# A BILL FOR AN ACT

RELATING TO NATIVE WILDLIFE.

**BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:**

1           SECTION 1. The legislature finds that Hawaii has the  
2 largest concentration of endangered and threatened species in  
3 the world, a majority of which are birds. Of more than one  
4 hundred types of endemic Hawaiian birds, more than two-thirds  
5 are already extinct and over eighty per cent of those that  
6 remain are threatened with extinction. Furthermore, there are  
7 more than fourteen million seabirds that rely on habitats in the  
8 Hawaiian archipelago. It is imperative that the State protect  
9 these endangered and endemic animals if an oil or fuel-related  
10 disaster affecting native wildlife were to occur.

11           The Hawaii Wildlife Center's mission is to conserve  
12 Hawaii's native wildlife through emergency response,  
13 rehabilitation, education, and research. The Center is the only  
14 native wildlife emergency response and rehabilitation facility  
15 in the State and in the Pacific Islands region. In addition,  
16 the Center is the only facility within the State that meets all  
17 federal and state standards for accommodating a large-scale  
18 rescue and rehabilitation effort targeting sick, injured, or

1 oiled wildlife. A purpose built and operational oiled-wildlife  
2 response facility is the standard set for highly successful  
3 emergency responses as it provides efficient, state-of-the-art  
4 wildlife care, provides control of animal and hazardous waste  
5 handling and tracking, and ensures the safety of everyone  
6 working with oiled wildlife. Also, the Center serves as a  
7 critical emergency response facility for the training of  
8 response personnel and volunteers and for the rehabilitation of  
9 injured, sick, and contaminated wildlife throughout the Pacific  
10 Islands region.

11 The purpose of this Act is to support the operations of an  
12 environmental disaster standby and response facility to respond  
13 to oil and fuel-related disasters affecting native wildlife in  
14 the State through the environmental response revolving fund.

15 SECTION 2. Section 128D-2, Hawaii Revised Statutes, is  
16 amended by amending subsection (b) to read as follows:

17 "(b) Moneys from the fund shall be expended by the  
18 department for response actions and preparedness, including  
19 removal and remedial actions, consistent with this chapter;  
20 provided that the revenues generated by the environmental  
21 response, energy, and food security tax deposited into the  
22 environmental response revolving fund:

- 1 (1) Shall be used:
- 2 (A) For oil spill planning, prevention, preparedness,  
3 education, research, training, removal, and  
4 remediation; and
- 5 (B) For direct support for county used oil recycling  
6 programs; and
- 7 (2) May also be used to support environmental protection  
8 and natural resource protection programs, including  
9 [energy]:
- 10 (A) Support for the operations of an environmental  
11 disaster standby and response facility in the  
12 State that shall be responsible for the recovery  
13 and rehabilitation of native wildlife that are  
14 sickened, injured, or contaminated as a result of  
15 an oil or fuel-related disaster in the State;
- 16 (B) Energy conservation [and alternative];
- 17 (C) Alternative energy development[~~r~~]; and [~~to~~  
18 address]
- 19 (D) Addressing concerns related to air quality,  
20 global warming, clean water, polluted runoff,  
21 solid and hazardous waste, drinking water, and  
22 underground storage tanks, including support for

1           the underground storage tank program of the  
2           department and funding for the acquisition by the  
3           State of a soil remediation site and facility."

4           SECTION 3. Statutory material to be repealed is bracketed  
5 and stricken. New statutory material is underscored.

6           SECTION 4. This Act shall take effect on July 1, 2050.

**Report Title:**

Environmental Response Revolving Fund; Wildlife Rehabilitation and Recovery

**Description:**

Amends section 128D-2, Hawaii Revised Statutes, to allow the environmental response revolving fund to be used to support the operations of an environmental disaster standby and response facility in the State that shall be responsible for the recovery and rehabilitation of native wildlife that are sickened, injured, or contaminated as a result of an oil or fuel-related disaster in the State. Effective 07/01/2050. (SD2)
