

PETITION TO THE PRESIDENT OF THE SENATE AND THE SPEAKER OF THE HOUSE
AND ALL MEMBERS OF THE 2013 HAWAII STATE LEGISLATURE

We, the residents of the State of Hawaii, in the year 2013, petition the Hawaii State Legislature, both the Senate and the House of Representatives, to vote 'No' to **Senate Bill 237** and **House Bill 865**, which would allow the lease of public school land to private developers even if the land is currently being used for the education of our keiki.

Of great concern is the fact that these bills will allow the current approval process for leasing public school land to be bypassed, thus creating a fast track process for private developments that may not be beneficial to the public school system, the children, or the community.

Even though the bills were created to raise needed funds for modernizing school facilities, there are better and more efficient ways to raise money for public education than to permanently build high rise buildings or other private developments where school property is currently being utilized for educational purposes.

The unintended consequence of these bills is that schools in the urban core will be targeted where open space is at a premium and where the community most desires to keep public school land exclusively for the use of the children. *There are 531 signatures to this petition.*

Respectfully,

Date: 4/23/2013

Elisabeth Larson
President of Jefferson Elementary School PTO

Petition - Vote 'No' to Senate Bill 237 and House Bill 865

We, the residents of the City and County of Honolulu, in the year 2013, petition the Hawaii State Legislature to vote 'No' to **Senate Bill 237** and **House Bill 865**, which would allow the Lt. Governor and the DOE to lease public school land to private developers even if the land is currently being used for the education of our keiki. These bills allow section 302A-1151 to be ignored. Section 302A-1151 was written to protect school property from being developed for other purposes than for education.

Even though the bill was created to raise needed funds for modernizing school facilities, there are better and more efficient ways to raise money for public education than to permanently build high rise buildings where school property is currently being utilized for educational purposes.

The unintended consequence of these bills is that schools in the urban core will be targeted where open space is at a premium and where the community most desires to keep public school land for the use of the children.

Petition - Vote 'No' to Senate Bill 237 and House Bill 865

We, the residents of the State of Hawaii, in the year 2013, petition the Hawaii State Legislature to vote 'No' to **Senate Bill 237** and **House Bill 865**, which would allow certain government bodies to lease public school land to private developers even if the land is currently being used for the education of our keiki.

Even though the bills were created to raise needed funds for modernizing school facilities, there are better and more efficient ways to raise money for public education than to permanently build high rise buildings or other private developments where school property is currently being utilized for educational purposes.

The unintended consequence of these bills is that schools in the urban core will be targeted where open space is at a premium and where the community most desires to keep public school land for the use of the children.

Petition - Vote 'No' to Senate Bill 237 and House Bill 865

We, the residents of the State of Hawaii, in the year 2013, petition the Hawaii State Legislature to vote 'No' to **Senate Bill 237** and **House Bill 865**, which would allow certain government bodies to lease public school land to private developers even if the land is currently being used for the education of our keiki.

Even though the bills were created to raise needed funds for modernizing school facilities, there are better and more efficient ways to raise money for public education than to permanently build high rise buildings or other private developments where school property is currently being utilized for educational purposes.

The unintended consequence of these bills is that schools in the urban core will be targeted where open space is at a premium and where the community most desires to keep public school land for the use of the children.
