## HOUSE RESOLUTION

URGING FOOD PRODUCERS TO VOLUNTARILY LABEL THEIR PRODUCTS AS  
BEING FREE OF GENETICALLY MODIFIED ORGANISMS.

1           WHEREAS, since their commercial introduction in 1996, crops  
2 containing genetically modified organisms, commonly referred to  
3 as GMOs, have been put into widespread production by growers in  
4 the United States and throughout the world; and  
5

6           WHEREAS, benefits of genetically engineered plants include  
7 increased resistance to insects and disease, enhanced drought  
8 tolerance and greater crop yields; and  
9

10           WHEREAS, oversight of GMOs is provided by the United States  
11 Food and Drug Administration, Department of Agriculture and  
12 Environmental Protection Agency; and  
13

14           WHEREAS, biotechnology developed by University of Hawaii  
15 researchers helped save the papaya industry from devastating  
16 effects of the papaya ringspot virus; and  
17

18           WHEREAS, despite the benefits of producing food through  
19 agricultural biotechnology, there are also significant concerns  
20 about possible negative impacts on public health, the  
21 environment and the economy; and  
22

23           WHEREAS, specific concerns about GMOs include introducing  
24 allergens and toxins into food, lessening nutritional content  
25 and contaminating non-genetically engineered crops; and  
26

27           WHEREAS, some of the most widely planted crops containing  
28 GMOs are soybeans, cotton, rice and corn; and  
29

30           WHEREAS, GMOs are present in many processed foods that  
31 contain high-fructose corn syrup, such as carbonated drinks,  
32 breakfast cereals and popular snack products; and

1  
2 WHEREAS, it is important for the people of Hawaii to be  
3 well informed when making nutritional decisions for themselves  
4 and their families; and  
5

6 WHEREAS, food companies in the United States are presently  
7 not required to label their products as containing GMOs; and

8 WHEREAS, indicating the presence or absence of GMOs through  
9 product labeling helps consumers make informed decisions about  
10 the foods they buy; now, therefore,  
11

12 BE IT RESOLVED by the House of Representatives of the  
13 Twenty-sixth Legislature of the State of Hawaii, Regular Session  
14 of 2012, that local food producers are urged to voluntarily  
15 label their products as "No GMOs," if in fact these products  
16 have no genetically engineered ingredients; and  
17

18 BE IT FURTHER RESOLVED that certified copies of this  
19 Resolution be transmitted to the Maui Chamber of Commerce,  
20 Honolulu Chamber of Commerce, Chamber of Commerce of Hawaii,  
21 Kauai Chamber of Commerce and Molokai Chamber of Commerce, along  
22 with the Hawaii Farm Bureau Federation, Hawaii Farmers Union  
23 United, Hawaii Food Manufacturers Association, Hawaii Crop  
24 Improvement Association, Hawaii Cattlemen's Association, Hawaii  
25 Cattlemen's Council, farmers market operators and other  
26 organizations involved with made-in-Hawaii food production.  
27  
28
