# SENATE CONCURRENT RESOLUTION

REQUESTING THE DEPARTMENT OF AGRICULTURE, WITH THE ASSISTANCE OF  
THE COMMISSION ON WATER RESOURCE MANAGEMENT, TO CONDUCT A  
STUDY REGARDING A PERMEABLE SURFACES TAX CREDIT.

1           WHEREAS, S.B. No. 1305, Regular Session of 2013, would have  
2 established a permeable surfaces tax income tax credit for  
3 taxpayers who maintain permeable surfaces and a tax deduction of  
4 expenses incurred toward certification as an organic  
5 agricultural operation based on the determination of a  
6 qualifying property's net water infiltration; and  
7

8           WHEREAS, the amount of recharge to groundwater aquifers  
9 must be increased to meet rising water demands; and  
10

11           WHEREAS, groundwater recharge can only occur if water can  
12 penetrate the land surface; and  
13

14           WHEREAS, businesses and agricultural operations can provide  
15 a public service by opting to maintain a permeable land surface  
16 where water can percolate down to groundwater aquifers, thereby  
17 allowing excess water that is not evaporated or taken up by  
18 vegetation to become groundwater storage that will serve a  
19 future public good; and  
20

21           WHEREAS, agricultural operations should be compensated for  
22 such public service, and an incentive should be provided to  
23 encourage agricultural operations to incorporate the performance  
24 of ecological services into their business models; and  
25

26           WHEREAS, concerns were raised in testimony regarding  
27 technical issues that needed to be resolved in order for S.B.  
28 No. 1305 to pass, including the application of new irrigation  
29 and agricultural technologies; now, therefore,  
30

31           BE IT RESOLVED by the Senate of the Twenty-seventh  
32 Legislature of the State of Hawaii, Regular Session of 2013, the

1 House of Representatives concurring, that the Department of  
2 Agriculture, with the assistance of the Commission on Water  
3 Resource Management, is requested to conduct a study regarding a  
4 permeable surfaces tax credit; and

5  
6 BE IT FURTHER RESOLVED that the study address, at minimum:

- 7
- 8 (1) How to calculate and compute the volume of water that
- 9 percolates to recharge groundwater aquifers,
- 10 including potential usable model recommendations that
- 11 yield a true or accurate accounting of net water
- 12 infiltration;
- 13
- 14 (2) Whether urban groundwater percolation should be
- 15 included in a tax credit and how to calculate
- 16 groundwater percolation in urban areas;
- 17
- 18 (3) How to collect measurements of rainfall, considering
- 19 microclimates across Hawaii;
- 20
- 21 (4) Identifying the source of recharge water, such as
- 22 rainfall inputs or return irrigation water;
- 23
- 24 (5) How to define "qualifying property" for purposes of a
- 25 permeable surfaces tax credit; and
- 26
- 27 (6) Any other issues relevant to administering a permeable
- 28 surfaces tax credit, with the input of the Department
- 29 of Taxation; and
- 30

31 BE IT FURTHER RESOLVED that the Department of Agriculture  
32 is requested to report to the Legislature its findings and  
33 recommendations, including any proposed legislation, no later  
34 than twenty days prior to the convening of the Regular Session  
35 of 2014; and

36  
37 BE IT FURTHER RESOLVED that certified copies of this  
38 Concurrent Resolution be transmitted to the Chairperson of the  
39 Board of Agriculture, Chairperson of the Board of Land and  
40 Natural Resources, and Director of Taxation.
