
A BILL FOR AN ACT

RELATING TO DISPOSITION OF DEAD HUMAN BODIES.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the roles and
2 responsibilities of state agencies and custodians of unclaimed
3 dead human bodies require clarification. Chapter 327, part II,
4 Hawaii Revised Statutes, which authorizes the department of
5 health to provide unclaimed dead human bodies to a university or
6 other institution for educational or research purposes, is in
7 direct contradiction with the Uniform Anatomical Gifts Act,
8 chapter 327, part I, Hawaii Revised Statutes.

9 The purpose of this Act is to repeal the authority of the
10 department of health to deliver or distribute an unclaimed dead
11 human body to a university, hospital, or institution for medical
12 educational and research purposes, and to clarify the
13 responsibilities of the person who has possession, charge, or
14 control of an unclaimed dead human body with respect to
15 gathering and providing information to state agencies.

15 control of any unclaimed dead human body [~~required to be buried~~]
16 that may be cremated at public expense pursuant to section 346-

3 with the department of health pursuant to chapter 338."

JUSTIFICATION SHEET

DEPARTMENT: Health

TITLE: A BILL FOR AN ACT RELATING TO DISPOSITION OF DEAD HUMAN BODIES

PURPOSE: To repeal the authority of the department of health to deliver or distribute an unclaimed dead human body to a university, hospital, or institution for medical educational and research purposes, and to clarify the responsibilities of the person who has possession, charge, or control of an unclaimed dead human body with respect to gathering and providing information to state agencies.

MEANS: Repeal sections 327-31, 327-33, 327-34, 327-35, and 327-37, Hawaii Revised Statutes (HRS); amend sections 327-32, 327-36, and 327-38; and amend the title of chapter 327, part II.

JUSTIFICATION: The department of health currently plays no role in overseeing donations of unclaimed corpses for medical education and research. Part I of chapter 327, HRS, the Uniform Anatomical Gifts Act, prohibits the donation of dead human bodies or anatomical gifts without express consent. The department of health, by definition, is unable to obtain consent to donate a dead human body for medical education or research pursuant to chapter 327, part I, HRS, if the body is unclaimed. There has been some confusion about this in the past. In policy and practice educational and research institutions only receive dead human bodies that are willfully and explicitly donated in accordance with part I of chapter 327, HRS.

Further, the bill clarifies the roles and responsibilities of the person in possession of a dead human body to locate a person to claim the body. If the person in possession

uses due diligence to locate a relative, friend, member of a fraternal society of which the deceased is a member, or a legally responsible party, but is unable to find such a person to accept responsibility for final disposition of the dead human body, the person in possession shall notify the department of human services in writing of the efforts used to locate a concerned party and obtain the approval of the department of human services to declare the body unclaimed.

Finally, the bill also makes it clear that the provisions of section 327-32, HRS, shall not interfere with or contradict chapter 338, HRS, which deals with death certificates.

Impact on the public: This bill preserves the dignity of unidentified or unclaimed deceased persons in line with current standards for other types of anatomical gifts, i.e. consent from self or next of kin prior to donation for educational or research purposes. There will be no disruption to medical education and research because unclaimed dead human bodies are not used by the institutions that conduct the education or research.

Impact on the department and other agencies: This bill will clarify that the department of health is not responsible for providing unclaimed dead human bodies to institutions for educational or research purposes. The impact on the department of human services is that it will be DHS' responsibility to confirm that due diligence was made in the determination that the corpse is, in fact, unclaimed, by the person in possession of the body. This impact is anticipated to be minimal because DHS already pays for the disposition of unclaimed bodies, and because of the infrequency of unclaimed corpses eligible for publicly funded disposal, which is estimated at zero to two per year.
