

Aloha mai Committee Members:

I am writing to urge the Committee to support HB 129 (2011). One of the main concerns of my research is the issue of maternal addiction, particularly the many women who are involved in the criminal justice system. (I am a sociologist at the University of Hawai'i at Hilo.) I have been acquainted with the PATH Clinic for several years and have become familiar with their excellent outcomes. It is essential that women who use drugs during pregnancy have access to quality pre- and post-natal care. My many conversations with such women indicate that they will often try to stay under the radar—avoiding doctors and even giving birth on their own because they fear losing their children or coming to the attention of the police. Needless to say, this has catastrophic effects on maternal and child health.

The approach of the PATH Clinic is to meet the women where they are—literally as well as figuratively. They will go above and beyond to get women to the Clinic for their first meeting. Their results speak for themselves in terms of infant indicators like birth weight and near-term births. The majority of women are abstinent at the time of delivery and most women will go on to keep their children and continue to do well.

PATH uses a holistic approach to reproductive health and effectively connects women to substance abuse treatment and other needed services. Their services are culturally appropriate and gender responsive. The professionals at PATH understand the precursors of women's drug use and involvement with the justice system. Gender violence, poverty, mental health problems, and lack of opportunity all play a role in the complex issue of maternal addiction. The research shows us that once women engage in treatment, they are motivated to have a healthy pregnancy. With the right support, their motivation can be built upon to make real breakthroughs. PATH effectively helps women deal with their addiction and provides the services they need to have a good pregnancy outcome. More than that, PATH's patients discover their own strengths and access their own empowerment as a result of the respect and caring that characterize the Clinic's approach.

The war on drugs approach to maternal addiction is ill-founded. The PATH approach works. The modest allocation requested by this bill will be multiplied many times over in returns in good maternal and child health in this vulnerable population. My hope is that there will be a PATH Clinic in each county eventually. They are an excellent model and an important aspect of the continuum of effective child and maternal health services in Hawai'i.

Mahalo nui,

Marilyn Brown, Ph.D.

**House Committee on Health**

**H.B. 129, Relating to Perinatal Care**

**Testimony of Loretta J. Fuddy, A.C.S.W., M.P.H.  
Acting Director of Health**

**January 28, 2011**

1 **Department's Position:** The Department of Health supports the intent of this bill to appropriate  
2 funding for continued operations of the Perinatal Addiction Treatment of Hawaii (PATH) program and  
3 clinic.

4 **Fiscal Implications:** The fiscal costs for implementing this program do not outweigh the short and long  
5 term health care costs if the PATH program and clinic were to close.

6 **Purpose and Justification:** To appropriate monies for the continued operation of the PATH program  
7 and clinic. Funding would be used to support difficult to reach pregnant women, decrease their  
8 substance use, and assist them in delivering a healthy infant they are then able to parent. It is known that  
9 modifiable risk factors associated with substances such as cigarettes and alcohol use can result in  
10 physical, mental, behavioral or learning disabilities and longer term implications for a child's well-  
11 being.

12 The PATH provides a unique and needed resource in our State as a comprehensive perinatal  
13 addiction clinic that integrates prenatal and postpartum obstetric clinical services, addiction medical  
14 services, and social services. The PATH has shown, during its three year project, that it has been highly  
15 successful in assisting its patients in discontinuing use of drugs and delivering healthy infants,  
16 continuing to maintain child custody, using birth spacing and longer term methods to prevent an

1 unintended pregnancy, and planning for their current or future employment including work skill  
2 development. Based on this information, the Maternal and Child Health Branch had awarded the PATH  
3 Clinic funding to implement its services with new contracts to have begun July 1, 2009. However,  
4 based on funding restrictions, this entire program was eliminated.

5 Thank you for this opportunity to testify.

House Committee on Health  
Hearing: Friday, January 28<sup>th</sup>  
9:30am, Conference Room 329  
Testimony: Support of HB129  
Relating to Perinatal Care

Chair Yamane, Vice Chair Morikawa and members of the Committee on Health,

I am submitting testimony in support of House Bill 129 as the Perinatal Addiction Treatment of Hawaii Clinic social worker.

As the bill states, The Path Clinic targets a hard to reach and often over looked population by providing comprehensive perinatal clinical and social services that no other agency on Oahu provides. The Path Clinic outcomes are outstanding and have remained that way since the Clinic opened.

As The Path Clinic social worker, I work with our women and children on a daily basis and witness first hand the determination, resiliency and motivation that these women have to become the healthy, stable, loving, capable mothers that they want to be. I am often told by clients that if it weren't for the non-judgmental and supportive environment of The Path Clinic, they would not have received prenatal care, due to a fear of judgment and bias by care providers.

Without funding from the state, The Path Clinic is not sustainable and will be unable to effectively reach this highly underserved population, which is an injustice to the people of Hawaii.

Attached are written testimony from Path Clinic clients who are eager to share their experiences in support of The Path Clinic.

Thank you for your consideration.

Rachel Dorr, MSW  
The Path Clinic social worker

To whom it may concern,

Hello, my name is Kristy and I have been a patient at the Path Clinic since June 2010. I started coming to the Path Clinic because I got referred by one of the doctors at Kapiolani's outpatient clinic, when I openly admitted to her of my history of drug use. She told me of the services that were offered so I felt that the Path Clinic was the place I wanted to be.

Since I started coming to the Path Clinic, I have quit using drugs, cut back on my smoking of cigarettes, learned about childbirth, breastfeeding, etc, and had my daughter (January 21, 2011). The Path Clinic has helped me with so much with my recovery. I attend classes 3-4 days a week, these classes help keep me busy and reduce my urges to use again.

In the end I feel it is important for the Path clinic to be here because they are a great support system for women like me. Everything here is done without judgment and that has been the biggest help for me with my recovery. I feel that my success with my recovery and birth is because of all that was done for me here at the Path Clinic. I love everyone here and tell everyone about my experiences.

Sincerely,

Kristy

---

Aloha,

My name is Michelle, I come to The Path Clinic because the staff and my doctor explain everything to me, where I can understand everything about my condition, they also support me in different classes about my child's development and my newborn baby, they are also very confidential and I feel safe here. The staff is very understanding. They help me with my parenting skills. The Path Clinic has helped me with coping with my past addiction and help me with relapse prevention, they also give me the best medical treatment. Path Clinic should be here and get long term funding from the state because they are here to help women with addiction to help get their unborn child the right prenatal care, so their baby can be healthy without someone asking them uncomfortable questions, to where they don't take care of their babies.

Thank you for your consideration and supporting the Path Clinic.

Sincerely,

Michelle

Hello,

My name is Rebecca, and I have been a client at the Path Clinic for the past 7 months. I was referred by my ObGyn for my use of cigarettes as it causes a high health risk for my unborn child. The Path Clinic offers excellent smoking cessation classes, counseling, and resources, as well as Stay quit classes for those who have already quit. Through their programs I have successfully cut down by 1/3 the amount I was smoking and will continue to work with them until I am 100% smoke free.

In addition to smoking cessation the Path Clinic offers all sorts of classes from parenting; preparation, coping and discipline, to breastfeeding, as well as staying clean and keeping healthy habits. The Path Clinic also provides transportation to and from classes and prenatal/postnatal appointments, without which I wouldn't have been able to get the care that I needed for my baby during my pregnancy.

Another great benefit of being a patient at the Path Clinic and probably the most important to myself is that they provide child care for my children while I attend much needed classes and doctors appointments. At the Path Clinic we are not treated like patients but like family. The Path Clinic has been a wonderful part of my pregnancy and helped to prepare me for the challenges of life. Thank you.

Rebecca

---

To whom it may concern,

The Path clinic has helped me in so many ways during and after my pregnancy. Even though I only had 2 appointments before I gave birth they gave me a lot of support and never did judge me. They made me feel comfortable and welcome to the clinic. Just to know that there are people out there that do care and support me in so many ways gives me hope and strength that I can do right for my family. I attend classes on Monday and Wednesday and by coming here I already learned so much that I never knew, about myself and my baby. They have helped me be a better mom for my two girls and showed/gave me the little push I needed to go in the right direction. They offer so many things and help for the women here that have different problems, but they go the distance for all of us because they all want us to better ourselves not just as a mom, but as women too. Also by coming here I hear other women's stories and know that I'm not the only one and just to talk to them helps me as a person in so many ways, because I know I have support from them and they know I support them too. If path wasn't here I don't think I'd be heading in the right direction or trying to better myself for my girls. I'm so thankful that there is a place for women to go to that need help with many things. I'm so thankful for all the love and support from the clinic.

Mapu

**Comments:**

A major part of Path's unique value to the community is that it provides comprehensive perinatal care & support to women who may otherwise be unwilling or feel unable to receive services. The integrated team adhere to harm reduction philosophy and trauma directed care. Consequently, Path provides a place of safety in which women are able to receive OBGYN, social and educational care & support. The Path environment & approach foster healthier outcomes; birth & other. As the Path's smoking cessation counselor we currently have a quit rate among pregnancy women of 73% in the first 2 trimesters & 63% in the 3rd trimester. Moreover, women are reporting (qualitatively & via a Smoking Abstinant Self Efficacy Scale)an increase in confidence & self worth. This links in with the ability to sustain quit attempts as well as other healthier behaviors. Hence, when making a decision of funding Path, please consider the costs of not funding Path. Not just in medical and social services, but in the long term: economically, socially and politically. I see the good works of Path every day. I hear the differences that Path makes to a woman's life, every day. I understand the potential impact on infants, children and families, every single day. And I wholeheartedly support this bill.

TO: Rep. Ryan I. Yamane, Chair, Rep Dee Morikawa, Vice Chair and Members of the Committee on Health

FROM: Jackie Berry, Executive Director

RE: **HB 129 Relating to Perinatal Care**

Hearing: Friday, January 28, 2011 at 9:30am

Honorable Chairperson Yamane, Vice Chairperson Morikawa and Members of the Committee on Health

HMHB is a statewide coalition of public and private agencies and individuals committed to the improvement of maternal and infant health status in Hawaii through education, coordination and advocacy. **HMHB is testifying today in support of HB 129 Relating to Perinatal Care.**

The Path Clinic is the only comprehensive prenatal addiction clinic in Hawaii. The Path Clinic was initially funded as a pilot by an Act of the Hawaii Legislature with the goal of improving birth outcomes of pregnant women who used methamphetamines (estimated to be 4-8% of pregnant women in Hawaii). The pilot results far exceeded expectation. The population of women served are known to have a 4-5 times greater risk for costly preterm and low birth weight deliveries. The preterm and low birth weight rates for the 120 women who have received Path services are comparable to the average rates for all women statewide. This is remarkable given the risk level of the population of women served: 98% lived below the poverty level; 57% had lost custody of a previous child; 34% had histories of incarceration; and 31% were homeless at some point during their pregnancy.

While not a substance abuse treatment program, over 90% significantly reduced substance use with 81% becoming abstinent. 95% of women maintained custody of their infants at 10 weeks and the repeat pregnancy rate was very low.

The Path Clinic's harm reduction approach has achieved exceptional success in not only helping women and their babies, but also in saving the cost of expensive medical treatment both for the women and their babies.

We urge you support of this bill.

Mahalo for your consideration of this bill and our testimony.

Hearing: Friday January 28, 2011  
Conference Room 329, State Capitol

Chair Yamane, Vice Chair Morikawa, Members of the Committee:

I am writing to express strong support for HB129: *Appropriates moneys for the continued operation of the Perinatal Addiction Treatment of Hawaii program and clinic.*

Since opening in 2007, the Perinatal Addiction Treatment of Hawaii (PATH) clinic has provided comprehensive perinatal care to women with alcohol and substance abuse issues on Oahu. The care is focused on the social, medical and behavioral health needs of pregnant women who are using substances.

The interests of mothers and their babies are interdependent and substance abuse threatens the health of both. Drug abuse during pregnancy can lead to low birth weight, prematurity, birth defects, and infant mortality. The National Institute on Drug Abuse estimates that in the United States 6 million women of childbearing age are current users of illicit drugs. In Hawaii, the Department of Health found that, using self-reports, approximately three percent of women reported using illicit drugs while they were pregnant, six percent admitted drinking alcohol, and more than eight percent reported smoking while pregnant. These figures reveal an unnecessary burden of risk and damage to infants.

The PATH clinic has demonstrated very successful outcomes in the first three years of operation. They report that 80% of women become abstinent of all substances except tobacco within two months of beginning PATH services, and that the clinic's preterm birth rate and low birthweight rates are at or below state and national averages in a population at high risk for poor birth outcomes.

For more than 70 years, the March of Dimes has been a leader in improving the health of women of child bearing age, infants, and children. The Foundation works to prevent or reduce drug abuse before and during pregnancy by funding community programs such as PATH (grants to PATH in 2008 and 2009) and by supporting basic research regarding reproductive hazards, including substance abuse. Our mission is to *improve the health of babies by preventing birth defects, premature birth, and infant mortality.*

March of Dimes encourages the members of the Committee on Health to join us in helping to improve the health of all babies.

**Comments:**

As a Family Advocate who works part time at the Path Clinic, I have seen many women whose lives are positively effected by the services that Path clinic has for them. Many have either reduced or completely quit their substance use, receive crucial prenatal and postnatal care, and have delivered healthy babies that they do keep custody of. These women attribute these positive changes to the non judgmental, always readily available support/services that they receive at Path Clinic. This is why I strongly support keeping Path Clinic ALIVE.

## Testimony in Support: HB 129

**To:** Chair Ryan Yamane, Vice Chair Dee Morikawa and Members of the House Committee on Health  
**From:** Katie Reardon, Director of Government Relations & Public Affairs, Planned Parenthood of Hawaii  
**Re:** Testimony in Support of HB 129, Relating to Perinatal Care

Planned Parenthood of Hawaii (PPHI) supports HB 129 Relating to Perinatal Care. This bill allows for an appropriation of \$200,000 for the Perinatal Addiction Treatment of Hawaii Clinic (The PATH Clinic). We understand that The PATH Clinic, like too many other non-profit organizations in Hawaii, has suffered during this economic crisis. The appropriation provided in HB 129 will help the organization continue to provide outstanding care to our community.

Among the goals of The PATH Clinic is facilitating the transition of isolated substance-using pregnant women to coping, capable parents linked to community resources, increasing knowledge, access, and readiness to accept long-term birth control among women who struggle with substance abuse issues, and keeping families together and preventing outplacement.

The care that The PATH Clinic provides to the women they serve assists them to not only become and stay healthy during pregnancy, but enables them to build a safe and loving life for their children. The work done at The PATH Clinic is unthinkable difficult and yet their success rate is phenomenal. According to their Pilot Program, at least 80% of the women served stopped using substances altogether and over 90% significantly decreased substance use within 8 weeks of engaging in PATH services. At the time of giving birth, 94% of the women tested clean of substances. Of the few that did test positive, over half agreed to enter a residential treatment program.

The children served by The PATH Clinic similarly did well. While the women who received prenatal services were at very high risks for preterm birth and low birth weight births (a 4-5 fold risk), their birth outcomes were consistent with state and national averages for all births. The children were also more likely to stay with their mothers- 96% of the women maintained custody of their infants 8 weeks after delivery. At PPHI, we believe in providing people with the best possible care and resources they need to make healthy decisions about their sexual and reproductive lives. We also believe that children flourish best in families and communities where they are nurtured, honored, and loved. Based on their goals and the tremendous success of their work, we consider The PATH Clinic an invaluable provider of reproductive health care and social services.

PPHI respectfully asks that the Committee pass HB 129 so that the much needed services of The PATH Clinic can continue. Thank you.

## DEMOCRATIC PARTY OF HAWAII

Hawai'i State Democratic Women's Caucus 1050 Ala Moana Blvd #D-26, Honolulu, HI 96814 Email: [hidemocraticwomenscaucus@yahoo.com](mailto:hidemocraticwomenscaucus@yahoo.com)

January 28, 2011

To: Representative Ryan Yamane, Chair  
Representative Dee Morikawa, Vice Chair and  
Members of the Committee on Health

From: Amy Monk, Women's Caucus of the Democratic Party of Hawaii

Re: HB 129 Relating to Perinatal Care  
Hearing: Friday, January 28, 2011, 9:30 a.m., Conference Room 329

Position: STRONG SUPPORT

Thank you for hearing this bill and for allowing me to present testimony today, in strong support of HB 129 which provides funds for the PATH Clinic. The clinic provides perinatal care and social services to women who have a history of substance use. The goals of the clinic are to provide care so that women give birth to healthy babies they are capable of parenting.

The Hawai'i State Democratic Women's Caucus is a catalyst for progressive, social, economic, and political change through action on critical issues facing Hawai'i's women and girls. It is because of this mission, the Women's Caucus strongly supports this measure which provides care that this population of women may not be able to find elsewhere. The clinic expects to care for over 60 women with addictions in 2011. Since its inception, the clinic has cared for over 180 women.

This clinic provides a successful and effective public health approach to the issue of pregnant women with addictions. Women are provided with care in a small, dedicated and non-judgmental setting which supports them in decreasing their substance use and helps them deliver healthy babies. It is the unique integration of prenatal, clinical, and social services that results in a cessation of substance use in most women. Some women recognize that they require residential substance abuse treatment and the clinic staff facilitates their admission into an appropriate program.

This is the type of program that should be encouraged. It reduces the harms of substance use, it has successful outcomes, and is cost-effective. In the long run, it saves taxpayer money. We urge the committee to pass the measure.

January 28, 2011

To: Rep. Ryan Yamane, Chair  
Rep. Dee Morikawa, Vice Chair and  
Members of the Committee on Health

From: Jeanne Y. Ohta, Executive Director

RE: HB 129 Relating to Perinatal Care  
Hearing: Friday, January 28, 2011, 9:30 a.m., Conf. Room 329

Position: STRONG SUPPORT

Good morning Chair Yamane, Vice Chair Morikawa and Members of the Committee, I am Jeanne Ohta, Executive Director of the Drug Policy Forum of Hawaii testifying today in strong support of this measure.

This measure requests funds for the PATH clinic, a program originally established in 2006 to provide perinatal services to women with substance-use issues. The clinic has been extremely successful, reducing the risk of low-birth weight infants to women who have high-risk pregnancies because of their histories of drug usage.

Without the clinic, services that provide appropriate health care to substance-using pregnant women to ensure the birth of a healthy baby are either extremely limited or unavailable. In addition, the care of just one extremely low-birth weight infant for the first year of its life averages \$200,000.

The clinic's programs provide both prenatal care, and follow up services in a supportive environment rather than a punitive one. One of the barriers to women seeking perinatal care is fear of prosecution. This type of program recognizes the importance of a public health approach to the issue of pregnant drug-using women.

The clinic has also been successful in enabling its patients to become successful parents, encouraging families to stay together and to avoid foster care and child protective services systems.

Please pass this bill and provide funding for this worthwhile and effective program. Thank you for this opportunity to provide testimony.

S

Testimony  
By Ted Sakai  
House Bill 129, Relating to Perinatal Care  
House Committee on Health  
Representative Ryan I. Yamane, Chair  
Representative Dee Morikawa, Vice Chair  
Friday, January 28, 2011, 9:30 a.m.  
Conference Room 329, State Capitol

Representative Yamane, Representative Morikawa, and Members of the Committee on Health:

I strongly support HB 129, Relating to Perinatal Care, and urge its passage. I am a member of the Board of Directors of the PATH Clinic. I receive no remuneration of any kind for this service. I do this because I believe in what PATH is doing, and I believe in its efficacy.

The need for and the documented accomplishments of the PATH Clinic are fully described in this bill. I would like to provide you with a different perspective on the importance of the PATH Clinic to our community.

I am a corrections professional who retired in 2005 after 26 years with the Department of Public Safety. Among other positions, I served as the Director of Public Safety (PSD) from December 1998 to December 2002; as a prison Warden, and as the head of correctional programs, including substance abuse treatment. During the time I was with PSD, I watched the inmate population grow almost five-fold, with the population of women inmates growing at even faster rate. This growth was accompanied by a concomitant increase in expenditures for jails and prisons. This growth, including the growth in dollars, was fueled by drug abuse.

I recall being discouraged as I watched as second and third generation offenders (those whose parents had also served prison time) entered and re-entered they system. And I recall the dismay when I learned of offenders who had been born addicted, because their mothers had been using drugs during pregnancy. These experiences convinced me of the vital importance of program, like PATH. Every child born of a mother who was served by PAT was in clear danger of becoming a drug addict, and eventually, an inmate in our system. Because of PATH, these children now have a real chance to have a normal life. This is prevention at its best – and at its earliest.

Our community needs the PATH clinic. PATH deserves your support. Please pass HB 129.

**Comments:**

I support the funding of PATH that serves pregnant women who have a history of substance use.

The clinic is requesting ONLY \$200,000 per year.

The clinic is cost effective, because the average cost of medical care for ONE very low weight infant in its first year of life is over \$200,000.

Women who received prenatal services at PATH were very high risk for preterm birth and low birth weight births. However, the birth weights at PATH were consistent with state and national averages for all births.

While PATH is not a substance abuse treatment program, over 80% of the women stopped using drugs. 94% tested clean of substances at the time of birth. Over half of the women who tested positive for drug use at birth entered residential substance abuse treatment, often noting that their experience at PATH contributed to their readiness to accept treatment.

96% of the women maintained custody of their infants 8 weeks after delivery, which is very encouraging since 57% had lost custody of at least one previous child. 50% of the women who lost custody of their infants were pregnant again within 9 months of having given birth.

Clearly PATH is the path to breaking the addiction/pregnancy cycle. This cycle is extremely costly to the government.

S

Comments:

I am a certified nurse midwife that cares the woman currently at Kaiser Waipio Clinic, and before that at Kalihi Palama Health Center for 11 years.

I completely support the continued funding for the PATH clinic. I have referred several woman to PATH who were using drugs during their pregnancy. PATH supported theses women completely leading to good outcomes for mom and babies. Amazing! Please do not let this vital clinic which helps some of the most fragile pregnant women, close their doors - it would be our loss as a state!
