Dear CPC Committee Members,

The bill before your committee is an important step in healthily regulating an industry that has been neglected of updated safety concerns and consumer protection, due to the lack of insight and resources available by our Hawaii Department of Health.

I would like to suggest that S.B.2398 have wording placed in the bill to *require the Department of Health to work with a task force* consisting of professionals in the industry to develop responsible conditions for the public safety over health concerns regarding trade shows, before being allowed in Hawaii.

The task force is desperately needed to bring Hawaii regulations into the 21<sup>st</sup> century.

Sincerely yours,  
Cindy Groom
