
A BILL FOR AN ACT

RELATING TO AGRICULTURE.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. Global natural farming is an agricultural
2 methodology developed and refined over the past fifty years by
3 Han Kyu Cho of the Republic of Korea. Cho's techniques have
4 been demonstrated world-wide in more than thirty countries as a
5 viable method of agricultural production without the use of
6 conventional and imported pesticides and fertilizers.

7 Cho's global natural farming is a distinctive approach to
8 organic farming that uses local natural farm resources and
9 indigenous microorganisms. It involves the propagation of
10 mycorrhizae along with protocols for adding specific nutritional
11 inputs during critical growth stages of plants. The inputs are
12 not only safe for the environment, but they actually
13 rehabilitate the ecology.

14 In addition to the promotion of environmental protection,
15 global natural farming has numerous, more tangible benefits.
16 There are currently six acres of land in Waianae, Oahu, being
17 used for the natural farming of Vietnamese taro and Thai basil.
18 Since the natural farming project was commenced in June 2010,

1 product quality has been improved, product yields have
