
A BILL FOR AN ACT

RELATING TO ENERGY EFFICIENCY.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. Because Hawaii is highly dependent on imported
2 fossil fuel for energy generation, the legislature has a special
3 interest in ensuring energy conservation and efficiency to
4 secure the future well-being of the State and its people. As
5 part of this policy, the State enacted Act 73, Session Laws of
6 Hawaii 2010, which established the Hawaii clean energy
7 initiative program to ensure the State's energy security.

8 The legislature finds that televisions account for the
9 fastest growing source of residential energy use in the State.

10 In accordance with the goals of the Hawaii clean energy
11 initiative, the purpose of this Act is to reduce and limit the
12 amount of energy consumed by televisions in the State.

13 SECTION 2. Chapter 196, Hawaii Revised Statutes, is
14 amended by adding a new part to be appropriately designated and
15 to read as follows:

16 "PART . **TELEVISION ENERGY EFFICIENCY STANDARDS.**

17 **§196- Definitions.** As used in this part, unless the
18 context otherwise requires:

1 "Combination television" means a system in which a
2 television or television monitor and an additional device or
3 devices, including a digital video disc player or video cassette
4 recorder, are combined into a single unit in which the
5 additional devices are included in the television casing.

6 "Component television" means a television composed of two
7 or more separate components, such as a separate display device
8 and tuner, marketed and sold as a television under one model or
9 system designation, which may have more than one power cord.

10 "ENERGY STAR" means a labeling program administered jointly
11 by the United States Environmental Protection Agency and the
12 United States Department of Energy to identify and promote
13 energy-efficient products.

14 "Motor vehicle" means the same as defined in section 286-2.

15 "Television" means any analog or digital device primarily
16 designed for the display and reception of a terrestrial,
17 satellite, cable, internet protocol television, or other
18 broadcast or recorded transmission of analog or digital video
19 and audio signals, including combination televisions, television
20 monitors, component televisions, and any unit that is marketed
21 or sold to a consumer as a television. "Television" does not
22 include computer monitors.

1 "Viewable screen area" means the continuous total area of a
2 television screen, measured in square inches, that displays a
3 digital or analog video signal and that is viewable to a
4 consumer.

5 **§196- Scope and application.** (a) This part shall
6 apply to all new televisions manufactured after June 30, 2014,
7 that are offered for sale or installed in the State as stand-
8 alone products or as components of other products.

9 (b) This part shall not apply to televisions:

10 (1) Manufactured in the State and sold outside the State;

11 (2) Manufactured outside the State and sold at wholesale
12 inside the State for final retail sale and
13 installation outside the State; or

14 (3) Designed expressly for installation and use in motor
15 vehicles.

16 **§196- Television efficiency standards.** No new
17 television with a viewable screen area of three thousand square
18 inches or less manufactured after June 30, 2014, may be sold,
19 offered for sale, or installed in the State unless its energy
20 efficiency standards meet or exceed the ENERGY STAR
21 specifications in effect at the time of the sale."

1 SECTION 3. If any provision of this Act, or the
2 application thereof to any person or circumstance, is held
3 invalid, the invalidity does not affect other provisions or
4 applications of the Act that can be given effect without the
5 invalid provision or application, and to this end the provisions
6 of this Act are severable.

7 SECTION 4. This Act shall take effect upon its approval.
8

INTRODUCED BY: 

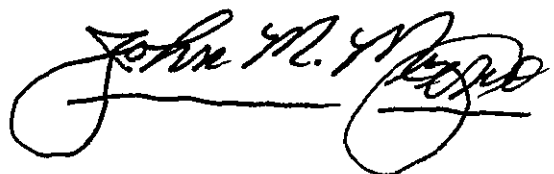

H.B. NO. 447

Report Title:

Energy Efficiency; Televisions; ENERGY STAR

Description:

Requires new televisions manufactured on or after July 1, 2014, with viewable screen area of 3,000 square inches or less and sold in the State to meet ENERGY STAR efficiency specifications.

The summary description of legislation appearing on this page is for informational purposes only and is not legislation or evidence of legislative intent.
