
A BILL FOR AN ACT

RELATING TO AGRICULTURE.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that Hawaii is one of the
2 most geographically isolated state in the country and is very
3 dependent on food that is imported from other states and
4 countries. Approximately ninety-two per cent of our food is
5 imported according to the United States Department of
6 Agriculture. Currently, Hawaii has a supply of fresh produce
7 that could last for approximately ten days. Ninety per cent of
8 beef, sixty-five per cent of fresh fruits, and eighty per cent
9 of all milk purchased in the State are imported. In the event
10 of a natural disaster, economic disruption, or other external
11 events that are beyond the State's control, the residents of
12 this State may be at risk of a food shortage because of the
13 State's heavy reliance on imported foods.

14 The legislature further finds that each food product that
15 is imported into the State is a lost opportunity for local
16 economic growth. The University of Hawaii college of tropical
17 agriculture and human resources notes that an increase in the
18 production and sale of Hawaii-grown agricultural commodities

1 would create an increase in job opportunities, and that
2 replacing approximately ten per cent of all imported foods with
3 locally grown foods could create up to two thousand three
4 hundred jobs.

5 The legislature further finds that by establishing a food
6 sustainability standard, the State will be able to ensure
7 economic viability. This standard will also help to create a
8 framework for long-term land use planning, resource allocation,
9 and tax incentives and will also direct the State's economy
10 towards a more robust and sustainable future.

11 The purpose of this Act is to establish a food
12 sustainability standard by increasing the production of locally
13 grown foods that will lead to the diversification of the State's
14 economy, create new job opportunities, advance long-term
15 economic stability, and promote food security for the State.

16 SECTION 2. The Hawaii Revised Statutes is amended by
17 adding a new chapter to be appropriately designated and to read
18 as follows:

19 **"CHAPTER**

20 **FOOD SUSTAINABILITY**

21 § -1 **Definitions.** As used in this chapter, unless the
22 context otherwise requires:

1 "Department" means the department of agriculture.

2 "Farm cash receipts" means the gross revenue of farms from
3 the sale of Hawaii-grown products, including livestock, dairy,
4 and edible crops, as determined by the department on an annual
5 basis.

6 "Food sustainability standard" means the volume of food
7 commodities sold in the State, measured by farm cash receipts,
8 or as otherwise determined by the department, that are grown in
9 the State.

10 § -2 Department of agriculture duties. (a) The
11 department shall be responsible for measuring and analyzing the
12 amount of food livestock, dairy, and edible crop commodities
13 grown and sold in the State on an annual basis. This
14 information shall be made publicly available in accordance with
15 chapter 92F.

16 (b) The department, on an annual basis and in conjunction
17 with the department of business, economic development, and
18 tourism, shall identify key food commodities to be targeted for
19 assistance for developing an increased local market share.

20 (c) The department shall be responsible for planning and
21 adopting the necessary incentives to ensure that the food

1 sustainability standard established in this chapter is met or
2 exceeded.

3 (d) The department shall submit an annual report to the
4 legislature, no later than twenty days prior to the convening of
5 each regular session, on the status and progress of the
6 department's efforts to effectuate this chapter. The annual
7 report shall include any recommended policy changes or necessary
8 legislation.

9 (e) The department may adopt rules as necessary, pursuant
10 to chapter 91, to effectuate the purposes of this chapter.

11 § -3 **Food sustainability standard.** (a) The department
12 shall establish a statewide food sustainability standard, to be
13 achieved by the year 2020, that requires the State to increase
14 the production of food grown in the State for local consumption
15 to no less than twice the amount of locally grown food in 2013;
16 provided that the department shall measure this amount by the
17 farm cash receipts for livestock, dairy, and crops without
18 regard to any inflation adjustments, or by a comparable
19 measurement as determined by the department.

20 (b) The department shall submit a report and
21 recommendations to the legislature no later than twenty days

1 prior to the convening of the 2020 regular session on how to
2 raise the food sustainability standard over the next decade.

3 § -4 Prohibitions. After December 31, 2019, if the
4 department determines that a particular year did not achieve the
5 food sustainability standard, notwithstanding any law to the
6 contrary, no discretionary approvals shall be granted by the
7 State, or any subdivision of the State, for a proposed
8 reclassification of an agricultural or conservation district
9 boundary of lands greater than twenty-five acres in size, until
10 such time as the department determines that the food
11 sustainability standard is achieved."

12 SECTION 3. This Act shall take effect upon its approval.
