisted patients also unnecessarily occupy hospital beds that could otherwise be used by those who need acute care. Patients may be waitlisted for a matter of days, weeks, or months, and in some cases over a year.

The waitlist dilemma is unique to Hawaii, largely because Hawaii has one of the lowest ratios of long term care beds for its population in the United States. Whereas the US average is 47 long term care beds per 1000 people over age 65, Hawaii averages 23 (half of the US average). The shortage of long term care beds is the result of high costs of construction and operation, along with low payments for services.

The Healthcare Association has advocated for solutions to the waitlist problem since 2007, when it sponsored SCR 198, which directed the Association to study the problem and propose solutions. The Association subsequently created a task force for that purpose, which studied the problem, wrote a report, and submitted it to the Legislature. However, the Legislature has not yet taken action on it.

Since then the Association has advocated for measures that have been designed to:

- (1) Promote the movement of waitlisted patients out of acute care;

- (2) Reduce unpaid costs incurred by hospitals and free up hospital resources so that they can be used to treat those who need that high level of care; and
- (3) Enable long term care facilities to accept waitlisted Medicaid patients with complex medical conditions while addressing the additional costs related to their care.

Hospitals continue to lose money because of waitlisted patients. A report issued by Ernst & Young in late 2009 reported that Medicaid pays for only 20% to 30% of the actual costs of care for waitlisted patients, representing uncompensated hospital costs of approximately \$72.5 million in 2008. Long term care facilities can provide appropriate care to waitlisted patients, but payments should be set at levels that at least cover the costs of care.

Thank you for this opportunity to testify in support of SB 787.

Re: SB 787 Relating to Health

Chairs, Vice Chairs and committee members, thank you for this opportunity to provide testimony on SB 787 that establishes reimbursement guidelines and provides appropriations for Medicaid to hospitals and facilities with long term care beds.

Kaiser Permanente Hawaii supports this bill.

It has been estimated that Hawaii hospitals lost approximately \$72,500,000 in 2008 due to delays in discharging patients waitlisted for long term care. According to a report to the legislature by the Healthcare Association of Hawaii, there were on average 200, and sometimes as many as 275, patients waitlisted daily in acute care hospitals statewide awaiting placement to long term care beds. Duration of these delays ranged from days or weeks, to months and sometimes years.

Because Medicaid reimburses acute care hospitals at a rate based upon the level of care needed by the patient, when a patient is well enough to be transferred to long term care, Medicaid payments to the hospital are reduced to a fraction of the actual cost of care in the hospital acute care setting. This results in an unfair financial burden on the hospitals, which must continue to provide care at a much higher cost to patients who remain waitlisted in acute care hospital beds due to the unavailability of long term care beds.

Kaiser Foundation Hospital's finances are negatively impacted by this waitlist situation, just as are all the other acute care hospitals in the State. Accordingly, Kaiser Permanente Hawaii strongly supports this bill to provide compensation that would fairly cover the costs of care for

Medicaid patients waitlisted in acute care hospital settings while transfer to long term care is sought, by providing Medicaid reimbursements at the acute medical services payment rate.

Thank you for the opportunity to comment.
