
A BILL FOR AN ACT

RELATING TO THE ENVIRONMENT.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the excessive use of
2 single-use checkout bags presents an unnecessary hazard to the
3 natural environment. While counties have enacted ordinances
4 that prohibit or will prohibit businesses from providing plastic
5 bags at the point of sale, other single-use checkout bags, such
6 as paper bags:

7 (1) Require crude oil, a polluting fossil fuel, for their
8 manufacture;

9 (2) Burden overcrowded landfills;

10 (3) Are recycled minimally;

11 (4) Contribute to deforestation and greenhouse gas
12 emissions; and

13 (5) Are manufactured using large quantities of water and
14 non-renewable energy.

15 Prohibitions on the use of plastic bags may increase reliance on
16 paper bags that also are damaging to the environment. An
17 environmentally friendly alternative to the single-use checkout

1 bag is the reusable bag that consumers can easily acquire,
2 clean, and store.

3 The legislature finds that the State has a compelling
4 interest in protecting its precious natural environment.
5 Several countries and both international and domestic cities
6 have successfully implemented similar laws that have resulted in
7 a significant reduction in single-use checkout bag usage and
8 have used collected fees for environmental protection programs.
9 Because the people of Hawaii depend on the preservation of the
10 natural environment for economic, social, and cultural reasons,
11 the public's health and welfare will benefit immensely from a
12 significant reduction of single-use checkout bag waste and
13 resource use for their manufacture and disposal.

14 The production of single-use checkout bags also requires
15 the consumption and combustion of large quantities of fossil
16 fuels, trees, and water. While plastic bags require large
17 amounts of crude oil to produce, production of paper bags can
18 use twenty times as much fresh water and four times as much
19 energy than plastic bags. In the United States alone, over
20 fourteen million trees are used to create paper bags, causing
21 significant greenhouse gas emissions by removing forests that
22 absorb large quantities of carbon dioxide. Disposing both paper

1 and plastic bags by burning further increases greenhouse gas
2 emissions.

3 The legislature further finds that protecting Hawaii's
4 forests from damage from invasive species helps to mitigate the
5 climate change caused by the production and disposal of single-
6 use checkout bags. The intergovernmental panel on climate
7 change considers reducing or preventing deforestation as the
8 climate mitigation option with the largest and most immediate
9 carbon stock impact in the short term.

10 Forest protection also increases Hawaii's resilience to the
11 likely effects of climate change caused by burning fossil fuels
12 worldwide. Major consequences of climate change for Hawaii's
13 water supplies are predicted, including drought from higher
14 temperatures, reduced rainfall, and rising sea levels salting
15 coastal freshwater aquifers. Climate change may also result in
16 severe storm events, causing flooding and erosion. Through Act
17 152, Session Laws of Hawaii 2000, the legislature recognized
18 that fresh water is not an infinite resource and its high
19 quality, quantity, and sustainability depend upon forested
20 watersheds. Hawaii's forests significantly increase water
21 capture and break the impact of heavy rains, reducing flooding
22 and erosion and siltation of reefs and fisheries. Protecting

1 watersheds is crucial for Hawaii's resiliency to climate change
2 by ensuring water availability and buffering severe storm
3 events.

4 The purpose of this Act is to reduce the adverse impact of
5 single-use checkout bag waste on Hawaii's precious and unique
6 natural environment by establishing an offset fee for the
7 distribution of single-use checkout bags and funding programs to
8 mitigate against damaging effects of single-use checkout bags,
9 thereby improving water quality and resilience to climate
10 change.
