Comments: Aloha, Please support SCR 123. Big mahalos to Senators Ruderman, Green, Baker, Ihara, Thielen, and Wakai. I'm very happy some of you are practical visionaries and that you are looking out for the public. A sincere thank you for sponsoring this Reso. For other unconvinced Senators, this technology is a bad idea for Hawai'i. Don't be a dinosaur; this is old, dirty technology in a shiny, new wrapper. We need solar energy. I traveled to Iceland years ago and their geothermal facilities are fifty miles from the nearest house. Geothermal hydraulic fracturing is a stupid idea. I know you're under a lot of pressure to develop this resource but there are too many serious problems involved with the technology and the cons are too much of a sacrifice to residents of Hawai'i. Please support this Resolution and please research the alternatives by next year. P.S. HB 252 is a ROTTEN trick and I will be completely disgusted if this bait and switch is allowed to happen. Shameful and deceitful. Mahalo.

Comments: Aloha mai! I am in support of this bill to oppose fracking in Hawaii. As a citizen, young adult, and native Hawaiian, I am disgusted and appalled that fracking in Hawaii is even being considered. This practice is more destructive than it is beneficial. I am totally against the wasteful use of our WAIWAI [if you do not understand the preciousness of it or what waiwai is, you do NOT belong in our legislature, as you do NOT understand that our water means everything to this land]. What sane person would ever think that using the combination of millions of gallons of water plus 526 identified chemicals [the other 374 unknown] that DOESNT biodegrade to drill into the ground to basically create a small earthquake just to release natural gases is okay? Hawaii is the most isolated place and paradise on the planet. We should be focusing on A SUSTAINABLE COMMUNITY WORKING TOWARDS A BRIGHT FUTURE WITH SUSTAINABLE ENERGY. Fracking is far from sustainable and is harmful to us and the earth as it pollutes our land, sky, and water. I'm sure I speak for every resident living in Hawaii [had they known the truth about fracking] with the exception of the people who make money off of this, that fracking is most certainly NOT okay and NOT welcomed in Hawaii. Please help to stop destroying the 'aina. I cry because I feel her beneath my feet, as she keeps providing as humans keep destroying her. I will not stand idle, and if you do not rise up to save and preserve Hawai'i nei, I will personally do everything within my power to expose you to the rest of Hawaii and will work towards replacing you with a better suited politician who WILL do the job to protect Hawaii and its people. Mahalo.

Comments: I live near Opihikao. Stop the geothermal fraking. This is insanity. Puna is our home. How would you like listen to the noise, vibration & dangers in your back yard?!!! I doubt it. We live here. Most of you have never even been here!

Comments: Aloha, This is a bad idea for Hawai'i. Don't be a dinosaur; this is old, dirty technology. We need solar energy. I traveled to Iceland years ago and their geothermal facilities are fifty miles from the nearest house. Geothermal hydraulic fracturing is a stupid idea. I know you're under a lot of pressure to develop this resource but there are too many serious problems involved with the technology and the cons are too much of a sacrifice to residents of Hawai'i. Please support this Resolution and please research the alternatives by next year. P.S. HB 252 is a ROTTEN trick and I will be completely disgusted if this bait and switch is allowed to happen. Shameful and deceitful.

Comments: Don't harm paradise. Work with nature not against it. Less force, more flow. Blessings to all everywhere
