
A BILL FOR AN ACT

RELATING TO THE PUBLIC UTILITIES COMMISSION.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the public utilities
2 commission plays a central role in ensuring the viability and
3 reliability of Hawaii's utility infrastructure, ranging from
4 water carriers to electric utilities. Recognizing the
5 importance of establishing and maintaining effective, efficient,
6 and accessible utility systems statewide, the legislature
7 empowers the public utilities commission to regulate utilities
8 pursuant to chapter 269, Hawaii Revised Statutes. It is the
9 responsibility of the public utilities commission to balance the
10 public's need for reliable services and reasonable rates with
11 the need for utilities to earn a reasonable return on
12 investment.

13 The legislature also finds that recent decisions relating
14 to water carriers and electric utilities have created
15 uncertainty in the utilities market in regards to how decisions
16 are made and how each project's economic impacts are considered.
17 It is crucial for Hawaii to maintain a transparent regulatory
18 environment that provides clarity and accountability to

1 businesses and consumers so they can make informed plans and
2 investment decisions. The far reaching impacts of the public
3 utilities commission decisions not only affect consumers and
4 businesses, but they also affect Hawaii's reputation as a place
5 to do business. In the current economic environment, Hawaii can
6 ill afford any perception of having a negative regulatory
7 environment.

8 The legislature further finds that in order to provide the
9 needed clarity and accountability, the public utilities
10 commission should provide an economic impact analysis with any
11 decision and order that has a fiscal or rate impact. This will
12 help stakeholders make informed decisions and provide the public
13 with the confidence and certainty they need.

14 The purpose of this section is to require parties to
15 proceedings before the public utilities commission to prepare an
16 economic impact analysis of a proposed action by the commission
17 and to require the commission to include an economic impact
18 analysis in its decisions and orders.

19 SECTION 2. Chapter 269, Hawaii Revised Statutes, is
20 amended by adding two new sections to part I to be appropriately
21 designated and to read as follows:

1 "§269-A Economic impact analysis. (a) Any party that
2 applies to the commission for a project, rate change, or other
3 proposal with a fiscal, rate, fare, charge, or schedule impact
4 shall submit an initial economic impact analysis with the
5 application, pursuant to section 269-B. The economic impact
6 analysis shall be made available to any party in interest to the
7 proceeding.

8 (b) Any party in interest to the proceeding, including a
9 proponent of an alternative project, may submit, in writing, an
10 economic impact analysis to be included as part of a statement
11 in opposition, if applicable.

12 (c) At any time prior to a final determination by the
13 commission, the applicant may revise the initial economic impact
14 analysis or rebut another submitted economic impact analysis by
15 submitting a reply statement of position.

16 (d) The commission, upon a showing of good cause, may
17 consider an alternative proposal or alternative economic impact
18 analysis that is filed after the deadline; provided that any
19 party in interest to the proceeding is afforded sufficient time
20 to review the document.

21 (e) When issuing a decision and order, the commission
22 shall attach a final economic impact analysis and summary on how

1 the analysis was factored into the decision and order, as
2 compared to other factors.

3 §269-B Economic impact analysis; requirements. Any
4 economic impact analysis submitted to the commission shall
5 provide at least one of the following:

6 (1) A cost-benefit analysis that identifies:

7 (A) The cumulative cost, including the total capital,
8 operation, and maintenance costs of the proposal;

9 (B) Any direct costs to be incurred by the general
10 public as a result of the proposal; and

11 (C) Any relevant direct or indirect benefits, losses,
12 or harms related to the proposal, including
13 impacts on the economy and environment;

14 (2) General business or industry studies that examine the
15 direct costs of the proposal on impacted entities,
16 including information on:

17 (A) The characteristics and current economic
18 conditions of the impacted business or industry
19 sector;

20 (B) The projected impacts on the growth of the
21 affected industry sectors with and without
22 implementation of the proposal;

1 (C) How the proposal may affect or alter the growth
2 of the affected industry sector; or

3 (D) The direct cost of the proposal on the affected
4 industry sector; or

5 (3) An economic impact analysis that:

6 (A) Identifies the consumers and business sectors
7 that will be impacted by the proposal;

8 (B) Quantifies the direct cost to the primary
9 affected businesses or consumers; and

10 (C) Incorporates an estimate of the economic impact
11 of the proposal on the supporting businesses and
12 industry sectors associated with the primary
13 affected businesses or industry sectors."

14 SECTION 3. In codifying the new sections added by section
15 2 of this Act, the revisor of statutes shall substitute
16 appropriate section numbers for the letters used in designating
17 the new sections in this Act.

18 SECTION 4. New statutory material is underscored.

1 SECTION 5. This Act shall take effect upon its approval.
