Comments: AGR & WAL Committee Hearing 2/4/13 8:30 a.m. Regarding Support for HB484 Aloha Representatives, I am writing in support of HB484 to protect Taro lands form development. As I understand it, this bill will protect taro lands from being developed via the Public Lands Development Corporation. Land for taro cultivation is essential to Hawaii's food security. Even affordable housing projects should be planned to go somewhere else. Let's do everything we can to promote locally grown taro for our food supply! Mahalo, Angela Breene angelavideotron@gmail.com Haleiwa, Hi 96712

Comments: Malama Haloa! Coupled with HB734, establishes a Unique (U) class designation for taro lands under state jurisdiction within the DLNR Land Class listing and prevents reclassification to other uses once land has received U class status, protecting ancient agricultural structures (walls, terraces, auwai), and auwai where they cross multiple properties and are at risk of damage or destruction. The bill also adds to the State Planning agricultural goals, the goal of protecting and encouraging traditional Hawaiian crops. Protects taro lands from PLDC. We have lost too many traditional taro lands to development and they need to be protected for future use. Taro lands can be found in the conservation zones of many communities and are needed in each community and ahupuaa to support community health and wellbeing. Hundreds of our students and families are returning to the knowledge and practice of growing taro. We need to protect taro lands for these children. Taro lands are often located in high risk areas for floods and ponding. Retaining these lands as taro lands protects communities and reduces liability to the State and Counties. **SUPPORT HB484**

SUMMARY: Includes the Unique class (referred to above as U class status) designated lands in the list of state lands not allowed to be used for affordable housing projects on Oahu. The statute this amends is Oahu specific public lands. Protects taro lands from PLDC.

Comments: Protect our unique agriculture lands and taro farms from development! We have enough places to develop locally, if we need it! Redevelop our misused lands before developing new areas! There are tons of empty buildings in Honolulu. Refurbish these to keep development alive, and make use of the areas we have already invested in utilities development and building infrastructure!

Comments: to whom it may concern, I am writing in support of HB484. I strongly agree with the purpose of this bill to protect taro-growing structures and agricultural lands from development because without them how would we grow taro? For instance if the bill doesnt pass and all the agricultural lands and taro-growing structures were developed on what would we do? We wouldnt be able to grow taro traditionally or even grow taro at all, how would we make poi? Poi is already a rarity to some people why make it more of a rarity? So please pass HB484, so whats left of the thousand ancient lo'i of Hawai'i wouldn't disappear.

Comments: To whom it may concern, I am writing in support of the House Bill 484 which talks about how it is a compelling interest to protect agricultural lands. The task force found that elements for viable taro production are being destroyed, severed and built upon by private and public developments because of land use gaps, historic preservation and planning laws and policies. The purpose of this bill is to improve access to taro-growing lands and is an opportunity for taro self-sufficiency. I think you should pass this bill because the land needs to be protected. we should protect the land the same way our parents protect us or how we protect our siblings. We care for them and we should care for the land. It helps us produce crops so that we can eat.

Comments: I am writing in support to the HB484. I support the HB484 on behalf of the taro being able to have agricultural lands to grow and reproduce on. This also does not allow any development of genetically modifying any of the taro. This means it will not be disturbed or contaminated and so the taro would grow healthy. I really hope that this goes through and all of our taro can grow healthy and be severed as a healthy meal for a family.
