
A BILL FOR AN ACT

RELATING TO ENVIRONMENTAL PROTECTION.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the State has a
2 compelling interest in protecting its precious natural
3 environment. Several countries and international and domestic
4 cities have successfully implemented laws that have reduced non-
5 reusable checkout bag usage and used offset fees to protect the
6 environment. A significant reduction of non-reusable checkout
7 bag waste and litter in Hawaii would likely benefit the public's
8 health and welfare because the people of Hawaii depend on our
9 natural environment for economic, social, and cultural reasons.

10 The legislature also finds that the production and disposal
11 of non-reusable checkout bags should be mitigated by additional
12 funding to reduce water quality damage, deforestation, and
13 climate change. Improper disposal of bags, particularly plastic
14 bags, pollutes Hawaii's streams and coral reefs and strangles
15 and starves endangered marine animals. Increasing the resilience
16 of marine ecosystems to the threat posed by pollution requires
17 litter removal, strengthening water quality measures, and
18 reducing erosion and sedimentation of reefs.

1 The purpose of this Act is to reduce the adverse impact of
2 non-reusable checkout bag waste on Hawaii's precious and unique
3 natural environment by establishing an offset fee for the
4 distribution of single-use checkout bags to fund programs to
5 improve water quality and resilience to climate change.
