The Honorable Josh Green, M.D., Chair  
The Honorable Clarence K. Nishihara, Vice Chair  
Senate Committee on health

From: Paula Arcena, Public Policy Director

Re: SB126 relating to persons with disabilities

Thank you for the opportunity to testify on SB26 which would establish a Medicaid buy-in program for working people with disabilities; allows for the formation of a Medicaid shortfall joint legislative task force to examine issues relating to Medicaid shortfalls; and makes a matching fund appropriation for employment training and placement.

AlohaCare **supports** the formation of a Joint Legislative Task Force on Medicaid. We are not testifying on other portions of this bill.

The establishment of a Joint Legislative Task Force on Medicaid will formalize the Medicaid Task Force initiated during the 2010 session by Sen. Suzanne Chun Oakland to address the State's Medicaid budget shortfall. Meetings of the informal task force have occurred regularly through the year and have been well attended. The informal task force has been a productive forum for sharing information and discussing plans for the Medicaid program and we support its formalization.

AlohaCare is a non-profit, Hawaii based health plan founded in 1994 by Hawaii's community health centers to serve low-income families and medically vulnerable members of our community through government sponsored health insurance programs. We serve beneficiaries of Medicaid and Medicare on all islands.

AlohaCare has been contracted by the Hawaii Department of Human Services since the QUEST program started in 1994 to provide insurance coverage for Medicaid eligible beneficiaries through the QUEST program. We serve approximately 75,000 QUEST enrollees statewide.

Thank you for this opportunity to testify.

Aloha Senate Committee Members,

Please support SB 126. I work with people with disabilities and it is so important that they be able to maintain their health insurance while pursuing employment.

They should not fear losing their health insurance in order to work which is so important not just for their financial well-being but also the dignity of work that employment brings.

January 26, 2011

The Honorable John M. Mizuno  
House District 30  
Hawaii State Capitol, Room 436  
Honolulu, HI 96813

Dear Rep. John M. Mizuno:

I am writing to summarize my thoughts on SB126 regarding Medicaid for working persons with disabilities. Medicaid Buy-ins are in place throughout the country, with Hawaii as one of seven remaining states not to have one. Each our 43 sister states that have implemented Medicaid Buy-ins have done so by tailoring their programs to match their respective Medicaid programs. In general, they have been created in a manner that, over time, reduces the long-term need for working people with disabilities to be on an extensive array of benefits and requires them to pay a portion of their Medicaid in premiums and co-pays.

I have served as the Principal Investigator for the Medicaid Infrastructure Grant since its inception in 2005. My team and I have reviewed this possibility for Hawaii over these many years. I am writing to express my general support of the concept, but we provide our opinion from an academic point of view, looking at pros and cons, and as such we understand that there are both costs and benefits to such a program. We worked extensively with Hawaii's Medicaid actuary, Milliman, to conduct a study that provides the theoretical pluses and minuses of the policy option. That study has been submitted electronically as testimony for your consideration.

I would be happy to provide any support available to assist you in making your decision on this matter

Regards,

Robert Stodden, PhD

THE TWENTY-SIXTH LEGISLATURE  
REGULAR SESSION OF 2011**

**Committee on Human Services  
Committee on Health  
Testimony in Support of S.B.126  
Relating to Persons With Disabilities**

**Thursday, February 10, 2011, 1:15 P.M.  
Conference Room 016**

Chair Chun –Oakland, Chair Green and Members of the Committees:

I am Louis Erteschik, Staff Attorney at the Hawaii Disability Rights Center, and am testifying in support of this bill.

The purpose of the bill is to establish a medicaid buy in program for working people with disabilities. The goal would be that these individuals can purchase the necessary medical premiums that they might otherwise not qualify for or be eligible for if they were to obtain gainful employment.

Currently, many people who have some disability want competitive employment – yet they cannot afford to lose their health care which they obtain via their status as a Medicaid recipient. This bill, for that reason, allows them to purchase the health care and enables these individuals to achieve a greater sense of fulfillment and satisfaction. It also allows them to pull themselves up from poverty as a result of acquiring greater income. For that reason, most of the states in the country have adopted some form of program along the lines specified in this bill. It results frequently in “win – win” situation, where the individual maintains their health care and achieves a higher income and ends up being a more productive, less dependent, member of society.

Thank you for the opportunity to testify in support of this measure.

SUPPORT SB 126

Implementation of MEDICAID BUY-IN by DHS

Honorable Hawaii State Senators:

Mahalo for the opportunity to give my support to SB 126.

The Buy-in will allow people with disabilities to work and contribute to their healthcare and earn enough money to work their way out of poverty level earnings.

Nearly all states (42) in the United States of America have implemented a Medicaid Healthcare Buy-in for individuals with disabilities who want to go to work yet can't afford to lose their Medicaid healthcare or waiver services.

The State of Hawaii needs to keep its promise. DHS committed to the proposed Buy-in in 2005 when it began accepting seven years of significant funds from CMS to study the issue as it applied to Hawaii's infrastructure changes needed to address systems changes and educate on how the Buy-in can help people with disabilities, contribute to the cost of their healthcare without having to spend down to poverty levels to keep their healthcare.

I strongly urge the committee to look at the research findings that show a list of important factors that benefits people with disabilities, and set the standard and send the message

that Hawaii believes that having a disability doesn't mean you have to remain poor because one must not work to safeguard healthcare.

**LATE**

February 10, 2011

This is to inform you that United Self Help wholeheartedly supports the medicaid buy in program.

It would allow SSDI recipients to take advantage of Ticket to Work at the same rate that consumers that get SSI have been doing for years. Our system currently has created a disincentive to work and a fear of loosing medical coverage if they do. This would offer an incentive for them to work, one of the keys to recovery. We are one of the few states not to have it. If you need more information, please feel to call. One of the experts is Bill Mihalke at the University of Hawaii, [mihalke@hawaii.edu](mailto:mihalke@hawaii.edu).

We are a consumer run agency reaching about 1000 consumers /year with a newsletter that reaches 4,000 consumers.

If we can help in any way, feel free to call.

Sincerely,

Bud Bowles

LAT

Dear members of the Senate,

I am in support of bill SB126 Medicaid Buy In. This bill would allow many people who have been either not eligible for Medicaid or are afraid of losing Medicaid the option to pay and be covered.

I work with individuals who have disabilities and are trying to get back in the work force. Many individuals who are trying to work not only need the extra money but also want to feel like a "productive" citizen by working. Not having the option to purchase Medicaid has been a barrier to employment in many of the cases I have worked with.

One example of these barriers is if an individual qualifies for SSDI before their retirement age, he or she has to wait 2 years to be covered by Medicare. Most of the time someone who qualifies for SSDI makes "too much" to qualify for Medicaid coverage. These beneficiaries usually do not have private insurance because they have not been working due to their disability. So their choices are: go back to work full time to maybe get private insurance through their employer or wait 2 years to get medical then try and work. It seems to make much more sense to have an option to purchase Medicaid until Medicare kicks in so that the person can go back to work at their own pace. Going back to work is good mentally for the beneficiary and also benefits everyone else because they are paying into the system.

Another section of people I have worked with have SSDI and qualify for Medicaid only because they have a spend down. This option makes no sense to anyone who is able and willing to work if all of their money is going to have to go towards their medical costs, what's the point of working at all?

The other section of people I have seen get affected are those who were receiving SSI and were working and made enough to be switched over to the SSDI program. Once switched to SSDI, they no longer qualified for Medicaid and had to wait the two years for Medicare. This affects their medications, co-pays, and which doctors they see which can be very disruptive to anyone.

Another group of people I have worked with get booted off Medicaid once they make a certain amount. This has been detrimental to some individuals in particular because they now have to pay \$200 for a certain medication or they go without it and have to stop working completely and be hospitalized. If they had the option to buy in, they would not need to stop work due to medication expenses.

I realize my examples are all anecdotal but we all know how important health insurance is to everyone. It is really sad that Hawaii is one of 7 states without the Medicaid buy in option. I feel like more people with disabilities would feel more confident in going back and trying to work if they have the peace of mind knowing that they have health insurance. So many people I have worked with have stopped working due to this issue and I see the Medicaid Buy in as a way to get a lot more people back in the work force.

Respectfully submitted,

Jennifer Grant

SUPPORT SB 126  
Implementation of MEDICAID BUY-IN by DHS

HONORABLE HAWAII STATE SENATORS:

Mahalo for the opportunity to give my support to SB 126.

The Buy-in will allow people with disabilities to work and contribute to their healthcare and earn enough money to work their way out of poverty level earnings.

Nearly all states (42) in the United States of America have implemented a Medicaid healthcare Buy-in for individuals with disabilities who wants to go to work yet can't afford to lose their Medicaid healthcare or waiver services.

The state of Hawaii committed to the proposed Buy-in in 2005 when it began accepting seven years of significant funds from CMS to study the issue as it applied to Hawaii's infrastructure changes needed to address systems changes and educated on how the Buy-in can help people with disabilities, contribute to the cost of their healthcare without having to spend down to poverty levels to keep their healthcare.

The State's actuarial researcher, Milliman, researched with the collaboration of the University of Hawaii Center on Disability Studies, three options for the Department of Human Services to take under consideration. University of Hawaii has worked with DHS to discover the best option for Hawaii.

I strongly urge the committee to look at the research findings that show a list of important factors that benefits people with disabilities, and set the standard and sends the message that Hawaii believes that having a disability doesn't mean you have to remain poor because one much not work to safeguard healthcare.

**Comments:**

I appreciate the opportunity to comment on HB760, Hawaii Medicaid Buy-In. I support this legislation on behalf of all persons with disabilities in our State. I currently work as a private consultant in educating persons receiving SSI/SSDI benefits on how work affects their benefits including Medicaid/Medicare. I have 30 years experience working with people with disabilities with the past 13 years being here in Hawaii. During my employment with Social Security and the Ticket to Work program, I worked with the Hawaii MIG in promoting work incentives and benefits education in our State. I can say that at least weekly I have heard from beneficiaries and recipients of all ages with disabilities who want to return to work but fear losing their Medicaid benefits. For so many, just a few hours of work would cause them to lose their Medicaid. They really do want to return to productive lives and get off of the cash benefits but still need health coverage and would gladly pay a premium to have Medicaid when no other health insurance is available. I urge you to pass this very important Bill so that our State can be in line with the many States on the Mainland that already have Medicaid Buy-In programs in place. Thank you for the opportunity to comment.

SB126

RELATING TO PERSONS WITH DISABILITIES

Senate HMS/HLTH  
THE TWENTY-SIXTH LEGISLATURE  
REGULAR SESSION OF 2011

Thursday February 10, 2011

DATE:  
TIME: 1:30pm  
PLACE: Conference Room016  
State Capitol  
415 South Beretania Street

Good Morning: My name is Gretchen Lawson, I am the President/CEO of the Arc of Kona, a private, non-profit 501C3 organization supporting people with disability. One of the most important aspects of working with people limited by a disability is identifying their abilities and then providing training, support and access that enable these individuals to lead a productive life. Work is a critical factor in providing this avenue so they can become active citizens.

For the past 5 years I have been a member of the Medicaid Infrastructure Grant advisory committee and have worked to bring the Medicaid Buy-In program to Hawaii. This means that the fear of losing benefits can be reduced by allowing people the opportunity to purchase into the health benefits program. This has been studied and the recommendation is positive. Medicaid Buy-ins are possible in 40 other states and by supporting this legislation you will be approving a way for people with disabilities to work and gain financial independence.

Thank you for supporting HB 760.

Gretchen Lawson  
President/CEO, Arc of Kona

**LATE**

Aloha to the Committee,

My name is Robert Scott Wall and I am writing in support of SB126. I serve on the Governors Commission on Rehabilitation, Mental Health America's Board of Directors, and am on the standing committee creating the Consumer, Family, & Youth Alliance with the aid of the Mental Health Transformation State Incentive Grant.

In 2004 the State of Hawai'i committed itself to creating a Medicaid Buy-In and I have been working for over four years to help that happen. In the end this would only affect around one thousand of our State's population who have a serious and persistent mental illness and receive S.S.D.I. from Social Security.

Because of a flaw in the writing of the Ticket to Work Legislation in Hawai'i it only applies to persons receiving S.S.I. If a person receives S.S.D.I. they are stuck because income in that category is considered at a dollar for dollar rate by the Department of Human Services whereas if the person received S.S.I. that would be assessed at a \$2.00 for \$1.00 rate.

For myself that means that I can only earn \$14.00 a month under Ticket to Work without losing my Medicaid coverage. You must understand that this isn't truly about the money. The \$800 that we could earn from Ticket to Work won't change our lives but it would make it fundamentally better.

Not only that but it will get us to start paying taxes! It will take us off Food Stamps! It will improve our view of ourselves and our place in the world.

According to the Medicaid Infrastructure Grant this will only effect about 1,000 of the 56,000 Hawaiians who suffer from a serious and persistent mental illness, not the entire disabled population. It will in the end be revenue neutral. It will improve the

quality of life of a group of people that should not have to fight for this benefit in the first place since they should have been included from the beginning.

Please support SB126

Mahalo,

Robert Scott Wall

RE: SB126, Relating to Persons with Disabilities: Medicaid Buy-In

We are submitting this testimony to express strong support for SB126. Hawai'i's Ticket to Work program is flawed, in that it only applies to persons receiving SSI. This would correct the flaw, and increase the employment options for persons with disabilities, many of whom are ready and willing to work but do not want to lose their Medicaid benefits. Forty-two states have this Medicaid Buy-In program.

We urge you to pass SB126.

**Petition for the Development of a Medicaid Buy-in for Working People with Disabilities**

We, the undersigned of this petition, are asking Hawaii Governor Linda Lingle and the Hawaii State Legislature to develop a Medicaid Buy-in for Working People with Disabilities.

Hawaii is one of eight remaining states in the union without a Medicaid group allowing people with disabilities who want to work the opportunity to purchase Medicaid to keep their healthcare. While 42 states have approached this in different ways, in general, it allows people with disabilities on public benefits to go back to work by raising the income and asset limits for Medicaid in exchange for premiums and co-pays, which can often be significant. The 42 states with buy-ins have created their programs in a wide variety of ways that consider the differences in their Medicaid programs, and we understand that Hawaii will need to create a program that is in alignment with our Medicaid program.

By signing this petition, we are asking for the state, in the form of a resolution, to begin a formal process to develop a Medicaid Buy-in for working people with disabilities.

The 42 states with buy-ins have created their programs in a wide variety of ways that consider the differences in their Medicaid programs, and we understand that Hawaii will need to create a program that is in alignment with our Medicaid program.

By signing this petition, we are asking for the state, in the form of a resolution, to begin a formal process to develop a Medicaid Buy-in for working people with disabilities.

**Petition for the Development of a Medicaid Buy-in for Working People with Disabilities**

We, the undersigned of this petition, are asking Hawaii Governor Linda Lingle and the Hawaii State Legislature to develop a Medicaid Buy-in for Working People with Disabilities.

Hawaii is one of eight remaining states in the union without a Medicaid group allowing people with disabilities who want to work the opportunity to purchase Medicaid to keep their healthcare. While 42 states have approached this in different ways, in general, it allows people with disabilities on public benefits to go back to work by raising the income and asset limits for Medicaid in exchange for premiums and co-pays, which can often be significant. The 42 states with buy-ins have created their programs in a wide variety of ways that consider the differences in their Medicaid programs, and we understand that Hawaii will need to create a program that is in alignment with our Medicaid program.

By signing this petition, we are asking for the state, in the form of a resolution, to begin a formal process to develop a Medicaid Buy-in for working people with disabilities.

**Petition for the Development of a Medicaid Buy-in for Working People with Disabilities**

We, the undersigned of this petition, are asking Hawaii Governor Linda Lingle and the Hawaii State Legislature to develop a Medicaid Buy-in for Working People with Disabilities.

Hawaii is one of eight remaining states in the union without a Medicaid group allowing people with disabilities who want to work the opportunity to purchase Medicaid to keep their healthcare. While 42 states have approached this in different ways, in general, it allows people with disabilities on public benefits to go back to work by raising the income and asset limits for Medicaid in exchange for premiums and co-pays, which can often be significant. The 42 states with buy-ins have created their programs in a wide variety of ways that consider the differences in their Medicaid programs, and we understand that Hawaii will need to create a program that is in alignment with our Medicaid program.

By signing this petition, we are asking for the state, in the form of a resolution, to begin a formal process to develop a Medicaid Buy-in for working people with disabilities.

**Petition for the Development of a Medicaid Buy-in  
for Working People with Disabilities**

We, the undersigned of this petition, are asking Hawaii Governor Linda Lingle and the Hawaii State Legislature to develop a Medicaid Buy-in for Working People with Disabilities.

Hawaii is one of eight remaining states in the union without a Medicaid group allowing people with disabilities who want to work the opportunity to purchase Medicaid to keep their healthcare. While 42 states have approached this in different ways, in general, it allows people with disabilities on public benefits to go back to work by raising the income and asset limits for Medicaid in exchange for premiums and co-pays, which can often be significant. The 42 states with buy-ins have created their programs in a wide variety of ways that consider the differences in their Medicaid programs, and we understand that Hawaii will need to create a program that is in alignment with our Medicaid program.

By signing this petition, we are asking for the state, in the form of a resolution, to begin a formal process to develop a Medicaid Buy-in for working people with disabilities.
