### Comments:

There should be no exemptions with respect to fast tracking projects in a manner that would keep the public from fully vetting said project, especially in the area of avoiding the absolutely necessary environmental impact statement process. This bill is rife with special interest loopholes that could/would produce irreparable damage for these so called "exceptional" projects.

**Comments:**

I oppose this legislation. Environmental review must be upheld equally for all projects, regardless of size, scope, instigator, contractor or developer. No special exemptions from environmental review for particular projects, particular developers, or any other circumstances.
