A BILL FOR AN ACT

RELATING TO ECONOMIC DEVELOPMENT.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that hurricanes Katrina
2 and Sandy are major teaching moments for the public safety
3 community. The storms proved that when dealing with a natural
4 hazard we should expect the unexpected. Hazards of both
5 hurricanes included inland flooding, high winds, and high waves
6 - hazards Hawaii has and can continue to expect with future
7 storm systems. In fact, storm surges from hurricane Sandy were
8 continuing to occur a year later, while efforts to repair
9 damages are still ongoing. Natural hazards such as hurricanes
10 Katrina and Sandy remind us that local governments need to
11 afford easy access to public safety services during local
12 hazards and make every reasonable effort to protect their
13 residents, communities, and assets.

14 The legislature further finds that the State currently has
15 facilities that are aging and located in inundation zones.
16 Natural hazards, such as tsunamis, pose threats to these hubs.
17 In addition, the city and county of Honolulu's primary runway is
18 located in an inundation zone. In the case of a natural hazard,

1 the only runway available to deliver aid is located in central
2 Oahu at Wheeler airfield. Recognizing the importance of
3 accessibility and cost, the State needs to set forth a plan to
4 relocate public safety services located within and nearby
5 inundation zones to a centralized non-inundation zone area.
6 Furthermore, a central public safety facility will provide
7 direct access to highways and be in proximity to hospital and
8 military services and assistance.

9 The purpose of this Act is to put forth a strategy that
10 will centralize public safety facilities to enable the sharing
11 of resources and support services by establishing a central Oahu
12 public safety technology park.

13 SECTION 2. Chapter 206M, Hawaii Revised Statutes, is
14 amended by adding a new part to be appropriately designated and
