

LATE TESTIMONY

Testimony from Hawaii Farmers Union United

HB 2151 Supporting with comments and concerns

We do not want to take away the long standing right of every farm to have a road side stand to sell agriculture crops that they grow on their farms.

We appreciate the broadening of the scope and allowing Hawaii grown produce to be sold and allowing added value crops.

We are concern about the reference to all products being "raw" since some added value crops require processing, Mac nuts, Taro etc.

Lip Service to Family Farms.

No Acre minimum
