

EXECUTIVE CHAMBERS
HONOLULU

NEIL ABERCROMBIE
GOVERNOR

June 26, 2013

GOV. MSG. NO. 1301

The Honorable Donna Mercado Kim,
President
and Members of the Senate
Twenty-Seventh State Legislature
State Capitol, Room 409
Honolulu, Hawaii 96813

The Honorable Joseph M. Souki,
Speaker and Members of the
House of Representatives
Twenty-Seventh State Legislature
State Capitol, Room 431
Honolulu, Hawaii 96813

Dear President Kim, Speaker Souki, and Members of the Legislature:

This is to inform you that on June 26, 2013, the following bill was signed into law:

HB353 HD1 SD2 CD1

RELATING TO AGRICULTURE
ACT 198 (13)

Sir

NEIL ABERCROMBIE
Governor, State of Hawaii

Approved by the Governor
on JUN 26 2013

ACT 198

HOUSE OF REPRESENTATIVES
TWENTY-SEVENTH LEGISLATURE, 2013
STATE OF HAWAII

H.B. NO. 353
H.D. 1
S.D. 2
C.D. 1

A BILL FOR AN ACT

RELATING TO AGRICULTURE.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that coffee is the fourth
2 largest agricultural crop in the State and is a highly valued
3 commodity in Hawaii's economy. Coffee plantations cover
4 approximately eight thousand acres of land in the State and
5 generate total farm revenues of approximately \$30,000,000. In
6 addition to its value as an agricultural commodity, interest in
7 coffee farms as part of the agricultural tourism experience is
8 growing. According to the Hawaii agricultural statistics
9 service, the value of the agricultural tourism industry, with
10 one hundred and twelve farms earning income from agricultural
11 tourism activities, was measured at \$38,800,000, in 2006.
12 Coffee farmers participating in the agricultural tourism
13 industry have been able to increase coffee revenues by selling
14 directly to visitors to their farms, thus increasing the role
15 that coffee plays in agricultural tourism, which is a growing
16 part of the State's economy.

17 The legislature also finds that, in recent years, the
18 coffee berry borer, a small beetle that is harmful to coffee

HB353 CD1 HMS 2013-3650

1 crops worldwide, has infested coffee crops in the Kona and South
2 Kona regions. The infestation of coffee farms by the coffee
3 berry borer threatens to dismantle Hawaii's entire coffee
4 industry because of the nature and speed of the infestations.
5 Currently, it is estimated that over ninety per cent of coffee
6 farms in the Kona region are affected by the coffee berry borer,
7 and it is likely that every farm in the region will be
8 experiencing some degree of infestation soon. Infestations and
9 secondary effects of infestation have drastically reduced the
10 yield of coffee trees and adversely impacted the quantity and
11 prices of coffee from the Kona region.

12 The legislature also finds that ongoing efforts to control
13 the damage to crops are critical, now that the coffee berry
14 borer is present in Hawaii. It can also be expected that the
15 coffee berry borer will eventually spread to other regions and
16 counties of Hawaii where coffee is farmed. Methods to combat
17 the coffee berry borer are used effectively in other coffee-
18 growing regions of the world. However, farmers in Hawaii need
19 to be educated about these methods and how to effectively apply
20 them. In addition, the costs of the required supplies and labor
21 to implement these methods can be financially prohibitive for
22 smaller coffee farms in the State.

1 The legislature further finds that, because of Hawaii's
2 unique terrain and the preponderance of small-sized farms with
3 an aging population of farmers, the existing labor-intensive
4 methods of combating the coffee berry borer are more challenging
5 to implement in Hawaii than in other regions of the world. For
6 that reason, research is needed to develop new methods
7 appropriate for Hawaii's coffee farms, including those that
8 could reduce the cost of labor necessary to control the coffee
9 berry borer. The legislature finds that it is essential to take
10 immediate action to develop methods to combat the coffee berry
11 borer and to mitigate the future impacts to other coffee-
12 producing regions in the State.

13 The purpose of this Act is to appropriate funds for the
14 control and containment of the damage caused by the coffee berry
15 borer and for research to develop new methods of preventing and
16 treating infestations.

17 SECTION 2. There is appropriated out of the general
18 revenues of the State of Hawaii the sum of \$250,000 or so much
19 thereof as may be necessary for fiscal year 2013-2014 and the
20 same sum or so much thereof as may be necessary for fiscal year
21 2014-2015 for the department of agriculture to research and
22 develop methods for the prevention and treatment of coffee berry

1 borer infestations; provided that no funds shall be expended
2 unless matched on a dollar-for-dollar basis from either private
3 or other government sources.

4 The sums appropriated shall be expended by the department
5 of agriculture for the purposes of this section.

6 SECTION 3. There is appropriated out of the general
7 revenues of the State of Hawaii the sum of \$300,000 or so much
8 thereof as may be necessary for fiscal year 2013-2014 for the
9 department of agriculture to fund efforts to control and
10 mitigate the damage from the coffee berry borer infestation in
11 Hawaii; provided that no funds shall be expended unless matched
12 on a dollar-for-dollar basis from either private or other
13 government sources.

14 The sum appropriated shall be expended by the department of
15 agriculture for the purposes of this section.

16 SECTION 4. This Act shall take effect on July 1, 2013.

APPROVED this 26 day of JUN, 2013

Neil Abernethy
GOVERNOR OF THE STATE OF HAWAII
